Manning, Prabhakar Raghavan, Hinrich Schütze, 2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert, Erma Hermens, Marja Peek, 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled Historical Painting Techniques, Materials, and Studio Practice at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Dictionary of the British English Spelling System Greg Brooks, 2015-03-30 This book will tell all you need to know about British English spelling. It's a reference work intended for anyone interested in the English language, especially those who teach it, whatever the age or mother tongue of their students. It will be particularly useful to those wishing to produce well-designed materials for teaching initial literacy via phonics, for teaching English as a foreign or second language, and for teacher training. English spelling is notoriously complicated and difficult to learn; it is correctly described as much less regular and predictable than any other alphabetic orthography. However, there is more regularity in the English spelling system than is generally appreciated. This book provides, for the first time, a thorough account of the whole complex system. It does so by describing how phonemes relate to graphemes and vice versa. It enables searches for particular words, so that one can easily find, not the meanings or pronunciations of words, but the other words with which those with unusual phoneme-grapheme/grapheme-phoneme correspondences keep company. Other unique features of this book include teacher-friendly lists of correspondences and various regularities not described by previous authorities, for example the strong tendency for the letter-name vowel phonemes (the names of the letters) to be spelt with those single letters in non-final syllables.

Changing Mindsets to Transform Security National Defense University (US), 2017-08-23 This book includes papers presented at the Third International Transformation (ITX3) Conference and Workshop on Leader Development, held in Washington, DC, at the National Defense University (NDU) on June 19-20, 2013, as well as a summary of the conference discussions. Sponsored by Headquarters Supreme Allied Commander Transformation (HQSACT), and supported by the International Transformation (ITX) Chairs Network, the conference brought together academics, policymakers, and practitioners to discuss the topic of Changing Mindsets to Transform Security: Leader Development for an Unpredictable and Complex World. In July 2012, the Chairman of the Joint Chiefs of Staff, General Martin E. Dempsey, U.S.A., released the Joint Education White Paper, challenging those in the Professional Military Education and Joint Professional Military Education community to develop agile, adaptive leaders with the requisite values, strategic vision and critical thinking skills necessary to keep pace with the changing strategic environment. In response, and to support NATO National Chiefs of Transformation efforts, the ITX Chairs Network issued a call for papers to increase the understanding of leader development, refine concepts, and develop content to be used in U.S. and international fora. Seventeen of the papers published here were presented in Washington. Two of the papers were submitted before the conference, but the authors were not able to attend. The views are those of the individual authors. Based on the themes developed during the conference, the papers are grouped in five categories: 1) Human Dimension of Transformation; 2) Changing Nature of Adult Education-Drivers of Change; 3) Perspectives on Joint Education; 4) International Attitudes; and 5) Enlisted Education and Other Concepts. We hope that you will find this volume useful, and welcome feedback
