Longevity: a Vedic Approach Raj Kumar, The correct judgement of longevity is highly complex, but is equally important and sought after. "Knowing longevity is difficult even for gods" said sage Parashar. Any prediction made without considering it may make the prediction a laughing stock of both the astrologer and astrology. The time span between birth and death of a native is called his longevity. Longevity and death are not the same but are closely related. However it is not yet clear what death is. Our scriptures have at various places equated death with different types of Mrityu Tulya agonies which are different from physical death. Again the destiny of each one of us is interlinked with our close kith and kin and our relationship with them is pre-determined, predestined and irrevocable. Death is severing of final link of a native with them. Hence a native's death must get corroborated / confirmed in the horoscopes of his close relations. An attempt is made in this book to address all such issues. The book is a study of about 225 natives who had lived and died in different countries at different time, at different age and of different causes, applying known tools of astrology. The book is an attempt to help clear some mist and enable to have a better judgement of longevity.

**Ashtakavarga System of Prediction** Bangalore V. Raman, 2006

**Vargas: a Vedic Approach** Raj Kumar, The Vargas are the unique feature of Vedic astrology which has given it a definite edge over any other system in vogue. The primary aim of studying a Varga is two folds- to study a particular aspect of human life pertaining to a specific house and to find out the true strength of planets related with the house. A horoscope takes into account linear time and vertical declinations of the planets. Every division of zodiac has a corresponding division of time. Hence a Varga gives projections representing possibilities which might occur in different time frames. Each chart gives a microscopic view of a particular facet of life seen in the light of Dasha sequence. There are many tools available to assess the true strength of a planet. One set of rules rely on PAC of planets, their awasthas and yogas formed by them. The other, Nadi system, studies the effects of lords of sign, Nakshatra and Sub under which a planet is placed. At times these influences change the characteristics of a planet completely. In this book an attempt is made to unite the two systems to get the true strength of planets. In order to understand a planet and its significations in a better way, a comparative study of planets in birth and divisional charts has also been made. This book shall add to precision and accuracy of probable events and their qualitative effects on various aspects related to a native and as such will be of great use to serious students of astrology.

*Sûrya-Siddhânta* Phanindralal Gangooly,1989 The oldest and most important treatise of the post-Christian period on Indian Astronomy that has come down to us is the Surya Siddhanta consisting 14 chapters written in slokas. Alberuni says that Lata was the author of this work. According to the introductory verses Surya the sun-god revealed it to Asura Maya in the city of Romaka.

*Astrology and Cosmology in the World's Religions* Nicholas Campion,2012-06-11 When you think of astrology, you may think of the horoscope section in your local paper, or of Nancy Reagan's consultations with an astrologer in the White House in the 1980s. Yet almost every religion uses some form of astrology: some way of thinking about the sun, moon, stars, and planets and how they hold significance for human lives on earth. *Astrology and Cosmology in the World's Religions* offers an accessible overview of the astrologies of the world's religions, placing them into context within theories of how the wider universe came into being and operates. Campion traces beliefs about the heavens among peoples ranging from ancient Egypt and China, to Australia and Polynesia, and India and the Islamic world. Addressing each religion in a separate chapter, Campion outlines how, by observing the celestial bodies, people have engaged with the divine, managed the future, and attempted to understand events here on earth. This fascinating text offers a unique way to delve into comparative religions and will also appeal to those intrigued by New Age topics.

The Horary Textbook - Revised Edition John Frawley,2014-01-31 Horary is the branch of astrology that provides clear, specific answers to specific questions. Quick, simple, and accurate,

horary was for centuries the most valuable tool in any astrologer's work-box. Whether the question be on love, career, illness - or predicting the weather for a barbecue, this clear and comprehensive guide by a modern master of horary shows you how to answer it. The first edition of this book quickly established itself as a classic of astrological teaching. Now this master of the craft shares his deepening understanding, bringing what he has learned in the intervening years of teaching and practice to clarify, expand upon, and correct the original text. With the wit and lucidity that characterise his writing, the author guides all from beginners to seasoned practitioners to the very heart of horary astrology. Frawley's prowess as a horary astrologer is awesome. - The Mountain Astrologer.

Gaṇeśapurāṇa Greg Bailey, 2008 This book offers a translation of the seven thousand verses of the second book of the medieval Hindu text, the Ganesa Purana, one of two Puranas dedicated to the important elephant-headed god. In this book the reader is given many narratives about Ganesa's ascent to earth in order to kill demonic figures who threaten to overthrow the correct world order. In addition, these narratives contain myths about Ganesa's birth and family as well as some extended and quite humorous myths about ideal devotees of the god. The translation is preceded by a long introduction offering a geographical and historical context for the Ganesa Purana. Following the translation are very extensive notes which bring our points of philological interest, but focus mainly on the literary structure of the text and the methods used to present the many myths and narratives

in a coherent and fully integrated manner.

**Global Indian Diasporas** Gijsbert Oonk, 2007 *Global Indian Diasporas* discusses the relationship between South Asian emigrants and their homeland, the reproduction of Indian culture abroad, and the role of the Indian state in reconnecting emigrants to India. Focusing on the limits of the diaspora concept, rather than its possibilities, this volume presents new historical and anthropological research on South Asian emigrants worldwide. From a comparative perspective, examples of South Asian emigrants in Suriname, Mauritius, East Africa, Canada, and the United Kingdom are deployed in order to show that in each of these regions there are South Asian emigrants who do not fit into the Indian diaspora concept—raising questions about the effectiveness of the diaspora as an academic and sociological index, and presenting new and controversial insights in diaspora issues.

*An Introduction to Jyotish* Sarajit Poddar, 2021-05-13 Jyotish is the ancient science of deciphering the essential uniformity of principles that guide the celestial bodies and the events in the world. Because of these unified principles, what happens in this world can be deciphered from what happens in the heavenly world. The movement of Grahas or Grahas, as they are called in Sanskrit, provides for a unified language used for deciphering the occurrences of this world, including the matters concerning humans, animals, plants, weather and nations. This is an exciting subject of associating the symbols of nature to the occurrences of mundane events or human affairs; however, it is exceedingly vast. To be able to cover the expansive vistas of this subject, one must undertake a structured approach, which covers several areas of Jyotish, including Ganita, Samhita and Hora. The Ganita deals with the mathematical or astronomical aspect of this subject, the Samhita deals with the mundane elements such as weather forecasting, earthquakes, rainfall etc.,

and the Hora deals with the judgement of the Kundalis of individuals. This book introduces the subject.
