Interpreting Weight Jeffery Sobal,2017-07-05 What is too fat? what is too thin? Interpretations of body weight vary widely across and within cultures. Meeting weight expectations is a major concern for many people because failing to do so may incur dire social consequences, such as difficulty in finding a romantic partner or even in locating adequate employment. without these social and cultural pressures, body weight would only be a health issue. while socially constructed standards of body weight may seem immutable, they are continuously recreated through social interactions that perpetuate or transform expectations about fatness and thinness. Written by sociologists, psychologists, and nutritionists, all of the chapters in this book focus on how people construct fatness and thinness, examining different strategies used to interpret body weight, such as negotiating weight identities, reinterpreting weight, and becoming involved in weight-related organizations. Together these chapters emphasize the many ways that people actively define, construct, and enact their fatness and thinness in a variety of settings and situations.

Harmony in Style Giada Victoria Disilvestro, 2023-12-17 Welcome to your journey into the world of body types with Harmony In Style. Based on David Kibbe's revolutionary body types categorization system, this book provides a comprehensive guide to discovering and embracing your body structure and essence. The Kibbe method goes beyond mere identification of your body type; it embraces individual beauty through a deep understanding of nuanced and unique characteristics, making it a valuable tool for identifying what suits you best. Through practical advice, illustrations, and numerous helpful recommendations, Harmony in Style guides you through the process of creating a wardrobe that authentically reflects your natural and unique beauty. Get ready to discover how the Kibbe system can be the key to unveiling your genuine personal harmony.

Palaeopathology and Evolutionary Medicine Kimberly A. Plomp, Charlotte A. Roberts, Sarah Elton, Gilian R. Bentley, 2022 The volume aims to encourage more co-produced research addressing questions about human health, past and present by scholars working in evolutionary medicine (EM) and palaeopathology. It highlights future research that may promote that collaboration between palaeopathology and EM. This chapter starts with the premise that EM and palaeopathology have clear synergies in that they take a deep time perspective as they explore health in the past and in the present. It introduces the volume and first provides a background to evolutionary medicine from its first appearance in the early 1990s, including discussions about ultimate and proximate explanations for disease. It then highlights that the field of palaeopathology was initially established much earlier than EM and it is argued that practitioners before the 1990s, often physicians, were simply not exposed to evolutionary theory in relation to the diseases they were seeing both in the living and in the dead. However, the stage now looks set for more productive collaborations. A thematic overview of the volume and its individual chapters follows within the framework of the suggested categories for study within EM (Williams and Nesse 1990). The chapter finishes with some discussion about the One Health initiative, EM and palaeopathology, an initiative that is considered an essential area of study now and into the future--

Virtual, Augmented and Mixed Reality: Systems and Applications Randall Shumaker, 2013-06-12 Here is the second of a two-volume set (LNCS 8021 and 8022) that constitutes the refereed proceedings of the 5th International Conference on Virtual, Augmented and Mixed Reality, VAMR 2013, held as part of the 15th International Conference on Human-Computer Interaction, HCI 2013,

held in Las Vegas, USA in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 88 contributions included in the VAMR proceedings were carefully reviewed and selected for inclusion in this two-volume set. The papers included in this volume are organized in the following topical sections: healthcare and medical applications; virtual and augmented environments for learning and education; business, industrial and military applications; culture and entertainment applications.

The Funeral Kit Jill L Baker, 2016-06-03 Studies of mortuary archaeology tend to focus on difference—how the researcher can identify age, gender, status, and ethnicity from the contents of a burial. Jill L. Baker's innovative approach begins from the opposite point: how can you recognize the commonalities of a culture from the “funeral kit” that occurs in all burials, irrespective of status differences? And what do those commonalities have to say about the world view and religious beliefs of that culture? Baker begins with the Middle and Late Bronze Age tombs in the southern Levant, then expands her scope in ever widening circles to create a general model of the funeral kit of use to archaeologists in a wide variety of cultures and settings. The volume will be of equal value to specialists in Near Eastern archaeology and those who study mortuary remains in ancient cultures worldwide.

Puranic Encyclopedia Vettam Mani, 2015-01-01 This voluminous work, a store house of information about the Epics, Puranas and allied literature, was originally composed and published in Malayalam. It constituted the results of the author's devoted study and research extending over fourteen years. This English version of the same is to meet the growing demand of scholars interested in the study of Puranas. This stupendous work, in the form of an exhaustive descriptive index, covers the vast and varied field of ancient Indian culture in all aspects—history geography, religion, philosophy, myths, beliefs and practices as depicted in the Epics and Puranas. The work is planned on scientific lines.

The material compiled is arranged systematically. Citations have been inserted in support of stated facts; at places they have been substituted by reference. Obsolete and obscure words, denoting objects such as a particular tree or plant have been explained by their scientific or vernacular equivalents. All modern critical apparatus has been utilized in the preparation of this comprehensive work.
