The Upstander Jori Epstein, 2021-03-23 The stench of decay pierced the air aboard the boxcar of trapped Jews. “Why me?” fifteen-year-old Max asked himself, as a convoy rumbled from the Warsaw Ghetto to Majdanek death camp in May 1943. The Nazis had destroyed the Glauben family’s business, upended their rights, and ultimately decimated their neighborhood. The deluge of questions would only intensify after the Nazis murdered Max’s mother, father, and brother. Max channeled grit, determination, and a fortuitous knack for manufacturing airplane parts to outlast six horrific concentration camps in his quest to survive. This memoir explores Max’s mischievous childhood and teen years as a go-to ghetto smuggler. Max journeys from displaced person to American immigrant and Korean veteran. He reveals how he ached as he dared to court love and rear children. For decades, he bottled up his trauma. Then he realized: He could transform his pain into purpose. Infused with raw emotion and vivid detail, historical records and Max’s poignant voice, this memoir relays the true story of the harrowing violence and dehumanization Max endured. It relays Max’s powerful lifetime commitment to actively thwarting hate and galvanizing resilience. Max insists you, too, can transform your adversity into your greatest strength. In the seventy-five years since his liberation, Max has ceased to ask himself, “Why me?” Instead, he reframes his focus, eager to partner with you and ask: “What can we do next?”

TRIPS plus 20 Hanns Ullrich, Reto M. Hilty, Matthias Lamping, Josef Drexl, 2016-01-29 This book examines the impact and shortcomings of the TRIPS Agreement, which was signed in Marrakesh on 15 April 1994. Over the last 20 years, the framework conditions have changed fundamentally. New technologies have emerged, markets have expanded beyond national borders, some developing states have become global players, the terms of international competition have changed, and the intellectual property system faces increasing friction with public policies. The contributions to this book inquire into whether the TRIPS Agreement should still be seen only as part of an international trade regulation, or whether it needs to be understood – or even reconceptualized – as a framework regulation for the international protection of intellectual property. The purpose, therefore, is not to define the terms of an outright revision of the TRIPS Agreement but rather to discuss the framework conditions for an interpretative evolution that could make the Agreement better suited to the expectations and needs of today’s global economy.

Computers and Games Jonathan Schaeffer, Martin Müller, Yngvi Björnsson, 2003-11-20 The Computers and Games (CG) series began in 1998 with the objective of showcasing new developments in artificial intelligence (AI) research that used games as the experimental test-bed. The first two CG conferences were held at Hamamatsu, Japan (1998, 2000). *Computers and Games 2002 (CG 2002)* was the third event in this biennial series. The conference was held at the University of Alberta (Edmonton, Alberta, Canada), July 25–27, 2002. The program consisted of the main conference featuring refereed papers and keynote speakers, as well as several side events including the Games Informatics Workshop, the Agents in Computer Games Workshop, the Trading Agents Competition, and the North American Computer Go Championship. CG 2002 attracted 110 participants from over a dozen countries. Part of the success of the conference was that it was co-located with the National Conference of the American Association for Artificial Intelligence (AAAI), which began in Edmonton just as CG 2002 ended. The CG 2002 program had 27 refereed paper presentations. The papers ranged over a wide variety of AI-related topics including search, knowledge, learning, planning, and combinatorial game theory. Research test-beds included one-player games (blackjack, sliding-tile puzzles, Sokoban), two-player games (Amazons, awari, chess, Chinese chess, clobber, Go, Hex, Lines of Action, Othello, shogi), multi-player games (Chinese checkers, cribbage, Diplomacy, hearts, spades), commercial games (role-playing games, real-time strategy games), and novel applications (Post’s Correspondence Problem).

It first examines several approaches in music information retrieval, in particular general strategies as well as efficient algorithms. The book then introduces a general and unified framework for motion analysis, retrieval, and classification, highlighting the design of suitable features, the notion of similarity used to compare data streams, and data organization.

The Strangest Man Graham Farmelo, 2009-08-25 Paul Dirac was among the great scientific geniuses of the modern age. One of the discoverers of quantum mechanics, the most revolutionary theory of the past century, his contributions had a unique insight, eloquence, clarity, and mathematical power. His prediction of antimatter was one of the greatest triumphs in the history of physics. One of Einstein's most admired colleagues, Dirac was in 1933 the youngest theoretician ever to win the Nobel Prize in physics. Dirac's personality is legendary. He was an extraordinarily reserved loner, relentlessly literal-minded and appeared to have no empathy with most people. Yet he was a family man and was intensely loyal to his friends. His tastes in the arts ranged from Beethoven to Cher, from Rembrandt to Mickey Mouse. Based on previously undiscovered archives, *The Strangest Man* reveals the many facets of Dirac's brilliantly original mind. A compelling human story, *The Strangest Man* also depicts a spectacularly exciting era in scientific history.
