Digital Storage in Consumer Electronics Thomas M. Coughlin, 2011-08-30 Can you imagine life without your cell phone, laptop, digital camera, iPod, BlackBerry, flat-screen TV, or DVD player? The skyrocketing demand for devices that provide simple, immediate access to large amounts of content is driving required digital storage capacity to unprecedented levels. Designing digital storage into consumer electronics is crucial to the performance and cost of these devices. However, as our requirements for digital content storage grow, so does the formidable difficulty of implementing design solutions that are rugged, long-lasting, power-miserly, secure, network-accessible and can still fit in the palm of your hand! This book provides the background necessary to understand common digital storage devices and media. It helps readers decide which methods of storage work best for which kinds of devices, and then teaches designers how to successfully integrate them into consumer products. * Presents best practices for selecting, integrating, and using storage devices to achieve higher performance, greater reliability and lower cost * Teardown photos provide rare visuals of the guts of the devices discussed * Covers hot topics including flash memory, DVRs, Apple iPods, home networks, and automotive electronics, from basic layouts to standards, advanced features, and exciting growth opportunities

Online Collaborative Translation in China and Beyond Chuan Yu, 2022-11-30 In this original and innovative work, Yu boldly tackles the increasingly influential collaborative translation phenomenon, with special reference to China. She employs the unique perspective of an ethnographer to explore how citizen translators work together as they select, translate, edit and polish translations. Her area of particular interest is the burgeoning yet notably distinctive world of the Chinese internet, where the digital media ecology is with Chinese characteristics. Through her longitudinal digital ethnographic fieldwork in Yeeyan, Cenci and other online translation platforms where the source materials usually come from outside China, Yu draws out lessons for the various actors in the collaborative translation space, focusing on their communities, working practices and identities, for nothing is quite as it seems. She also theorises relationships between the actors, their work and their places of work, offering us a rich and insightful perspective into the often-hidden world of collaborative translation in China. The contribution of Yu's work also lies in her effort in looking beyond China, providing us with a landscape of collaborative translation in practice, in training, and in theory across geographic contexts. This volume will be of particular interest to scholars and postgraduate students in translation studies and digital media.

Mass Media in the 1920s Rebekka Hahn, 2008-06 Seminar paper from the year 2008 in the subject American Studies - Culture and Applied Geography, grade: 1,0, Johannes Gutenberg University Mainz (Fachbereich Angewandte Sprach- und Kulturwissenschaft), course: The Twenties in the United States: Social Change, Popular Culture and Literary Representations, 16 entries in the bibliography, language: English, abstract: The purpose of this paper is to provide a short but comprehensive overview of the new types of media - tabloids, magazines, radio, and motion pictures - that originated in the United States in the 1920s. The emergence of those mass media went along with the emergence of a new mass culture. It is therefore necessary to take a look at the social, economic, and political context of the period at first. Then the various forms of media will be considered individually and examined with regard to their impact, both positive and negative, on American society. In doing so, it will become evident that the press, radio, and cinema of the time did not only reflect but also shape American popular culture towards a cosmopolitan, yet increasingly uniform point of view. The 1920s are commonly depicted as a decade of technological and scientific innovations, prosperity and entertainment, bootleggers and flappers, sports heroes and silent movie stars, hot jazz and the Charleston. Today, these keywords have taken on a rather romantic tinge of adventure. However, it must not be forgotten that the developments and achievements respectively which marked the 1920s were preceded and accompanied by profound social, economic, and cultural changes. Immigration and race, organized crime and prohibition, sexual morality and gender were the crucial issues on top

of the agenda then. The United States experienced a fundamental shift in moral values and patterns of thought as it was moving from a rural, traditionalist culture to a far more permissive urban culture. Before 1900, social and moral standards in the United States were based

Digital Business Veselin Rakocevic, Katarina Stanoevska-Slabeva, Luigi Telesca, 2010-01-13 This volume contains the proceedings of the First International ICST Conference on Digital Business (DigiBiz 2009), hosted by City University London in London, UK. This annual event had the main objective to stimulate and disseminate research results and experimentation on future Digital Business to a wider multidisciplinary forum that would allow the participants to cross the boundaries between research and business. The scientific offering in e-business, e-commerce, and ICT in general is quite broad and spans many different research themes, involving several communities and methodologies. The growth and dynamic nature of these research themes pose both challenges and opportunities. The challenges are in having scientists and practitioners talk to each other: despite the fact that they work on similar problems they often use very different languages in terms of research tools and approaches. The opportunities on the other hand arise when scientists and practitioners engage in multidisciplinary discussions leading to new ideas, projects and products.

Who's Laughing Now? Anna Frey, 2021-02-15 From dour old women to buzzkills who can't take a joke, the stereotype of the humourless feminist has repeatedly been deployed to derail and delegitimize the women's rights movement. This collection skips the tired debates that ask whether feminists can be funny—we know the answer to this already—to instead investigate contemporary expressions and functions of humour within international feminist movements and communities. This interdisciplinary volume showcases critical analyses of cultural texts and events, personal accounts of producing and encountering feminist humour, and creative interruptions that pair laughter with insight. As a whole, this work seeks to sideline caricatures of the humourless feminist by promoting a vision of a diverse movement vibrant with innovative, generous, threatening, and, ultimately, triumphant laughter.

Tencent Min Tang, 2019-07-04 In this book, author Min Tang examines the political economy of the China-based leading global Internet giant, Tencent. Tracing the historical context and shaping forces, the book illuminates Tencent's emergence as a joint creation of the Chinese state and transnational financial capital. Tencent reveals interweaving axes of power on different levels, particularly interactions between the global digital industry and contemporary China. The expansion strategies Tencent has employed—horizontal and vertical integration, diversification and transnationalization—speak to the intrinsic trends of capitalist reproduction and the consistent features of the political economy of communications. The book also pinpoints two emerging and

entangling trends— transnationalization and financialization—as unfolding trajectories of the global political economy. Understanding Tencent’s dynamics of growth helps to clarify the complex nature of China’s contemporary transformation and the multifaceted characteristics of its increasingly globalized Internet industry. This short and highly topical research volume is perfect for students and scholars of of global media, political economy, and Chinese business, media and communication, and society.
