Italian Kisses Rita Esposito Watson,2019 Literary Nonfiction. Italian Studies. Rita Watson's memories of family, traditions, and community reveal what truly nourishes people. At the heart of this book is a wise and gentle grandmother who savored life and taught others how to live with compassion and grace.--Olivia Kate Cerrone The National Organization of Italian American Women (NOIAW) honored Rita at our 2016 Epiphany awards. Her writing has helped preserve the traditions that our Italian parents and grandparents brought to this country.--Anne Marie D'Attelo These stories will hit a familiar chord whether or not you are Italian. Each makes you want to hurry to the next. Wait. Take time to savor the richness and warmth of each. Then read the how-to steps and write your own family memoir.--Ed Iannuccilli European grandmothers share important traits, a love of cooking and a love of family. I'm Armenian and yet, I see my own grandmothers as I read through stories which capture our heritage.--Stephen Kurkjian Reading ITALIAN KISSES as columns gave me a sense of the customs and culture of grandparents from 'the old country.' Now reading these in book form, along with photos and recipes, I feel a part of their rich heritage.--Dr. Mary-Lou Pardue

International Handbook of Virtual Learning Environments Joel Weiss,Jason Nolan,Jeremy Hunsinger,Peter Trifonas,2007-11-24 The International Handbook of Virtual Learning Environments

was developed to explore Virtual Learning Environments (VLE's), and their relationships with digital, in real life and virtual worlds. The book is divided into four sections: Foundations of Virtual Learning Environments; Schooling, Professional Learning and Knowledge Management; Out-of-School Learning Environments; and Challenges for Virtual Learning Environments. The coverage ranges across a broad spectrum of philosophical perspectives, historical, sociological, political and educational analyses, case studies from practical and research settings, as well as several provocative classics originally published in other settings.

Educational Media and Technology Yearbook Robert Maribe Branch, Hyewon Lee, Sheng Shiang Tseng, 2019-11-06 This is Volume 42 of the Educational Media and Technology Yearbook. For the past 40 years, our Yearbook has contributed to the field of Educational Technology in presenting contemporary topics, ideas, and developments regarding diverse technology tools for educational purposes. Our Yearbook has inspired researchers, practitioners, and teachers to consider how to develop technological designs and develop curricula and instruction integrating technology to enhance student learning, teach diverse populations across levels with effective technology integration, and apply technology in interactive ways to motivate students to engage in course content. In addition, Volume 42 features the Virtual Reality (VR) and Augmented Reality (AR) research and educational use cases, organized and coordinated by Vivienne and David. This section provides evidence that the affordances of AR, VR, and mixed reality, defined as an immersive multi-platform experience reality (XR), have begun to make indelible changes in teaching and learning in the United States. XR's recent developments stimulated the editors to propose a special edition to mark the interoperability of immersive technology to push the boundaries of human curiosity, creativity, and problem solving. After years of incremental development, XR has reached a critical level of investment, infrastructure, and emerging production. The chapters included in this section illustrate how XR can push user inquiry, engagement, learning, and interactivity to new levels within physical and digital contexts.

Parenthood and Immigration in Psychoanalysis Marie Rose Moro, Geneviève Welsh, 2022-03-07 This book presents a comprehensive overview of psychoanalytic work with immigrant mothers, fathers, and their children, combining clinical examples and contemporary research to explore ways in which psychoanalysts can work and shape appropriate therapeutic settings. Written by an international range of contributors, from Europe, the US, and the Middle East, the chapters examine how psychoanalysts, especially when they too are immigrants, can best support those in a transcultural situation against the

backdrop of increasing migration from conflict, persecution, war, or poverty. They share a clinical and societal commitment. While showing how the existing literature on immigration focuses rightly on traumatic elements, the chapters in this text also demonstrate how creativity must be considered while shaping a psychoanalytic perspective. The text brings together case material and research to illuminate how the therapeutic and theoretical processes of psychoanalysis, at times combining anthropology and sociology, can lead to the construction of new therapeutic settings mostly for non-Western families in contexts of higher psychopathological risks: neo-natal period, international adoption, and social isolation. Written in a practical, accessible style, *Parenthood and Immigration in Psychoanalysis* is essential reading for practicing psychoanalysts, paediatricians, psychotherapists, and counsellors, as well as researchers and clinicians in a range of fields, including perinatal, sociology, cultural studies, and social work.

Integrated and Holistic Perspectives on Learning, Instruction and Technology J.M. Spector,T.M. Anderson,2007-05-08 One outcome of recent progress in educational technology is strong interest in providing effective support for learning in complex and ill-structured domains. We know how to use technology to promote understanding in simpler domains (e.g., orientation information, procedures with minimal-branching, etc.), but we are less sure how to use technology to support understanding in more complex domains (e.g., managing limited resources, understanding environmental impacts, etc.). Such domains are increasingly significant for society. Technology (e.g., collaborative tele-learning, digital repositories, interactive simulations, etc.) can provide conceptually and functionally rich domains for learning. However, this introduces the problem of determining what works in which circumstances and why. Research and development on these matters is reflected in this collection of papers. This research suggests a need to rethink foundational issues in educational philosophy and learning technology. One major theme connecting these papers is the need to address learning in the large - from a more holistic perspective. A second theme concerns the need to take learners where and as they are, integrating technology into effective learning places. Significant and systematic progress in learning support for complex domains demands further attention to these important issues.

The Everything Guide to Remote Work Jill Duffy,2022-02-08 Discover the secret to being productive and successful no matter where you are with this essential guide to remote work. During COVID-19, working from home became the new normal. Now, both employers and employees find that the remote work they were forced to adjust to may be, well, better—financially, sustainably, and even in terms of overall morale and productivity. But working from home is not without its challenges. It can be

difficult to eliminate distractions, strike a solid work/life balance, and maintain social connections that are crucial in the workplace. Whether you're trying to find and land a job from the comfort of your home, learning to manage a virtual team, or dream of living a digital nomad lifestyle, *The Everything Guide to Remote Work* has everything you need to be successful. You'll learn to optimize your own workplace culture, whether it's in your home office or a constantly changing backdrop. So whether your company continues to work remotely full time or you only have to go to the office a few days a week, you'll be armed with all the tools you'll need to make the most out of this new lifestyle.

E-learning in Tertiary Education Centre for Educational Research and Innovation, Organisation for Economic Co-operation and Development, 2005 E-learning is becoming increasingly prominent in tertiary education. Rationales for its growth are wide-ranging, complex and contested, including widening access, on-campus pedagogic innovation, enhancement of distance learning, organisational change, knowledge-sharing and revenue generation. This report looks at the practice in 19 tertiary education institutions and is designed to elucidate both good practice and international trends. It is organised in three sections: activities and strategies; pedagogy, technology and organisation; cost efficiency and funding.

Memory, Intermediality, and Literature Sara Tanderup Linkis, 2019-04-16 If readers of Sara Tanderup Linkis' *Something to hold on to ...* open the book in the expectation of entering a niche of literature and literary studies, they will leave it after having encountered a new highway in literature. Here, the traditional theme of memory and the most recent use of digital media merge into a new understanding of the role of the book in the contemporary media landscape and of vicissitudes of memorial processes literature, which also offers a broader perspective on literature in human history. Spurred by Sara Tanderup Linkis' sharp eye the readings of texts are lucid, engaging and offers so many ideas that teachers will renew their curricula, and readers will open the internet for more or rush to the library. — Svend Erik Larsen, professor emeritus *Memory, Intermediality, and Literature* investigates how selected literary works use intermedial strategies to represent and perform cultural memory. Drawing on the theoretical perspectives of cultural memory studies, this engaging, reader-friendly monograph examines new materialism and intermediality studies, analyzing works by Alexander Kluge, W.G. Sebald, Jonathan Safran Foer, Anne Carson, Mette Hegnhøj, William Joyce, J.J. Abrams and Doug Dorst. The works emerge out of different traditions and genres, ranging from neo-avant-garde montages through photo-novels and book objects to apps and children's stories. In

this new monograph, Sara Tanderup Linkis presents an interdisciplinary and comparative approach, reading the works together, across genres and decades, and combining the perspectives of memory studies and materialist and media-oriented analysis. This approach makes it possible to argue that the works not only use intermedial strategies to represent memory, but also to remember literature, reflecting on the changing status and function of literature as a mediator of cultural memory in the age of new media. Thus, the works may be read as reactions to modern media culture, suggesting the ways in which literature and memory are affected by new media and technologies – photography and television as well as iPads and social media.
