Introduction to Information Retrieval Christopher D. Manning,Prabhakar Raghavan,Hinrich Schütze,2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Tarot Companion: Layouts Basic to Advanced Dorothy Holder, 2016-11-26 Tarot Companion is all about the layouts. Dorothy has been a professional Tarotist and creator of cards for 20 years, teaching the art of reading cards, having trained under Silvia Shanti Vowless a master of the Order of Melchizedek and teacher of the tree of life approach to Tarot. It is rare to find a traditionally trained tarotist who truly understands the cards. This book offers easy to understand layouts and step by step guidance to process, card placement and positions. The best way to improve your readings is to practice different spreads and develop an understanding of the cards relationship to the position it holds within that spread. Whether you are seeking to heal a situation or develop career you will find a fresh new perspective while exploring what divination really means. Comprehensive instructions for each spread and an innovative style of laying out the cards means beginners and experienced readers alike will be able to take a fresh approach and learn more about their cards. If you are at the very beginning of the exciting world of tarot you might also want to grab Learn Tarot (the first in this series) www.dorothyholder.com

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert, Erma Hermens, Marja Peek, 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled Historical Painting Techniques, Materials, and Studio Practice at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of

Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Tarot and Psychology Arthur Rosengarten,2000-04-07 What? A Clinical Psychologist Espousing Tarot Cards? Dr. Arthur Rosengarten, in *Tarot and Psychology: Spectrums of Possibility*, does just that. He explains Tarot to those who may want to learn to use it properly for the greatest good-individuals who desire greater spirituality in their lives, including the benefits of psychological insight and depth, without the baggage of affiliation that invariably accompanies any single set of beliefs. Tarot, they will soon find, operates on many levels of profound meaning from a purely non-affiliated platform in the truest sense. Tarot makes accessible to awareness a full spectrum of psychological and spiritual possibility with little preference for its user's qualifications or beliefs. Rather magically, one might say,

Tarot captures the heartbeat of experience. This fact alone should make the deck of human possibility immediately relevant to helping professionals who deal with the heartbeats of experience daily. The use of Tarot as an oracle for creating awareness and gaining insight into particular symptoms, problems or questions-i.e. Tarot divination-is often mentioned as an afterthought, alongside other meditational exercises and alternative spread configurations. Yet today, the vast majority of individuals who have discovered the wonders and mysteries of Tarot have done so through experiences of divination. Card reading, without a doubt, is Tarot's most beguiling and potentially beneficial enterprise. Why dance around the magic? For Tarot to continue to evolve into the 21st century (and beyond) it must have a stronger application emphasis, that is, it must be relevant, accessible, and meaningful to the changing contours of people's lives. It must resonate with all who seek greater meaning, creativity, and awareness, not simply with small segments of the waning New Age. Tarot and Psychology provides an innovative new approach for understanding the psychological and spiritual possibilities of human experience.

The Tao of Craft Benebell Wen, 2016-09-27 For the first time in English, Benebell Wen reveals the rich history and theoretical principles underlying the ancient practice of crafting Fu talismans, or magical sigils, in the Chinese Taoist tradition and gives detailed instructions for modern practitioners who would like to craft their own Fu. Fu talismans are ideograms and writings typically rendered on paper and empowered by means of invocations, ritual, and transferences of energy, or Qi. Talismans can be used for many purposes, such as strengthening or weakening personality characteristics, finding love, earning more money, or easing emotional tensions in the home. The Tao of Craft shows how metaphysical energy can be harnessed to amplify, strengthen, weaken, dispel, or block other metaphysical energy and to rectify perceived imbalances in the material plane. Supported by an

abundance of detailed charts and images, this book serves as a step-by-step handbook that gives readers the knowledge and confidence to craft their own Fu talismans for personal empowerment. Wen, author of *Holistic Tarot*, delves into historic and cultural contexts of the Fu, from the neolithic period of Chinese history to contemporary practices of esoteric Taoism. Providing a solid foundation in the principles of Eastern spellcrafting, she highlights the blending of Taoist metaphysical practices with Western approaches to magic by pointing out eclectic, integrating, and harmonizing facets from other cultures and religions. Historically, Fu talismans were used by medieval Chinese for alleviating illness; averting misfortune, magical attacks, and curses; defending against assaults; and avoiding poverty. This book shows Western practitioners that the skill and knowledge to develop an interactive relationship with spirit realms are still available to them today, and serves as a practical handbook for accumulating Qi energy from sources in the environment and channeling it in concentrated form into their own Fu talismans.

The Horary Textbook - Revised Edition John Frawley, 2014-01-31 Horary is the branch of astrology that provides clear, specific answers to specific questions. Quick, simple, and accurate, horary was for centuries the most valuable tool in any astrologer's work-box. Whether the question be on love, career, illness - or predicting the weather for a barbecue, this clear and comprehensive guide by a modern master of horary shows you how to answer it. The first edition of this book quickly established itself as a classic of astrological teaching. Now this master of the craft shares his deepening understanding, bringing what he has learned in the intervening years of teaching and practice to clarify, expand upon, and correct the original text. With the wit and lucidity that characterise his writing, the author guides all from beginners to seasoned practitioners to the very heart of horary

astrology. Frawley's prowess as a horary astrologer is awesome. - The Mountain Astrologer.

Each Wild Idea Geoffrey Batchen, 2002-02-22 Essays on photography and the medium's history and evolving identity. In *Each Wild Idea*, Geoffrey Batchen explores a wide range of photographic subjects, from the timing of the medium's invention to the various implications of cyberculture. Along the way, he reflects on contemporary art photography, the role of the vernacular in photography's history, and the Australianness of Australian photography. The essays all focus on a consideration of specific photographs—from a humble combination of baby photos and bronzed booties to a masterwork by Alfred Stieglitz. Although Batchen views each photograph within the context of broader social and political forces, he also engages its own distinctive formal attributes. In short, he sees photography as something that is simultaneously material and cultural. In an effort to evoke the lived experience of history, he frequently relies on sheer description as the mode of analysis, insisting that we look right at—rather than beyond—the photograph being discussed. A constant theme throughout the book is the question of photography's past, present, and future identity.

Cataloging Cultural Objects Murtha Baca, 2006-06-12 In a visual and artifact-filled world, cataloging one-of-a-kind cultural objects without published guidelines and standards has been a challenge. Now for the first time, under the leadership of the Visual Resources Association, a cross-section of five visual and cultural heritage experts, along with scores of reviewers from varied institutions, have created a new data content standard focused on cultural materials. This cutting-edge reference offers practical resources for cataloging and flexibility to meet the needs of a wide range of institutions—from libraries to museums to archives. Consistently following these guidelines for selecting, ordering, and formatting data used to populate metadata elements in cultural materials'

catalog records: Promotes good descriptive cataloging and reduces redundancy Builds a foundation of shared documentation Creates data sharing opportunities Enhances end-user access across institutional boundaries Complements existing standards (AACR) This is a must-have reference for museum professionals, visual resources curators, archivists, librarians and anyone who documents cultural objects (including architecture, paintings, sculpture, prints, manuscripts, photographs, visual media, performance art, archaeological sites, and artifacts) and their images.

Stats: Data and Models, Global Edition Paul Velleman, Richard D. De Veaux, David E. Bock, 2016-09-29 Richard De Veaux, Paul Velleman, and David Bock wrote Stats: Data and Models with the goal that students and instructors have as much fun reading it as they did writing it. Maintaining a conversational, humorous, and informal writing style, this new edition engages students from the first page. The authors focus on statistical thinking throughout the text and rely on technology for calculations. As a result, students can focus on developing their conceptual understanding. Innovative Think/Show/Tell examples give students a problem-solving framework and, more importantly, a way to think through any statistics problem and present their results.
