Coping with Life during the Thirty Years' War (1618-1648) Sigrun Haude,2021-08-30 At its core, Coping with Life during the Thirty Years' War (1618–1648) explores how people tried to survive the Thirty Years' War, on what resources they drew, and how they attempted to make sense of it. A rich tapestry of stories brings to light contemporaries' trauma as well as women and men's unrelenting initiatives to stem the war's negative consequences. Through these close-ups, Sigrun Haude shows that experiences during the Thirty Years' War were much more diverse and often more perplexing than a straightforward story line of violence and destruction can capture. Life during the Thirty Years' War was not a homogenous vale of gloom and doom, but a multifaceted story that was often heartbreaking, yet, at times, also uplifting.

How We Cope with Digital Technology Phil Turner,2022-06-01 Digital technology has become a defining characteristic of modern life. Almost everyone uses it, we all rely on it, and many of us own a multitude of devices. What is more, we all expect to be able to use these technologies straight out the box. This lecture discusses how we are able to do this without apparent problems. We are able to use digital technology because we have learned to cope with it. To cope is used in philosophy to mean absorbed engagement, that is, we use our smart phones and tablet computers with little or no conscious effort. In human-computer interaction this kind of use is more often described as intuitive. While this, of course, is testament to improved design, our interest in this lecture is in the human side of these interactions. We cope with technology because we are familiar with it. We define familiarity as the readiness to engage with technology which arises from being repeatedly exposed to it—often from birth. This exposure involves the frequent use of it and seeing people all around us using it every day. Digital technology has become as common a feature of our everyday lives as the motor car, TV, credit card, cutlery, or a dozen other things which we also use without conscious deliberation. We will argue that we cope with digital technology in the same way as we do these other technologies by means of this everyday familiarity. But this is only half of the story. We also regularly support or scaffold our use of technology. These scaffolding activities are described as epistemic actions which we adopt to make it easier for us to accomplish our goals. With digital technology these epistemic actions include appropriating it to more closely meet our needs. In summary, coping is a situated, embodied, and distributed description of how we use digital technology. Becoming Buoyant: Helping Teachers and Students Cope with the Day to Day Marc Smith,2020-06-03 Becoming Buoyant shows teachers how they can help students to bounce back from daily setbacks and challenges. Drawing on the five main principles of academic buoyancy – confidence, coordination, control, composure and commitment – it investigates the evidence base from which the techniques are drawn and offers practical guidance on applying them in the classroom. Emphasising the role played by internal and external factors, as well as wider school and community influences, the book offers practical guidance on: Choosing and pursuing personal goals Overcoming procrastination Recognising and dealing with anxiety How to use motivation, anxiety and stress management as ways to encourage and nurture self-efficacy. Written by an experienced teacher and chartered psychologist, Becoming Buoyant is essential reading for all teachers that want their students to be resilient and flourish in the classroom.

Adolescent Coping Erica Frydenberg,1997 Adolescence is a time when coping is very important, when many new experiences and responsibilities are thrust upon individuals. Young people need to cope in a variety of settings, including school, home, peer groups and the workplace, and with a range of life problems such as divorce and examinations. Frydenberg provides a clear account of current research and thinking on coping, illustrated by the voices of young people throughout the book. Adolescent Coping focuses on how young people manage a range of life problems, and on the coping styles of particular groups, such as the gifted and those with illness. The author addresses the relationships between coping and age, gender and ethnicity, and between family functioning and coping. She also considers the measurements of coping, how we learn to cope, and such areas as social support and depression.

Spoiling and Coping with Spoilers Galia Golan,Gilead Sher,2019-06-14 For as long as people have been working to bring peace to areas suffering long-standing, violent conflict, there have also been those working to spoil this peace. These spoilers work to disrupt the peace process, and often this disruption takes the form of violence on a catastrophic level. Galia Golan and Gilead Sher offer a broader perspective. They examine this phenomenon by analyzing groups who have spoiled or attempted to spoil peace efforts by political or other nonviolent means. By focusing in particular on the Israeli-Arab conflict, this collection of essays considers the impact of a democratic society operating within a broader context of violence. Contributors bring to light the surprising efforts of negotiators, members of the media, political leaders, and even the courts to disrupt the peace process, and they offer coping strategies for addressing this kind of disruption. Taking into account the multitude of factors that can lead to the breakdown of negotiations, Spoiling and Coping with Spoilers shows how spoilers have been a key factor in Israeli-Arab negotiations in the past and explores how they will likely shape negotiations in the future.

Coping for Capable Kids Leonora M. Cohen, Erica Frydenberg,2006 Giftedness, coping with problems common to gifted kids, teaching for coping, family functioning and coping, coping strategies, coping skills and dealing with concerns and worries.

African American Coping in the Political Sphere Jas M. Sullivan,Moriah Harman,2023-10-01 Psychosocial stressors are a part of the human condition. Individuals experience a myriad of stressors in their everyday lives, and, while many people experience some of the same types of stressors, responses and reactions to stressful life events, interactions, and situations often vary. Research has shown that these stressors often have negative effects on physical and mental health outcomes, among others. Thus, the way one copes with psychosocial stressors is important for explaining human behavior and variations across and within certain groups. For African Americans, there are added stressors that impact daily functioning, due to no fault of their own. These stressors include, but are not limited to, discrimination, microaggressions, and police brutality, as well as income, health, and education inequalities. Inspired by the John Henryism hypothesis and, more broadly, the research on John Henryism, African American Coping in the Political Sphere explores the influence coping has on African Americans' political attitudes and behaviors. Jas M. Sullivan and Moriah Harman reveal that coping plays a role in political outcomes just as it does in social, economic, psychological, and health outcomes. Consequently, coping offers insight into why some individuals believe and behave in the ways that they do in the political sphere.

Coping with Geopolitical Decline Frédéric Mérand, 2020-10-22 How great powers react to their inevitable decline shapes their own destiny as well as the course of international politics. Leaders can decide to engage with others or isolate themselves; to build alliances or initiate war; to stoke up nationalism or invest in innovation; to focus on economic competition or develop their people's soft power. While some of these coping strategies foster cooperation, others provoke conflict with neighbours. In *Coping with Geopolitical Decline* leading political scientists, historians, and sociologists explore the strategies adopted by leaders and domestic elites to prevent, reverse, or deny the decline of their country. Analyzing four European cases (Byzantium, England, France, Russia) before turning to the contemporary debate in the United States, they argue that geopolitics is not fate. Coping strategies depend on the context, which includes cultural representations of decline, the experience of military defeat, and domestic politics. Whether elites choose to modernize their economy, bolster their diplomatic status, or launch preventive war makes a difference in the extent and speed of a country's decline. By the same token, coping strategies affect world order. A well-managed decline allows for a peaceful power transition. Some strategies, however, may preserve the peace at the expense of a country's standing, while others will stave off decline but encourage imperialist adventures or precipitate military conflicts. As the United States challenges the liberal international order, fights back China's ascendancy, and reconsiders its traditional alliances, *Coping with Geopolitical Decline* analyzes key lessons from Europe's experience and provides comparative insight into the likely dynamics of cooperation and conflict in the twenty-first century.

Coping with Chronic Stress Benjamin H. Gottlieb, 2013-11-21 Much of what we know about the subject of coping is based on human behavior and cognition during times of crisis and transition. Yet the alarms and m~or upheavals of life comprise only a portion of those experiences that call for adaptive efforts. There remains a vast array of life situations and conditions that pose continuing hardship and threat and do not promise resolution. These chronic stressors issue in part from persistently difficult life circumstances, roles, and burdens, and in part from the conversion of traumatic events into persisting adjustment challenges. Indeed, there is growing recognition of the fact that many traumatic experiences leave a long-lasting emotional residue. Whether or not coping with chronic problems differs in form, emphasis, or function from the ways people handle acute life events and transitions is one of the central issues taken up in these pages. This volume explores the varied circumstances and experiences that give rise to chronic stress, as well as the ways in which individuals adapt to and accommodate them. It addresses a number of substantive and methodological questions that have been largely overlooked or sidelined in previous inquiries on the stress and coping process.

Redefining Trauma: Understanding and Coping with a Cortisoaked Brain Sarah E. Wright, 2020-05-10 This accessible guide explores how our brains react to stress and offers a fresh perspective on how we define trauma. Probing how the words we use can influence our understanding of distress, this text focuses on expanding awareness of excess stress and reducing judgment of its potential impact on relationships and day-to-day life. Helpfully split into three parts, the book introduces the terms cortisprinkled, cortisaturated, and cortisoaked and provides a rationale for why these states of brain occur. The role of culture and society are highlighted, and an in-depth focus on coping and offering support to others is presented. Whether caused by sexual assault, social rejection, abuse, the taboo of sexuality, disadvantaged status, or other difficulties, chapters detail specific coping skills and step-by-step strategies to deal with a variety of stress responses. Advice is offered on reconnecting with sexuality, phrasing difficult questions, and ways to offer validation, with concrete recommendations on incorporating healthier practices into everyday life. Both metaphor and real-world vignettes are interwoven throughout, making *Redefining Trauma* an essential and understandable resource for therapists and their clients, parents and support givers, and anyone looking to develop practical, informed methods for dealing with stress and trauma and reclaim life with intention.

Coping With Life Stress Alexander V. Libin, Walter Erich Penk, Elena V. Libin, 2022-09-14

The Cambridge Handbook of the Development of Coping Ellen A. Skinner, Melanie J. Zimmer-Gembeck, 2023-06-30 Despite broad interest in how children and youth cope with

stress and how others can support their coping, this is the first Handbook to consolidate the many theories and large bodies of research that contribute to the study of the development of coping. The Handbook's goal is field building - it brings together theory and research from across the spectrum of psychological, developmental, and related sciences to inform our understanding of coping and its development across the lifespan. Hence, it is of interest not only to psychologists, but also to neuroscientists, sociologists, and public health experts. Moreover, work on stress and coping touches many areas of applied social science, including prevention and intervention science, education, clinical practice, and youth development, making this Handbook a vital interdisciplinary resource for parents, teachers, clinical practitioners, social workers, and anyone interested in improving the lives of children.

Dyadic Coping: A Collection of Recent Studies Guy Bodenmann, Mariana K. Falconier, Ashley K. Randall, 2019-09-25 Dyadic coping is a concept that has reached increased attention in psychological science within the last 20 years. Dyadic coping conceptualizes the way couples cope with stress together in sharing appraisals of demands, planning together how to deal with the stressors and engage in supportive or joint dyadic coping. Among the different theories of dyadic coping, the Systemic Transactional Model (STM; Bodenmann, 1995, 1997, 2005) has been applied to many studies on couples' coping with stress. While a recent meta-analysis shows that dyadic coping is a robust and consistent predictor of relationship satisfaction and couple's functioning in community samples, some studies also reveal the significance of dyadic coping in dealing with psychological disorders (e.g., depression, anxiety) or severe illness (e.g., cancer, diabetes, COPD, etc.). Researchers all over the world build their research on this or other concepts of dyadic coping and many typically use the Dyadic Coping Inventory (DCI) for assessing dyadic coping. So far, research on dyadic coping has been systematically presented in two books, one written by Revenson, Kayser, & Bodenmann in 2005, focussing on emerging perspectives on couples' coping, the other by Falconier, Randall, & Bodenmann more recently in 2016, addressing intercultural aspects of dyadic coping in African, American, Asian and European couples. This eBook gives an insight into recent dyadic coping research in different areas and countries.

Coping with Cancer Stress B.A. Stoll, 2012-12-06 The emotional pressures on cancer patients and their families are increasing and traditional supports are decreasing. This book attempts to provide a readable, authoritative and balanced review of the emotional pressures and coping methods of cancer patients, and the help currently available to them. The special problems of children and terminal patients with cancer, and the role of the family in coping, are also examined. A balanced and critical assessment is made of defects in health organisation, training of personnel and attitudes to cancer patients in Western society. A similar assessment is made of the growing tendency to self help, mutual help and group activities for such patients. While each individual needs to select coping aids best suited to his or her own temperament, medical advisors need to make more time available for discussion of technical, emotional, social and sexual problems. The availability of a cancer-treating team makes this feasible. Chapters were invited from physicians, psychiatrists, psychologists and sociologists expert in this field, and they have responded to the challenge of writing in non-technical language. This is so that readership can cross disciplinary boundaries and thus stimulate physicians, nurses, psychologists, sociologists, clergy and others, to satisfy some of the currently unmet needs of cancer patients. The reader may note a small amount of overlap between some chapters, permitted in order to maintain continuity and make each chapter complete in itself.

Coping with Life Stress, volume II Alexander V. Libin, Elena V. Libin, Walter Erich Penk, Nawar Shara, 2024-02-09 This Research Topic is the second volume of the Research Topic Coping With Life Stress. Please see the first volume here. Existing studies on coping with stress and life difficulties are very contradictory. Traditional approaches, while identifying cognitive, emotional, and behavioral aspects of coping, often confuse the modality of the strategy with its functionality and outcome. This conceptual drawback presents quite a few challenges to the study of efficient and inefficient strategies. Perception of the incongruence between modalities (cognitive, emotional, or behavioral) of a particular strategy and its functionality or organizational efforts (efficient vs. inefficient) hinders the development of an integrated methodology for a generalized coping with life stress process. The absence of general principles for classification of efficient and inefficient coping poses methodological as well as practical difficulties in their diagnostics and differentiation, thereby causing additional obstacles in the systematic study of this important phenomenon. The Coping with Life Stress approach is focused on research based on the translation of scientific knowledge regarding problem solving processes into practical applications geared toward improvement of individual life learning, or coping, skills.
