Media Narratives in Popular Music Chris Anderton,Martin James,2021-12-16 The historical significance of music-makers, music scenes, and music genres has long been mediated through academic and popular press publications such as magazines, films, and television documentaries. *Media Narratives in Popular Music* examines these various publications and questions how and why they are constructed. It considers the typically linear narratives that are based on simplifications, exaggerations, and omissions and the histories they construct - an approach that leads to totalizing “official” histories that reduce otherwise messy narratives to one-dimensional interpretations of a heroic and celebratory nature. This book questions the basis on which these mediated histories are constructed, highlights other, hidden, histories that have otherwise been neglected, and explores a range of topics including consumerism, the production pressure behind documentaries, punk fanzines, Rolling Stones covers, and more.

The Logic of American Politics Samuel Kernell,Gary C. Jacobson,Thad Kousser,Lynn Vavreck,2017-02-27 This new edition of the bestselling *The Logic of American Politics* is thoroughly updated and covers the dramatic 2016 election results with a thorough analysis of those results. It arms students with a revised introduction to institutional design that makes concepts such as command, veto, agenda control, voting rules, and delegation easier for students to master and apply, so they clearly see how the American political system was devised and why it works the way it does. Authors Samuel Kernell, Gary C. Jacobson, Thad Kousser, and Lynn Vavreck build students' critical thinking through a simple yet powerful idea: politics is about solving collective action problems. This new edition continues to delve into partisan differences among voters and in government and highlight the increasingly partisan nature of campaigns. By exploring issues such as the Affordable Care Act's troubled implementation, the increasing legalization of marijuana and same-sex marriage in the states, and the debate over immigration, the book illustrates how the institutional structures of government, federalism, and even campaigns can help voters make sense of their choices. The concluding chapter on policymaking examines the noticeable logic that guides American policy, as shown through issues like health care reform, global climate change, and the federal budget. Students glean insights into the sources of policy problems, identify possible solutions, and realize why agreement on those solutions is often so hard to achieve.

Makerspaces in Libraries Theresa Willingham,Jeroen de Boer,2015-08-20 Makerspaces, sometimes also referred to as hackerspaces, hackspaces, and fablabs are creative, DIY spaces where people can gather to create, invent, and learn. Programmatic Advertising Alex Vasileiadis,2020-05-16 Do you want to become an expert in programmatic advertising? If so, this book will help you gain 360-degree knowledge of programmatic media buying and selling. Indeed, by the end of this book, you will have learnt almost everything about how advertisers and publishers can succeed in the programmatic advertising landscape.At the beginning of this book, you will learn how online advertising has evolved over the years, meaning what approaches were followed in the past, what challenges emerged and how those gave rise to the Ad Exchanges, Demand-Side and Supply-Side platforms. Next, I will introduce you to programmatic advertising and more specifically cover what programmatic advertising is, how much this technology has been adopted over the years, what the benefits for publishers and advertisers are as well as which marketing objectives one can achieve through programmatic advertising campaigns. Following that, you will learn which are the twenty main participants in the programmatic advertising ecosystem such as the Ad Exchange, Demand-Side Platform, Supply-Side Platform, Ad Server and Data-Management Platform. How all those participants can work together, the costs of using their services as well as which platform vendors are the most popular ones. Next, I will take you through the different ways of buying media programmatically such as real-time bidding through open and private auctions as well as programmatic direct deals such as preferred and guaranteed deals. You will learn how all those methods work through the use of illustrated examples, their benefits as well as why some methods are becoming more popular than others. Then, you will learn about the six programmatic advertising formats such as the Display, Video, Native, TV, Audio and Digital out-of-home advertising format. I will explain in great detail, how each advertising format differentiates from the rest in terms of audience targeting, ad serving and campaign performance measurement, as well as highlight the benefits they can bring to both advertisers and publishers.Once all those are covered, you will learn all the prospecting and remarketing tactics followed by advertisers, get to know how to create a successful media plan, as well as how an advertiser's media plan is executed with the help of media planners, media buyers, creative designers and ad traffickers. Next, you will learn all the essential and advanced tactics followed by publishers for managing ad inventory, increasing ad viewability, and of course, ad revenues. I will also take you through the ad operations followed by publishers, which typically consist of inventory managers, ad sellers, ad traffickers and yield managers. In the last part of this book, you will learn more about the major challenges advertisers and publishers face in the programmatic advertising landscape, as well as the new developments that will definitely shape the future of programmatic advertising. More specifically, I will start by covering challenges such as the Ad Tech Tax, the risk of price inflations in real-time bidding auctions, ad blockers, and explain how advertisers and publisher can succeed in this complex field. Lastly, you will learn how artificial intelligence, augmented and virtual reality, and blockchain technologies can shape the future of programmatic advertising.

Television in Society Arthur Asa Berger,1987-01-01 Is television a cultural wasteland, or a medium that has brought people more great art, music, dance, and drama than any previous media? How do we study and interpret television? What are the effects of television on individuals and society, and how do we measure them? What is the role of television in our political and economic life? Television in Society explores these issues in considering how television both reflects and affects society. The book is divided into two sections. The first focuses on programming and deals with commercials, ceremonial events, important series (such as MASH and Lou Grant), significant programs (a production of Brave New World on television), and the images of police on the medium. The second part of the book deals with important issues and topics related to the medium: the impact of television violence, values found on television, the impact of television on education, the significance of new technological developments, and the always thorny issue of freedom of the press. The articles are drawn together by a brilliant introductory essay by Arthur Asa Berger, who examines television as culture.

Political Persuasion in Presidential Campaigns Lawrence Patrick Devlin, This work incorporates the insights of many of America's foremost analyst of political campaigns. How to STEM Carol Smallwood,Vera Gubnitskaia,2013-12-05 During the past few years, groups like the President's Council of Advisors on Science and Technology, Center for Education have been placing great emphasis on the significance of STEM (science, technology, engineering, and math) education. In brief, the US is seen as falling behind the rest of the world in science and technology education. In response, the curricula have been revised in many educational institutions and school districts across the country. It is clear that for STEM to be successful, other community organizations, most particularly libraries, need to be closely involved in the process. Library staff realize the importance of getting involved in STEM education, but many have difficulty finding comprehensive information that will help them plan and successfully implement STEM direction in their organization. This book is designed to meet that need. It is timely and relevant. How to STEM: Science, Technology, Engineering, and Math Education in Libraries is by and for libraries who are involved in contributing efforts into advancing these subjects. It is organized in 9 parts including funding, grant writing, community partnerships, outreach, research, and examples of specific programming activities. Authors are drawn from the professional staffs of educational institutions, libraries, and non-profit organizations such as science museums. The book contains eight parts, each emphasizing a different aspect of how to succeed with STEM. Part 1 emphasizes how hands-on activities that are both fun and educational can be used to further STEM awareness. Parts 2 and 3 contain chapters on the uniting of STEM with Information Literacy. Innovative collection development ideas are discussed in Part 4 and Part 5 focuses on research and publishing. Outreach is the theme of Part 6 and the programs described in these chapters offer an array of ways to connect with students of all ages. The final section of How to STEM: Science, Technology, Engineering, and Math Education in Libraries addresses the funding of these programs. Librarians of all types will be pleased to discover easy-to-implement suggestions for collaborative efforts, many rich and diverse programming ideas, strategies for improving reference services and library instruction to speakers of English as a second language, marketing and promotional tips designed to welcome multicultural patrons into the library, and much more.

Selling Electronic Media Ed Shane,1999-02-17 Selling is identifying and satisfying customer needs profitably. Profitable for you, profitable for them. Diane Sutter, President and CEO of Shooting Star Broadcasting , owner of KTAB-TV, Abilene, Texas This is the definition of sales used throughout Ed Shane's comprehensive and timely textbook Selling Electronic Media.
