*Planet SUN Secrets* Saket Shah, 2020-01-05 The Sun god has two arms, he is seated on the pedestal of lotus; both of his hands are embellished with lotus flowers. There is a beautiful golden crown, on his head and a garland of gems around his neck. His radiance is just like the interior part of a lotus flower and he is mounted on the chariot pulled by seven horses. The Sun god is also known as 'Savita', which means - one who creates, 'SAVITA SARVASYA PRASAVITA' (Nirukta -10/31). According to the Rigveda the Sun god situated at the centre of the solar system is an inspirer of all, pervader of the internal parts and an embodiment of almighty god. According to the 'Markandeya Puran' Sun is the embodiment of Brahma, the world originates from the Sun and is established in it. The Sun is the appearance of all the matters and elements and is the eternal almighty. This very God 'Bhaskar' creates nurtures and annihilates the world respectively in the form of lord Brahma, Lord Vishnu & Lord Shiva. Sun is the supreme deity amongst all the nine ☿ planets. When Brahma manifested himself by breaking the egg, then he pronounced 'OM'. This Omkar itself is the supreme soul and the very physique of Sun god. The four Vedas emerged from all the four mouths of lord Brahma, which were glowing by their own radiance. The powerful radiance emanating from the 'Omkar' covered the radiance of the Vedas and ultimately all of them unified. This very Vedic appearance of 'Omkar' is the sun god. This radiant sun was the first manifested during the times of creation, hence it was called 'Aditya'. Once the demons, the titans and the monsters unitedly fought with the deities and snatched their power and authority after defeating them. 'Aditi' – the mother of the deities did worship of sun god to get protection from this calamity. Being pleased with her the sun god took incarnation as her son and established the eternal path of the Veda after defeating the enemies of the deities. He is called Aditya also for this reason. The complexion of Sun god is red. His vehicle is a chariot. There is only one wheel in his chariot which is called 'Samvatsar'. The wheel of his chariot has 12 spokes, which symbolise the twelve months. The wheel has six circumferences, which symbolize the six seasons, and three 'Naves' which is symbolise of the three four-months. The sages (rishi) and all the celestial supernatural beings like 'Gandharva', 'Apsara', 'Nag' yaksha and the deities' move along with him doing his worship. The wheel, power, a loop and a hook are the weapons of sun god. His great-phase (Mahadasha) last for six years. The Sun is considered as a high planet, till the tenth degree, in the zodiac of Aries. Lord Shiva is considered to be the deity of the Sun. To get his blessings and for his pacification, performance of 'Arghya' (pouring water facing the sun in the morning should be done and also the text of Harivansh purana should be listened to. Ruby should be worn on the body and donation of wheat, cow along with a calf, raw-sugar (gur), copper, gold and red-clothes should be made to the brahmins

Jaimini System : An Introduction Shalini Dasmana, This book deals with the fundamentals of Jaimini Astrology. Second to 'PARASHAR; JAIMINI' is the greatest giant of Vedic Astrology. Parashar laid down the great principle of Vedic Astrology, while Jaimini went a step further and refined them. JAIMINI UPDESH SUTRAS were composed by Maharishi Jaimini. SUTRAS are very short sanskrit Stanzas with very vast and profound meaning. They are like a ball of thread. The more they are opened out, the more meaning they reveal, and they are so brief that they can even be memorised. Who was Jaimini Maharishi? No one knows for sure! Some learned men think that he was a disciple of the famous Maharishi Ved Vyas, who was Parashar's Son. They also feel that he is the famous author of 'Poorva Mimansa' and 'Jaimini Bharat'. Others feel that he is a later author who was very familiar with mantras. Whoever he was! His genius is reflected in the sutras he composed. These sutras are probably five thousand years old. They have stood the test of time and time has turned them into beautiful Gems of prediction. The centuries have proved their authenticity and soundness. These sutras are 936 in number, spread over four Adhyayas. The Greatest principle of Jaimini System is that the Study of Lagna is not enough. Apart from, studying the horoscope from the regular Lagna, Moon and Sun; one must study it in the light of karakamsa Lagna, Arudha, Up-pada, Hora lagna and the different karakas. In this way the personality of the Jatak is split up into its fundamentals and studied. Next is the karakatvas of the planets and houses. Parashar allotted permanent karakatvas to planets and houses. He also gave conditional karakatvas to the planets according to their lordship over different houses. Jaimini made prediction simpler, sharper and quicker by establishing limits of these karakatvas through the different char karakas. Another striking feature Jaimini is the Jaimini Drishti or Aspects. Every student of Astrology knows that both planets and Rashis affect us and yet we consider the aspects of only the planets! What about the Rashis ? This factor was taken into account by Jaimini. He established that the rashis also aspected each other and the planets placed in them also cast their Aspects along with their respective rashis. These aspects are quite different from Parashari aspects. Apart from these main features Jaimini has its own Yogas, Argalas and dashas. The most popular dasha for General use is Char dasha. Some of the other dashas as are Sthir dasha, Mandook dasha, Trikona dasha, Nirayan shoola dasha, Brahma dasha, Varnada dasha and Yogardha dasha. Some of them are conditional dashas while the others are used for a specific purpose. We shall be confining ourselves to Char dasha only in this book. On the face of it, it may appear that Jaimini contradicts Parashar. This is a misconception. If studied in-depth, it becomes clear that Jaimini is only a refinement of Parashari principles. Traditional Astrologers mostly use Jaimini for 'Ayurdaya' or assessment of longevity. The time is ripe for us to make an effort to revive this great system, so that it can be used for the entire reading of the horoscope and for bringing fineness or sookshmata in prediction. The main purpose behind introducing Jaimini Astrology is to encourage the use of composite techniques of prediction. These have been adopted superbly by shri Mahadeva pathak in his Jatak Tatva. He has used Jaimini principles alongside the Parashari principles to produce very good composite Techniques. In the end I would like to point out that most of the Astrological classics stress more on Negativity. As modern Astrologers we need to conduct researches to bring out the positive aspects of these principles and to modify and update them.

*Vedic Mathematics* Swami Bharati Krishna Tirtha,Vasudeva Sharana Agrawala,1992 This epoch-making and monumental work on Vedic Mathematics unfolds a new method of approach. It relates to the truth of numbers and magnitudes equally applicable to all sciences and arts. **Ancient Mesopotamia** A. Leo Oppenheim,2013-01-31 This splendid work of scholarship . . . sums up with economy and power all that the written record so far deciphered has to tell about the ancient and complementary civilizations of Babylon and Assyria.—Edward B. Garside, New York Times Book Review Ancient Mesopotamia—the area now called Iraq—has received less attention than ancient Egypt and other long-extinct and more spectacular civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. To any serious student of Mesopotamian civilization, this is one of the most valuable books ever written.—Leonard Cottrell, Book Week Leo Oppenheim has made a bold, brave, pioneering attempt to present a synthesis of the vast mass of philological and archaeological data that have accumulated over the past hundred years in the field of Assyriological research.—Samuel Noah Kramer, Archaeology A. Leo Oppenheim, one of the most distinguished Assyriologists of our time, was editor in charge of the Assyrian Dictionary of the Oriental Institute and John A. Wilson Professor of Oriental Studies at the University of Chicago.

Kundalini Tantra Swami Satyananda Saraswati,1996 In the last few decades, yoga has helped millions of people to improve their concepts of themselves. Yoga realises that man is not only the mind, he is body as well. Yoga has been designed in a such a way that it can complete the process of evolution of the personality in every possible direction. Kundalini yoga is a part of the tantric tradition. Even though you may have already been introduced to yoga, it is necessary to know something about tantra also. Since the dawn of creation, the tantrics and yogis have realised that in this physical body there is a potential force. It is not psychological or transcendental; it is a dynamic potential force in the material body, and it is called Kundalini. This Kundalini is the greatest discovery of tantra and yoga. Scientists have begun to look into this, and a summary of the latest scientific experiments is included in this book.

**Ubuntu and Buddhism in Higher Education** David Robinson-Morris,2018-10-26 Ubuntu and Buddhism in Higher Education theorizes the equal privileging of ontology and epistemology towards a balanced focus on ‘being-becoming’ and knowledge acquisition within the field of higher education. In response to the shift in higher education’s aims and purposes beginning in the latter half of the 20th century, this book reconsiders higher education and Western subjectivity through southern African (Ubuntu) and Eastern (Buddhist) onto-epistemologies. By mapping these other-than-West ontological viewpoints onto the discourse surrounding higher education, this volume presents a vision of colleges and universities as transformational institutions promoting our shared connection to the human and non-human world, and deepens our understanding of what it means to be a human being.
