Planet SUN Secrets Saket Shah, 2020-01-05 The Sun god has two arms, he is seated on the pedestal of lotus; both of his hands are embellished with lotus flowers. There is a beautiful golden crown, on his head and a garland of gems around his neck. His radiance is just like the interior part of a lotus flower and he is mounted on the chariot pulled by seven horses. The Sun god is also known as 'Savita', which means - one who creates, 'SAVITA SARVASYA PRASAVITA' (Nirukta -10/31). According to the Rigveda the Sun god situated at the centre of the solar system is an inspirer of all, pervader of the internal parts and an embodiment of almighty god. According to the 'Markandeya Puran' Sun is the embodiment of Brahma, the world originates from the Sun and is established in it. The Sun is the appearance of all the matters and elements and is the eternal almighty. This very God 'Bhaskar' creates nurtures and annihilates the world respectively in the form of lord Brahma, Lord Vishnu & Lord Shiva. Sun is the supreme deity amongst all the nine planets. When Brahma manifested himself by breaking the egg, then he pronounced 'OM'. This Omkar itself is the supreme soul and the very physique of Sun god. The four Vedas emerged from all the four mouths of lord Brahma, which were glowing by their own radiance. The powerful radiance emanating from the 'Omkar' covered the radiance of the Vedas and ultimately all of them unified. This very Vedic appearance of 'Omkar' is the sun god. This radiant sun was the first manifested during the times of creation, hence it was called 'Aditya'. Once the demons, the titans and the monsters unitedly fought with the deities and snatched their power and authority after defeating them. 'Aditi' - the mother of the deities did worship of sun god to get protection from this calamity. Being pleased with her the sun god took incarnation as her son and established the eternal path of the Veda after defeating the enemies of the deities. He is called Aditya also for this reason. The complexion of Sun god is red. His vehicle is a chariot. There is only one wheel in his chariot which is called 'Samvatsar'. The wheel of his chariot has 12 spokes, which symbolise the twelve months. The wheel has six circumferences, which symbolize the six seasons, and three 'Naves' which symbolise of the three four-months. The sages (rishi) and all the celestial supernatural beings like 'Gandharva', 'Apsara', 'Nag' yaksha and the deities' move along with him doing his worship. The wheel, power, a loop and a hook are the weapons of sun god. His great-phase (Mahadasha) last for six years. The Sun is considered as a high planet, till the tenth degree, in the zodiac of Aries. Lord Shiva is considered to be the deity of the Sun. To get his blessings and for his pacification, performance of 'Arghya' (pouring water facing the sun in the morning should be done and also the text of Harivansh purana should be listened to. Ruby should be worn on the body and donation of wheat, cow along with a calf, raw-sugar (gur), copper, gold and red-clothes should be made to the brahmins

Charisma of Navamsha - Composite Vedic and Nadi Approach Raj Kumar, Among various Vargas, the relative importance of Navamsha is universally acclaimed. Astrologers consider it to be just next to birth chart or equal to birth chart or even better than the birth chart. Almost all astrologers use Navamsha and birth chart together to assess strengths of various houses and planets before giving any opinion. In Vedic astrology, Navamsha occupies an outstanding position and draws one's attention for deeper understanding/ scrutiny due to its multifarious technique and usage. The additional inputs in the form of scintillating concepts by Jaimini and Nadi system have made the subject more engrossing. The author has tried to incorporate the same in the book. The study of a birth chart gives only the gross (Sthool) indications of characteristics of various houses and planets; while Navamsha offers their detailed (Sookshmatar) values. It is so because a Navamsha is basically equal to both in its size and extent to a quarter/ one fourth / pada of a Nakshatra, thereby giving it a stellar role. While a house represents a combined spectrum of 30 degrees, a Navamsha provides a microscopic view of 3° 20' or 1/ 9 part of a sign only.

Vargas: a Vedic Approach Raj Kumar, The Vargas are the unique feature of Vedic astrology which has given it a definite edge over any other system in vogue. The primary aim of studying a Varga is two folds- to study a particular aspect of human life pertaining to a specific house and to find out the true strength of planets related with the house. A horoscope takes into account linear time and vertical declinations of the planets. Every division of zodiac has a corresponding division of time. Hence a Varga gives projections representing possibilities which might occur in different time frames. Each chart gives a microscopic view of a particular facet of life seen in the light of Dasha sequence. There are many tools available to assess the true strength of a planet. One set of rules rely on PAC of planets, their awasthas and yogas formed by them. The other, Nadi system, studies the effects of lords of sign, Nakshatra and Sub under which a planet is placed. At times these influences change the characteristics of a planet completely. In this book an attempt is made to unite the two systems to get the true strength of planets. In order to understand a planet and its significations in a better way, a comparative study of planets in birth and divisional charts has also been made. This book shall add to precision and accuracy of probable events and their qualitative effects on various aspects related to a native and as such will be of great use to serious students of astrology.

Planet Mercury Secrets Saket Shah, 2020-01-05 Have you ever heard a voice within, inquisitive, irritating, and contemplating all the time? Well, it has to be Mercury, the karaka of communication and wisdom according to Hindu Astrology. Mercury is the ruler of that fragment of mind that can decide, differentiate, and reason, the faculty that controls the subconscious thoughts and conscious actions and power of discrimination. Its influence is strong. Controlling travel, finance, logic, and education, Mercury can take you places if positioned strong in a horoscope. It can make you a nonsense wreck or sagaciously sensible. Mercury is responsible for how you express yourself to the outer world, how you handle stresses and tackle unfortunate choices in life. Though we are like buildings built brick by brick, it is Mercury that helps present ourselves in the fullest form

Vedic astrology dictates that everything that you do in life is influenced by the positions of the stars and Planets at the moment of your birth. It asserts that you are born according to karmic justice and judgment and that karma is written out into the stars at that exact moment. For this reason, people have turned to the skies for thousands upon thousands of years to begin to decipher the karmic workings and understand why their lives work the way that they do. Karma is the sum of your actions in this life and in past lives, all of which is designed to bring you closer to liberation-that point in your life where you are able to become connected to the Universe and freed from the endless cycle of rebirth and death that we live in. It is something that you can never escape as it is simply the sum and reaction of your actions-it happens whether good or bad, and you will have to deal with the aftermath either way. However, karma brings with it lessons that are designed to help you achieve that liberation in life. Because karma can influence every aspect of your life and because it is written in the stars, you can begin to understand why you go through what you experience and how likely that you are to succeed or fail in all sorts of aspects of your life.
