Steven Pike

**The New Capitalist Manifesto** Umair Haque, 2011 Haque maintains that the worst decade since the Great Depression is actually a crisis of institutions' ideals inherited from the industrial age. In this bold manifesto, Haque advocates a new set of ideals, and makes an irresistible business case for following the lead of companies that adopt these ideals.

**Leveraging Mega-Event Legacies** Jonathan Grix, 2018-10-11 This is a multi-disciplinary contribution to the burgeoning literature on and around mega-events in general and sports mega-events in particular. The volume is not specifically about mega-events or their management, but rather how such events act as a lens through which a number of important and critical questions about the decisions to host, the host nation, its society and the politics of culture, sport and leisure more broadly can be dealt with. In doing so this book seeks to build on, and out from initial work on (sports) mega events by acknowledging the major shift towards 'emerging' states awarded such events since 2006 and incorporating the latest advances in research that have taken place in recent years. For example, debates about what constitutes a 'mega-event', what is meant by a 'legacy', what is 'soft power' and so on are dealt with from a team of leading academics from a variety of academic disciplines. This book was previously published as a special issue of Leisure Studies.

**Event Evaluation:** Donald Getz, 2018-04-20 This is the first textbook and reference work on evaluation intended for event management and event tourism. Drawing upon generic evaluation theory and methods, event and tourism research and real-world experiences, it provides concepts and tools for a comprehensive evaluation system and the implementation of evaluation projects.

**Emotional and social value of organizations** Virginia Barba-Sánchez, Jose Luis Retolaza, Leire San-Jose, Adrian Zicari, 2023-01-05

**Impacts and strategic outcomes from non-mega sport events for local communities** Marijke Taks, Laurence Chalip, B. Christine Green, 2017-10-02 Do small- and medium-sized sporting events affect the overall wellbeing of people living in the host community? If so, how they do they affect local life? This book specifically addresses the strategic choices that host communities make when hosting non-mega sporting events, and looks at the outcomes of those choices. The contributions to this study assess a variety of tangible and intangible effects, including the economic and social impacts, and the effect on tourism and participation in sport. It contains analysis of a variety of events, including spectator and participant events, single-sport and multi-sport events, and one-day and multi-day events, all hosted in different types of cities and communities around the globe. Overall, this book identifies and extends our understanding of the nature, management, and implications of non-mega sporting events. The impacts and strategic outcomes highlighted here have practical value for sport event management and strategy, and advance our understanding of the economic and social consequences of hosting an event. This book was originally published as a special issue of European Sport Management Quarterly.

**Public Value and Public Administration** John M. Bryson, Barbara C. Crosby, Laura Bloomberg, 2015-08-18 Governments and nonprofits exist to create public value. Yet what does that mean in theory and practice? This new volume brings together key experts in the field to offer unique, wide-ranging answers. From the United States, Europe, and Australia, the contributors focus on the creation, meaning, measurement, and assessment of public value in a world where government, nonprofit organizations, business, and citizens all have roles in the public sphere. In so doing, they demonstrate the intimate link between ideas of public value and public values and the ways scholars theorize and measure them. They also add to ongoing debates over what public value might mean, the nature of the most important public values, and how we can practically apply these values. The collection concludes with an extensive research and practice agenda conceived to further the field and mainstream its ideas. Aimed at scholars, students, and stakeholders ranging from business and government to nonprofits and activist groups, Public Value and Public Administration is an essential blueprint for those interested in creating public value to advance the common good.

**Strategic Event Leveraging** Vassilios Ziakas, 2021-10-25 This book comprehensively describes, explains, critiques and refines our current perspectives of event leveraging and, in so doing, provides an analytic account of the subject area as a whole, as it concerns the strategic pursuit of attaining and magnifying benefits that derive from events. Encompassing all events including sport, cultural and business, it also covers all kinds of benefits that can be leveraged and lead to sustainability through triple-bottom-line assessment. The book takes an interdisciplinary approach to cross boundaries and creates linkages among the parent disciplines (sport management; events, hospitality and tourism; leisure studies, parks and recreation) and general disciplines (management, marketing, sociology, anthropology, urban and regional planning). Building a truly global and transdisciplinary framework, the author provides direction and possibilities that can lead to new forms of leveraging, making this an excellent resource for researchers, practitioners and students interested in event management and policy, sport management, recreation and leisure, and hospitality, tourism and festival management.

**Routledge Handbook of Theory in Sport Management** George B. Cunningham, Janet S. Fink, Alison Doherty, 2015-10-16 Theory is an essential element in the development of any academic discipline and sport management is no exception. This is the first book to trace the intellectual contours of theory in sport management, and to explain, critique and celebrate the importance of sport management theory in academic research, teaching and learning, and in the development of professional practice. Written by a world-class team of international sport management scholars, each of whom has taken a leading role in developing a particular theory or framework for understanding sport management, the book covers the full span of contemporary issues, debates, themes and functional approaches, from corporate social responsibility and diversity to strategy, marketing and finance. Every chapter explores a key theoretical approach, including an overview of that theory, a discussion of the process of theory development and of how the theory has been employed in research, practice or teaching, and outlines directions for future research in that area. Each chapter includes cases and examples, as well as short illustrative commentaries from people who have used that particular theory in their work, and attempts to highlight the theory-practice links, or gaps, in that area. For a fully-rounded understanding of what sport management is and how it should be studied, taught and practiced, a thorough grounding in theory is essential. The Routledge Handbook of Theory in Sport Management is therefore important reading for all advanced students, researchers, instructors, managers and practitioners working in this exciting field.

**Taking Brand Initiative** Mary Jo Hatch, Majken Schultz, 2008-03-11 Taking Brand Initiative offers a revolutionary approach to corporate branding that looks beyond the marketing value of brands company-to-customer and the HR significance of brands company-to-employee. It places the management of brands at the senior level of management as it radiates throughout the organization. In this groundbreaking book, international branding thought leaders, Mary Jo Hatch and Make Schultz explain how a company's brand is just as important to outsiders – politicians, suppliers, and analysts as it is to company insiders. They show how only the corporate brand can integrate all the company's staff functions and provide a vision for competition and globalization.

**Total Relationship Marketing** Evert Gummesson, 2011-01-05 This third edition of Total Relationship Marketing confirms it as a classic text on the subject of relationship marketing and CRM, areas which have become accepted – and debated – parts of marketing but are currently undergoing dramatic change. A major contribution to marketing thought internationally, this seminal title presents a powerful in-depth analysis of relational approaches to marketing where the three words relationships, networks and interaction are king. The book effects a dramatic shift in the fundamentals of marketing thought, with the author's refined model of thirty relationships, the 30Rs, presenting a sophisticated and cogent challenge to the traditional 4Ps schema. Previous editions were widely praised as breakthrough texts in the field, combining incisive and searching analysis with an accessible and pragmatic approach to putting the theory to work. This third edition is the first book on relationship marketing and CRM to integrate the ongoing evolution in marketing through the service-dominant logic, lean consumption and the customer's value chain, the augmented role of the customer in value creation, the increasing importance of customer-to-customer (C2C) interaction, network-based many-to-many marketing, and marketing accountability and metrics. It addresses both the high tech, information technology aspects of marketing and the high touch, human aspects. Further, customer-centricity is suggested to be broadened to balanced centricity, a trade-off between the needs of all stakeholders of a network of relationships. Examples, cases, concepts and references have been updated. Highly informative, practical in style and packed with illustrations from real companies, Total Relationship Marketing is an essential resource for all serious marketing practitioners as well as undergraduate and postgraduate students.

Montenegro: Technical Assistance Report – Public Investment Management Assessment International Monetary Fund, 2022-06-09 Public investment is expected to play a significant role in the post-pandemic economic recovery in Montenegro. Due to the importance of the tourism sector, the pandemic has had a deep economic impact. In addition, as government debt already exceeds one hundred percent of GDP, fiscal space to increase public investment is limited. Nevertheless, the completion of the first phase of the Bar-Boljare Highway (BBH), by the end of 2021, should free up public resources within the budget constraint, that could be used for public investments. In this context, a strengthened public investment management (PIM) framework would contribute to maximize its impact on economic growth.

**Museums and Public Value** Carol A. Scott, 2016-04-22 Public Value speaks to our time – to the role that museums can play in creating civil societies, to the challenges involved in using limited assets strategically, to the

demand for results that make a difference and to the imperative that we build the kind of engagement that sustains our futures. This book assists museum leaders to implement a Public Value approach in their management, planning, programming and relationship building. The benefits are long term public engagement and support, which can be used to demonstrate that valuable returns result from public investment in museums. A range of authors from around the world unpack the concept of Public Value and examine its implications for museums. They situate Public Value within current management theory and practice, offer tools for implementation, highlight examples of successful practice and examine the evidence of Public Value that governments seek to inform policy and funding decisions. The book will be required reading for senior professionals in museums, as well as museum and heritage studies students.
