The Cabuliwallah Rabindranath Tagore,2014-12-25 Rabindranath Tagore, also written Rabindranatha Thakura, (7 May 1861 - 7 August 1941), sobriquet Gurudev, was a Bengali polymath who reshaped Bengali literature and music, as well as Indian art with Contextual Modernism in the late 19th and early 20th centuries. Author of Gitanjali and its profoundly sensitive, fresh and beautiful verse, he became the first non-European to win the Nobel Prize in Literature in 1913. In translation his poetry was viewed as spiritual and mercurial; however, his elegant prose and magical poetry remain largely unknown outside Bengal. Tagore introduced new

prose and verse forms and the use of colloquial language into Bengali literature, thereby freeing it from traditional models based on classical Sanskrit. He was highly influential in introducing the best of Indian culture to the West and vice versa, and he is generally regarded as the outstanding creative artist of the modern Indian subcontinent, being highly commemorated in India and Bangladesh, as well as in Sri Lanka, Nepal and Pakistan.

Characterization of Porous Solids and Powders: Surface Area, Pore Size and Density S. Lowell, Joan E. Shields, Martin A. Thomas, Matthias Thommes, 2012-09-14 The growth of interest in newly developed porous materials has prompted the writing of this book for those who have the need to make meaningful measurements without the benefit of years of experience. One might consider this new book as the 4th edition of Powder Surface Area and Porosity (Lowell & Shields), but for this new edition we set out to incorporate recent developments in the understanding of fluids in many types of porous materials, not just powders. Based on this, we felt that it would be prudent to change the title to Characterization of Porous Solids and Powders: Surface Area, Porosity and Density. This book gives a unique overview of principles associated with the characterization of solids with regard to their surface area, pore size, pore volume and density. It covers methods based on gas adsorption (both physisorption and chemisorption), mercury porosimetry and pycnometry. Not only are the theoretical and experimental basics of these techniques presented in detail but also, in light of the tremendous progress made in recent years in materials science and nanotechnology, the most recent developments are described. In particular, the application of classical theories and methods for pore size analysis are contrasted with the most advanced microscopic theories based on statistical mechanics (e.g. Density Functional Theory and Molecular Simulation). The characterization of heterogeneous catalysts is more prominent than in earlier editions; the sections on mercury porosimetry and particularly chemisorption have been updated and greatly expanded.

Indus Script Cipher Srinivasan Kalyanaraman, 2010 This is a path-breaking work as significant as the decipherment of Egyptian hieroglyphs by Champollion. For nearly 130 years, the Indus script has remained a challenging enigma to scholars of languages, writing systems and civilization studies. The script was invented and used over an extensive area of what is called the Indus or Sindhu-Sarasvati civilization. Over 2000 or 80% of archaeological sites are found on the Sarasvati River basin, a river adored in a very old human document called the Rigveda and which dried up due to tectonic and resulting river migration causes. In 1822, history was made when Egyptian hieroglyphs were deciphered by Jean-Francois Champollion from parts of the Rosetta Stone. Champollion showed that the Egyptian writing system, c.3000 BCE was a combination of phonetic and ideographic glyphs. The Rosetta Stone is dated 196 BCE and had a decree in three versions: one in ancient Egyptian hieroglyphs, one in the Egyptian demotic script, and one in ancient Greek. Since alphabets of ancient Greek were known, Champollion used the trilingual inscription to validate his historic decipherment. Indus Script Cipher makes history recording hundreds of hieroglyphs of India. Absence of a Rosetta Stone which has been the principal impediment in validating any decryption of Indus script cipher is thus overcome. Further validation comes from evidences of the historical periods in India from c. 600 BCE showing continued use of Indus script hieroglyphs which evolved from c. 3300 BCE. This book details a decipherment of the Indus script using the same rebus method used by Champollion to read ancient phonetic hieroglyphs of India. By demonstrating an Indian linguistic area of cultural and language contacts and history of language changes, this is a landmark contribution to civilization studies of the world and will promote efforts to rewrite the ancient socio-cultural and economic history of a billion people in India and neighboring regions.
