Ashok Rudra

Predictive Techniques In Varshaphala Dr. K S Charak, 2003 Krishnamurty Paddhati Arun Bansal, Krishnamurti Paddhati is an excellent system (Paddhati) of astrological predictions conceived & created by The Great Indian Astrology King, late Prof. K.S. Krishnamurti. As you must have experienced that accuracy of the time period of the events is difficult when one uses Traditional/Vedic or any other system. KP can give you a precise YES or NO answer astrologically to your questions. To overcome the above and similar short-comings of the conventional vedic system, KP comes as savior. The position of a planet either benefic or malefic covers a large domain of 30° within a Rasi. K.P. system tends to evolve a system by which the operation of a particular planet in a Rasi, is determined by just not its placement but by the constellation it travels and the sub lord it is positioned in. All planets moving from Vernal Equinox Aries according to the Nirayana system get their results modified as they move in the Zodiac. Thus in the first 13°20' any planet transiting in Mesha will be influenced by the constellation called Aswini and so on till Revathi in which the planet will be influenced by Mercury. As the duration of the zone 13°20' for each Nakshatra is a broad zone. they are further classed into nine parts in proportion to their duration as per their Vimshotri Dasa. This is termed as the sub-lord. Normally, Jupiter, Venus, affiliated Mercury and waxing Moon are termed as natural benefics while Sun, Mars, Saturn, Rahu & Ketu as malefics. But in KP it is determined by sub lord planet is posited in. 1. The planet in a constellation will offer the result of Bhava house occupied by the lord of the constellation. 2. The planet which is situated in a constellation is the strongest to offer the results of the house occupied

by the lord of the constellation.. 3. The occupants of a house is strong to

give the results of the house occupied by it. Planets in the constellation of the occupants of a Bhava will indicate the fruits of the Bhava. 4.Planet deposited in the constellation of the lord of the sign where the cusp of a house falls. 5. Then only the lord of the sign where the cusp of a house falls. The above form the various significators for the determination of a particular event. Only the conjoined planets of the above should be utilised for determining the end result. Hence it may be concluded that the planet is the resource, constellation indicates nature of the result and the sub is a deciding factor whether the matter is favourable or not. Unless the last is favourable we do not call it a benefic. Note:- Rahu & Kethu are Nodes. A node signifies firstly the results of the planet or planets with which It is conjoined, then the results of lord of the constellation in which It is deposited, then the planet or planets aspecting it and lastly of the owner of the sign in which it is deposited.

Jataka Sara Sangraha K. Guru Rajesh,2018-12-19 Jaimini system is a highly practical method which helps its practitioners to reach quick conclusions regarding the events and their timing in the life of a native. The rules are simple and straight forward and the Dasa durations can be calculated easily in mind. Jataka Sara Sangraha is a unique work in this branch of Jyotisha where the author ingeniously presents his material in a logical fashion drawing from the Jaimini Sutras and Vruddha Karikas. For the first time in the literature of Jaimini astrology the author explains the application of all the Ayurdasas by giving a single example Horoscope. This is one of the rare works where numerous Ayurdasas and Phalita Dasas are explained in detail. The treatise is divided into three Parichchedas or chapters. The first chapter deals with the methods of longevity determination of a native and explains the Ayurdasas which help to

predict the time of death of the native and his relatives like parents, siblings, spouse and so on. The second chapter deals with different Phalita Dasas which help to predict the timing of various events in a native's life. The final and third chapter explains many Yogas. Jataka Sara Sangraha is a must for anyone who wants to grasp the nuances of Jaimini System and gain mastery over the subject.

Krishneeyam Alok Jagawat, 2019-03-24 The great Acharya Shri Krishna composed this Grantha in 11th century A.D. Thereafter the book gained unequalled admiration and was quoted in later compositions like Prashnamarg, Vidhyāmādhaviyam and Rudra's commentary on Vrihad Jataka. The Malayalam literary composition like unnivaccicaritam carries citation from this great grantha. The earliest mention can be cited from Shri Govinda Bhattatiri of talakkulam (a.d 1237-95) who quoted it frequently. Shri Vishnu the son of Mādhavaacharya has written the Sanskrit commentary caturasundari, which is included in this work. Sriyut Puliyur Puruśottam nambudiri wrote the Malayalam commentary. This Grantha is the magnum opus of Horary astrology because of its historical value. This grantha is unique and different from most of the Jyotisha granthas. The grantha is neither too short nor too descriptive. The author mentions that he has done it intentionally so readers should not lose the interest or it should not become too complex. Level: This book is a part of advance Vedic Jyotisha related to ancient prashna system of Kerala.

The Gem Set in Gold S. N. Goenka, This is the English translation of the Pali and Hindi chanting by S.N. Goenka from a ten-day Vipassana meditation course. It is formatted so that one can readily find the translations of the chanting from throughout the course, including the opening night, each day's morning chanting, and all other chantings. The Pali and Hindi text appears on pages opposite the English translation.

India and International Currency Plans V. K. R. V. Rao, 2007-03 PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank shects for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when me say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is depend- ent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream- fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to

a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to lochfishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...
