Digital Labour and Karl Marx Christian Fuchs, 2014-01-03

How is labour changing in the age of computers, the Internet, and social media such as Facebook, Google, YouTube and Twitter? In *Digital Labour and Karl Marx*, Christian Fuchs attempts to answer that question, crafting a systematic critical theorisation of labour as performed in the capitalist ICT industry. Relying on a range of global case studies--from unpaid social media prosumers or Chinese hardware assemblers at Foxconn to miners in the Democratic Republic of Congo--Fuchs sheds light on the labour costs of digital media, examining the way ICT corporations exploit human labour and the impact of this exploitation on the lives, bodies, and minds of workers.

The Evolution of Media Communication Beatriz Peña-

Acuña, 2017-05-31 Media communication is a young discipline, if we compare it with others. It has been studied scientifically from the last century in social sciences. This topic, as it is a human process, is complex, and it is changing because of new technologies. It transforms our society too. It is recognised that we are in a communication society. The management of

knowledge is settled in business area too. Communication skills are recognised as competences in education for preparing future citizens. Media communication feeds from different disciplines and it keeps their attention. This book is an attempt to provide theoretical and empirical framework to better understand media communication from different point of views and channels in various contexts. The international authors are specialised on the issues. They cover a wide range of updated issues. They span from deepening about behaviour of media or trends to national cases related to social net and to new phenomena - as it is mindfulness applied to creativity. So in this book, two sections are presented. The first section focuses on the behaviour of media, when it is applied in education field and reception research. The second section provides three case studies about the Internet: platforms and social nets developed and applied to different publics.

Transitional Justice, Culture, and Society Clara Ramirez-Barat, 2014 Transitional justice processes have a fundamental public dimension: their impact depends in part on the social support they receive. Beyond outreach programs, other initiatives, such as media and cultural interventions, can strengthen--or in some cases undermine--the public resonance of transitional justice. How can media and art be used to engage society in discussions around accountability? How do media influence social perceptions and attitudes toward the legacy of the past? To what extent is social engagement in the public sphere necessary to advance the political transformation that transitional justice measures hope to promote? Examining the roles that culture and society play in transitional justice contexts, this volume focuses on the ways in which communicative practices can raise public awareness of and reflection upon the legacies of mass abuse. -- Publisher's description.

Inventing the Medium Janet H. Murray, 2011-11-23 A foundational text offering a unified design vocabulary and a

common methodology for maximizing the expressive power of digital artifacts. Digital artifacts from iPads to databases pervade our lives, and the design decisions that shape them affect how we think, act, communicate, and understand the world. But the pace of change has been so rapid that technical innovation is outstripping design. Interactors are often mystified and frustrated by their enticing but confusing new devices; meanwhile, product design teams struggle to articulate shared and enduring design goals. With *Inventing the Medium*, Janet Murray provides a unified vocabulary and a common methodology for the design of digital objects and environments. It will be an essential guide for both students and practitioners in this evolving field. Murray explains that innovative interaction designers should think of all objects made with bits—whether games or Web pages, robots or the latest killer apps—as belonging to a single new medium: the digital medium. Designers can speed the process of useful and lasting innovation by focusing on the collective cultural task of inventing this new medium. Exploring strategies for maximizing the expressive power of digital artifacts, Murray identifies and examines four representational affordances of digital environments that provide the core palette for designers across applications: computational procedures, user participation, navigable space, and encyclopedic capacity. Each chapter includes a set of Design Explorations—creative exercises for students and thought experiments for practitioners—that allow readers to apply the ideas in the chapter to particular design problems. *Inventing the Medium* also provides more than 200 illustrations of specific design strategies drawn from multiple genres and platforms and a glossary of design concepts.

Software Takes Command Lev Manovich, 2013-07-04 Offers the first look at the aesthetics of contemporary design from the theoretical perspectives of media theory and 'software studies'.

Web Search: Public Searching of the Web Amanda Spink, Bernard J. Jansen, 2004-07-21 *Web Search: Public*

Searching of the Web, co-authored by Drs. Amanda Spink and Bernard J. Jansen, is one of the first manuscripts that address the human - system interaction of Web searching in a thorough and complete manner. The authors provide an examination of Web searching from multiple levels of analysis, from theoretical overview to detailed study of term usage, and integrate these different levels of analysis into a coherent picture of how people locate information on the Web using search engines. Drawing primarily on their own research and work in the field, the authors present the temporal changes in, the growth of, and the stability of how people interact with Web search engines. Drs. Spink and Jansen present results from an analysis of multiple search engine data sets over a six year period, giving a firsthand account of the emergence of Web searching. They also compare and contrast their findings to the results of other researchers in the field, providing a valuable bibliographic resource. This research is directly relevant to those interested in providing information or services on the Web, along with those who research and study the Web as an information resource. Graduate students, academic and corporate researchers, search engine designers, information architects, and search engine optimizers will find the book of particular benefit.

Routledge Handbook of Media, Conflict and Security

Piers Robinson, Philip Seib, Romy Frohlich, 2016-11-10 This Handbook links the growing body of media and conflict research with the field of security studies. This handbook seeks to consolidate existing knowledge by linking the body of conflict and media studies with work in security studies. The handbook is arranged into five parts: Theory and Principles. Media, the State and War Media and Human Security Media and Policymaking within the Security State New Issues in Security and Conflict and Future Directions For scholars of security studies, this handbook will provide a key point of reference for state of the art scholarship concerning the media-security nexus; for scholars of communication and media studies, the handbook will provide a comprehensive mapping of the media-conflict field.

How Your Mind Can Heal Your Body David R. Hamilton, PHD, 2018-09-11 'This book will teach you that healing by thought alone is not only possible, but it is a reality.' - Dr Joe Dispenza, New York Times bestselling author of Becoming Supernatural There is no longer any doubt that the way we think affects our bodies: countless scientific studies have shown this to be true. For former pharmaceutical scientist Dr David Hamilton, the testing of new drugs highlighted how profoundly the mind and body are connected. Time and time again, the control group of patients in drug trials improved at similar rates to those who actually received the medicines. Astounded, Dr Hamilton decided to change the direction of his work to explore the relationship between the mind and the body. This bestselling acclaimed book was first published 10 years ago. In it, Dr Hamilton explores the effect of visualization, belief and positive thinking on the body, and shows how using our imagination and mental processes can stimulate our own defences and healing systems to combat disease, pain and illness. In this new edition, Dr Hamilton has added four new chapters to discuss the latest cutting-edge information and extraordinary new techniques. These include using imagery to stimulate the immune system - a method that can benefit cancer patients undergoing conventional treatment - effectively using the mind to speed up rehabilitation from stroke, and powerful visualization strategies to help facilitate recovery from injury and illness.

The Power of Religion in the Public Sphere Judith Butler, Jurgen Habermas, Charles Taylor, Cornel West, 2011-03-02 The Power of Religion in the Public Sphere represents a rare

opportunity to experience a diverse group of preeminent philosophers confronting one pervasive contemporary concern: what role does or should religion play in our public lives? Reflecting on her recent work concerning state violence in Israel-Palestine, Judith Butler explores the potential of religious perspectives for renewing cultural and political criticism, while Jürgen Habermas, best known for his seminal conception of the public sphere, thinks through the ambiguous legacy of the concept of the political in contemporary theory. Charles Taylor argues for a radical redefinition of secularism, and Cornel West defends civil disobedience and emancipatory theology. Eduardo Mendieta and Jonathan VanAntwerpen detail the immense contribution of these philosophers to contemporary social and political theory, and an afterword by Craig Calhoun places these attempts to reconceive the significance of both religion and the secular in the context of contemporary national and international politics.

Sex Workers and Their Clients Jerald L. Mosley, 2020-12-15

This book draws on the voices of sex workers and their clients to critically assess the criminalization of prostitution in favour of decriminalization. It does so by contrasting their voices with the claims made by prohibitionists: those advocating the prohibition of prostitution or, at least, the prohibition of the purchase of sexual services, and notes scholarly research that gives context to those accounts and claims. Each chapter is dedicated to a particular issue which is given currency in academic and public debates on sex work. The first part of each chapter reviews the state of research and publicly-aired contentions and the second part compares sex workers' voices with claims from prohibitionists. It highlights the gap between what many sex workers have to say about themselves and what theorizing prohibitionists say about all prostitution. It argues that there is often a striking contrast in attitude, perspective, interpretation and valuation. This book speaks primarily to prohibitionist thinking and sex work stereotyping and, secondarily, to the debate on decriminalization of sex work.
