Building a Windows HTPC Terry Walsh, 2014-02-02 Building a Windows Home Theatre PC is We Got Served's definitive guide to planning, building, installing and using a Windows-based home theatre PC. If you're serious about streaming and managing your music and movies collection, then a Home Theatre PC (HTPC) puts you firmly in control. Sure, you can stream media on Connected TVs, Blu-ray players and other receivers but you have limited opportunities to customise and tailor those offerings to your needs, your family's needs and the needs of your home. Depending on your choice, you get these services, miss out on those services and are reliant on a benevolent manufacturer to continue adding new apps and maintaining existing apps. But a HTPC with a small footprint - powerful and silent hardware running slick, easy to manage media center software is not a dream. It's available for you today. Right now. You can build the hardware you want, install the services you prefer and play the media you love. In this 513 page guide, we walk you step by step through creating a first-class, small and mighty HTPC - you'll plan the specifications, components and form factor you need, select the hardware and learn how to assemble a barebones kit (such as our reference build, an Intel NUC HTPC) or build a PC from scratch. From there, we deep dive into maximising performance of your HTPC through tweaking motherboard settings and installing Intel's Rapid Start and Smart Connect management applications. We'll install the latest release of Windows and configure the operating system for HTPC use, tailoring settings to support DTS and Dolby Digital audio, then enhancing video support for Blu-ray disc. With support for Blu-ray on board, you'll be guided through advanced topics like region unlocking and DVD/Blu-ray ripping to a choice of formats, including MKV, BDMV and ISO for streaming in your favourite media center software. We install USB and Network TV Tuners for configuring Live and Recorded TV and use DVBLINK to integrate our channels and EPG into a variety of popular media applications. If you think we're done, then hold on! The guide takes a detailed look at configuring a universal remote control (the Logitech Harmony Hub) for use with our HTPC and look at various ways to download and manage music, video and TV metadata for our media collection. You'll learn the basics of popular file downloaders SABnzbd and uTorrent and we wrap up with a comprehensive review of leading media center packages Plex Media Server and XBMC. Building a Windows Home Theatre PC is packed with tips, tricks and tutorials to help you build a kick-ass home theatre PC that will last you for years to come!

Cancel Cable: How Internet Pirates Get Free Stuff Chris Fehily, 2013-10-19
Neighbors with hand-labeled DVD collections. Teenagers with 5000-song iPods. Entire countries sharing the same copy of Windows. Who are these people? They're file sharers and they account for a third of worldwide internet traffic. Their swag is anything that can be digitized and copied. But file-sharing networks aren't only for pirates. Musicians and writers use them to gauge their popularity. Artists and filmmakers use them to boost recognition. Government employees use them to secretly download WikiLeaks archives. TV producers use them to confirm audience measurements. Politicians and judges use them to make policy and rulings. Traders and marketers use them to spot trends. - Learn how BitTorrent and peer-to-peer networks work. - Set up a BitTorrent client and find files to download. - Open, play, read, or run what you download. - Know the risks of file sharing and avoid fakes, scams, and viruses. Reviews A remarkably calm look at the technical, social, economic and cultural issues arising from file-sharing, and it's also a damned practical guide to navigating the strange world of file-sharing technology. - Cory Doctorow, boingboing.net Chris Fehily won't exactly call [middle-class consumers] suckers, but he will show them -- as well as college students, crackers, digital anarchists and others -- the Pirate Way. - J.D. The Downloader's Handbook, PC Edition David Stevenson, 2006-08 The mass arrival of broadband has caused a revolution on the internet. The major activity online is now the downloading of music and video files. Music download services offer millions of songs for immediate download to users and where music has led, film is about to follow. Nearly all music and film content has now been turned into digital content and is available in some

shape or form online. But where can all this be found? Is it safe to download? And what about the legal issues? These are questions which this book answers. Written in straight-forward language this book is a practical guide to: - Setting up a computer to download files over the internet in a safe environment- What programs to use to download and play music and video files- Where to find free and paid-for media files on the net- Which portable MP3 players to buy- How to navigate around all file-sharing networks- How not be fazed by all the jargon like MP3, OGG and DivX- How to understand the legal position when you download filesThe book is not for computer experts, but for people with ordinary home PCs who want to join the entertainment revolution. Your computer has turned into tomorrow's entertainment center - this book shows you how to take simple control of it. Millions of users globally are online, downloading music and video day in, day out. You can either ignore the revolution, or start downloading now!

Microsoft Windows Media Player 7 Handbook Seth McEvoy,2000 With this comprehensive handbook, readers get one-stop information on how to use new Media Player capabilities and quickly create their own digital music, video and art. Subtitling Through Speech Recognition Pablo Romero-Fresco,2020-09-30 Based on sound research and first-hand experience in the field, Subtitling through Speech Recognition: Respeaking is the first book to present a comprehensive overview of the production of subtitles through speech recognition in Europe.

Topics covered include the origins of subtitling for the deaf and hard of hearing, the different methods used to provide live subtitles and the training and professional practice of respeaking around the world. The core of the book is devoted to elaborating an in-depth respeaking course, including the skills required before, during and after the respeaking process. The volume also offers detailed analysis of the reception of respeaking, featuring information about viewers' preferences, comprehension and perception of respoken subtitles obtained with eye-tracking technology. Accompanying downloadable resources feature a wealth of video clips and documents designed to illustrate the material in the book and to serve as a basis for the exercises included at the end of each chapter. The working language of the book is English, but the downloadable resources also contain sample material in Dutch, French, Galician, German, Italian and Spanish. Subtitling through Speech Recognition: Respeaking is designed for use as a coursebook for classroom practice or as a handbook for self-learning. It will be of interest to undergraduate and postgraduate students as well as freelance and in-house language professionals. It will also find a reading public among broadcasters, cinema, theatre and museum managers, as well as the deaf and members of deaf associations, who may use the volume to support future campaigns and enhance the quality of the speech-to-text accessibility they provide to their members.
