The Electronic Health Record for the Physician's Office Julie Pepper, 2017-02-12 Get hands-on practice with entering data into the Electronic Health Record! The Electronic Health Record for the Physician's Office, 2nd Edition uses online simulations to walk you through each EHR task. Clear, step-by-step guidelines simplify the exercises in each simulation, so you learn all the EHR skills required of a medical office professional. This edition adds in-depth review and preparation for the Certified Electronic Health Records Specialist (CEHRS) examination. Written by Medical Assisting educator Julie Pepper, this how-to manual helps you master the administrative, clinical, and billing/coding skills you need to gain certification and succeed on the job. Access to SimChart for the Medical Office sold separately. Use of SimChart for the Medical Office (SCMO) for all EHR/practice management applications makes it easier to learn and apply EHR fundamentals. Realistic, hands-on practice helps you develop EHR skills including implementation, HIPAA compliance, troubleshooting, and submitting claims for reimbursement. Safe learning environment allows you to learn and practice tasks without fear of making a mistake affecting real patients. A guided tour through SCMO shows how to use the online simulations and practice EHR tasks. Application exercises in the appendix cover administrative, clinical, and insurance/billing, allowing you to practice the skills learned in the text. Student learning resources on the Evolve companion website include form upload, cases, additional insurance cards, and patient information forms, all providing additional practice. NEW! Enhanced EHR coverage provides in-depth preparation for the CEHRS examination. NEW! CEHRS examination preparation tools are included on Evolve.

Medical Informatics, e-Health Alain Venot,Anita Burgun,Catherine Quantin,2013-09-02 Over the years, medical informatics has matured into a true scientific discipline. Fundamental and applied aspects are now taught in various fields of health, including medicine, dentistry, pharmacy, nursing and public health. Medical informatics is also often included in the curricula of many other disciplines, including the life sciences, engineering and economics. Medical informatics is a complex and rapidly changing discipline. Relatively few books have been published on the subject, and they rapidly become obsolete. This book is the fruit of a collaborative effort between authors teaching medical informatics in France and others who are conducting research in this field. In addition, an international perspective was pursued, as reflected in the inclusion of various developments and actions in both the USA and Europe. This book is divided into 18 chapters, all of which include learning objectives, recommendations for further reading, exercises and bibliographic references.

Transforming Health Care Scheduling and Access Institute of Medicine,Committee on Optimizing Scheduling in Health Care,2015-08-24 According to *Transforming Health Care Scheduling and Access*, long waits for treatment are a function of the disjointed manner in which most health systems have evolved to accommodate the needs and the desires of doctors and administrators, rather than those of patients. The result is a health care system that deploys its most valuable resource--highly trained personnel--inefficiently, leading to an unnecessary imbalance between the demand for appointments and the supply of open appointments. This study makes the case that by using the techniques of systems engineering, new approaches to management, and increased patient and family involvement, the current health care system can move forward to one with greater focus on the preferences of patients to provide convenient, efficient, and excellent health care without the need for costly investment. *Transforming*

Health Care Scheduling and Access identifies best practices for making significant improvements in access and system-level change. This report makes recommendations for principles and practices to improve access by promoting efficient scheduling. This study will be a valuable resource for practitioners to progress toward a more patient-focused How can we help you today? culture.
