The Ancient Maya Marketplace Eleanor M. King,2015-11-12 Trading was the favorite occupation of the Maya, according to early Spanish observers such as Fray Diego de Landa (1566). Yet scholars of the Maya have long dismissed trade—specifically, market exchange—as unimportant. They argue that the Maya subsisted primarily on agriculture, with long-distance trade playing a minor role in a largely non-commercialized economy. The Ancient Maya Marketplace reviews the debate on Maya markets and offers compelling new evidence for the existence and identification of ancient marketplaces in the Maya Lowlands. Its authors rethink the prevailing views about Maya economic organization and offer new perspectives. They attribute the dearth of Maya market research to two factors: persistent assumptions that Maya society and its rainforest environment lacked complexity, and an absence of physical evidence for marketplaces—a problem that plagues market research around the world. Many Mayanists now agree that no site was self-sufficient, and that from the earliest times robust local and regional exchange existed alongside long-distance trade. Contributors to this volume suggest that marketplaces, the physical spaces signifying the presence of a market economy, did not exist for purely economic reasons but served to exchange information and create social ties as well. The Ancient Maya Marketplace offers concrete links between Maya archaeology, ethnohistory, and contemporary cultures. Its in-depth review of current research will help future investigators to recognize and document marketplaces as a long-standing Maya cultural practice. The volume also provides detailed comparative data for premodern societies elsewhere in the world.

Water and Society II C.A. Brebbia, 2013-09-04 Containing the proceedings of the Second International Conference on the title topic, the book examines issues related to the nature of water, and its use and exploitation by society. Since ensuring an adequate water supply is becoming a critical issue in more and more countries, the conference brings together specialists from the social sciences and humanistic disciplines and the physical and natural sciences, biology, environmental sciences, and health to bridge gaps between the disciplines in addressing the problem. The international, interdisciplinary nature of the conference participants makes it possible to arrive at equitable solutions to the many transnational issues, relating to the rights of states, which arise around water supply. The book discusses: The nature of water; Water as a human right; Water as the source of life; Water in a changing climate; Future water demands and adaptation strategies; Water resources contamination; Water resources management; Irrigation and desertification; Water, sanitation and health; Transnational water rights; Legislation and controls; Lessons to be learnt; Water and disaster management.

Political Participation and Democratic Capability in Authoritarian States Lien Pham, Ance Kaleja, 2023-05 This book provides an innovative theoretical and empirical exploration of the political participation and democratic capability of people living in authoritarian states. Merging perspectives from sociology and political science, the book demonstrates that despite autocratic restrictions on opposition, there is often still leeway for people to express themselves as political agents and to develop democratic capability. The first two chapters problematise political participation and develop an interdisciplinary three-domain framework that allows for critical engagement with and appreciation of the contexts and varied ways in which participatory activities occur. This framework is applied to analyse six country case studies: Singapore, Jordan, Belarus, Cuba, Nigeria, and Vietnam. Drawing on a range of data sources and different analytical entry points, the book

investigates the substantive opportunities people have in exercising political agency and the implications for democratic capability. The book concludes by summarising the emergent themes and examining the potential of applying this method of inquiry in other political contexts. Encompassing both governmental and societal practices, the book offers insights into state-society relations and their role in constructing political values and goals for participation, which people negotiate and mediate to inform their choices, modes, and forms of civic engagement. These insights present a broad approach towards the study of participation, with relevance for understanding political participation in various societies under non-democratic and democratic rule alike. This book will be useful for researchers and students interested in political dynamics and intersections with economic, cultural, and social aspects of development. It will also be beneficial for practitioners interested in participatory actions and social change.
