Ethnographic Discourse of the Other Eswarappa Kasi, Ramesh C. Malik, 2009-03-26 This book primarily tries to bring out the analogy between the conceptual and methodological discourses on the theme of the other. The term 'Other' here refers to the oppressed sections of the society. It may be dalits, women, indigenous or ethnic communities. Since we are living in a multicultural and multilingual society, we should share our views with others on a platform where issues of the marginalized people are addressed by different scholars following different methods and techniques. Though there are various policies and plans for the welfare of the downtrodden, hardly any change can be seen at the micro-level structure of the society. There are studies which highlighted the problems and ethos of the downtrodden sections, but a majority of those studies neglected the marginalized groups. Hence, we felt the need to highlight the issues and concerns of these groups in a wider context and started thinking on the theme 'Ethnographic Discourse of the Other: Conceptual and Methodological Issues'. This volume attempts to discuss and theorize the pragmatic concepts and issues related to the marginalized groups in contemporary societies in South Asia. This book is interdisciplinary in nature and will be useful to scholars and students of Anthropology, Sociology, Linguistics, Social Work, Culture Studies, Gender Studies and Philosophy. It is widely applicable to all sections of the oppressed socially, economically, culturally, academically, politically and other wise.

**Heritage Sites of Astronomy and Archaeoastronomy in the Context of the UNESCO World Heritage Convention** Clive L. N. Ruggles, 2012 This Thematic Study is a

joint venture between ICOMOS, the advisory body to UNESCO on cultural sites, and the International Astronomical Union. It presents an overall vision on astronomical heritage, attempts to identify what constitutes outstanding universal significance to humankind in relation to astronomy, and identifies broad issues that could arise in the assessment of cultural properties relating to astronomy. This is the first Thematic Study in any field of science heritage. It is elaborated using examples of properties from around the world, including some already on the World Heritage List or national Tentative Lists. The subject matter ranges from early prehistory to modern astrophysics and space heritage, and also prominently includes dark sky issues and modern observatory sites. An e-version of the Thematic Study was published in June 2010 in time to be presented to the 2010 meeting of UNESCO's World Heritage Committee, where it was duly approved. It has been circulated officially by the WHC to all of UNESCO's National Commissions. This full-colour paperback edition with some updates, and reformatted to new ICOMOS standards, was published in 2011 and is now offered for public sale.

**A Santal Dictionary** P. O. Bodding,1998-03 Santali, or the language of the Santhals, is spoken by the sons of the soil in a large territory spread over Bihar, West Bengal, Orissa and North-Eastern India. Apart from Santhals several other tribes also use Santali as their dialect. Though several dictionaries on the Santali language have been compiled by earlier Christian missionaries to spread the message of Bible in the local idiom, Bodding s remains

the most exhaustive, most elaborate and most acceptable of all the lexicons. The entries carry not only the meaning and usage but also ethnological description. The reason is to help all readers who use the dictionary for clearer understanding of what each word stands for or refers to. With parantheses at the end of each article some etymological matter has been added. Foreign words which have been assimilated into Santali are included. In all, the dictionary is the only complete and authoritative reference work for those who want to use Santali either as mother tongue or neighbouring or foreign language.
