**Recharge Your Library Programs with Pop Culture and Technology:** Linda D. Behen, 2013-06-17 Learn how to integrate pop culture and technology into school library programs and classrooms, and make today's digital content, mobile devices, and students' changing interests work to the educator's advantage. Today's school libraries need to evolve and meet the needs of 21st-century students—the instruction, programming, and library services must be relevant to today's learners. Additionally, the interactions between educators and the students are what make the critical difference in the students' learning, and turn the library and classroom into places where they will find, assimilate, experience, and understand information. This book provides practical strategies for using pop culture and technology trends to connect with easily distracted middle and high school students and hold their attention. Author Linda D. Behen addresses why school libraries are in transition and why there is a need for dramatic change. She discusses the evolution of all libraries in response to digital content; ubiquitous mobile devices such as smart phones, iPads, and other tablet computers; patrons' changing interests; and the ways in which schools and school libraries have found to effectively adapt to technology changes and student needs. This book is essential for middle and high school librarians and educators, library school students and instructors, and young adult public librarians.

**The Passive Programming Playbook** Paula Willey, Andria L. Amaral, 2021-05-11 This book offers 101 passive programming ideas that are extendable, adaptable, customizable, and above all, stealable—so your passive programming never runs dry. Passive programming is a cheap, quick, fun way to make all library

customers feel like part of the community. It can support reading initiatives, foster family engagement, encourage visit frequency, and coax interaction out of library lurkers-while barely making a dent in your programming budget. Passive programming can be targeted at children, teens, adults, or seniors; used to augment existing programs; and executed in places where staff-led programming can't reach. It can be light-footed, spontaneous, and easily deployed to reflect and respond to current news, media, library events, and even the weather. But even passive programming pros run out of ideas sometimes, and when that happens, they want a fresh, funny source of inspiration.

Schaaf,2021-01-07 Modern fluencies provide a platform for authentic teaching, learning, and assessment While reading, writing, and arithmetic remain important, they are no longer enough. For learners to thrive, they must move beyond traditional literacies to modern fluencies—the unconscious mental processes that are learned, adapted, and applied in the context of real-world problems and challenges. In this book, the authors unpack the fluencies (solution, information, creativity, communication, collaboration, and global citizenship) to reflect the relentless social, cultural, and economic shifts of modern times. Practical resources are presented alongside: Authentic Unit Plan Exemplars for each fluency Assessment rubric examples Discussion questions Learners today must master an entirely different set of essential skills and knowledge needed to succeed than previous generations. Domesticating the Invisible Melissa S. Ragain, 2021-01-12  
*Domesticating the Invisible* examines how postwar notions of form developed in response to newly perceived environmental threats, in turn inspiring artists to model plastic composition on natural systems often invisible to the human eye. Melissa S. Ragain focuses on the history of art education in Cambridge, Massachusetts, to understand how an environmental approach to form inspired new art programs at Harvard and MIT. As they embraced scientific theories of composition, these institutions also cultivated young artists as environmental agents who could influence urban design and contribute to an ecologically sensitive public sphere. Ragain combines institutional and intellectual histories to map how the emergency of environmental crisis altered foundational modernist assumptions about form, transforming questions about aesthetic judgment into questions about an ethical relationship to the environment.
