Advances in Digital Forensics XII Gilbert Peterson, Sujeet Sheno, 2016-09-19 Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance -- investigations of security breaches yield valuable information that can be used to design more secure systems. Advances in Digital Forensics XII describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues, Mobile Device Forensics, Network Forensics, Cloud Forensics, Social Media Forensics, Image Forensics, Forensic Techniques, and Forensic Tools. This book is the twelfth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty edited papers from the Twelfth Annual IFIP WG 11.9 International Conference on Digital Forensics, held in New Delhi, India in the winter of 2016. Advances in Digital Forensics XII is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities. Gilbert Peterson, Chair, IFIP WG 11.9 on Digital Forensics, is a Professor of Computer Engineering at the Air Force Institute of Technology, Wright-Patterson Air Force Base, Ohio, USA. Sujeet Sheno is the F.P. Walter Professor of Computer Science and a Professor of Chemical Engineering at the University of Tulsa, Tulsa, Oklahoma, USA.

The Closing of the Net Monica Horten, 2016-05-18 This inspirational book provides the backstory to current attempts by states and corporations to control the Internet. It explains key issues such as privacy, net neutrality and copyright in a way that is accessible to non-experts, as well as providing a clear, authoritative context for academic study. The Closing of the Net explains: •Why apps are never 'free', and how data profiling got into politics •How the entertainment industries went head-to-head with Internet companies over online copyright •Why we got the GDPR (General Data Protection Regulation) and why Europe has stronger privacy laws than the US •How post-Snowden surveillance politics is embedded in data retention law •Why net neutrality matters •How cloud service Megaupload was brought down Monica Horten's compelling account of these issues concludes with an outline of the risks we face in the future if monitoring and blocking of the Internet becomes the norm. And the results are chilling. This book is a must-read for all followers of cyber-policy, and is suitable for courses addressing digital media and society, communications policy, Internet and copyright

law.

Innovation Policy and the Economy 2013 Josh Lerner, Scott Stern, 2014-04-04 Appreciation of the importance of innovation to the economy has increased over the past decade. There is an active debate regarding the implications of technological change for economic policy and the appropriate policies and programs regarding research, innovation, and the commercialization of new technology. This debate has only intensified as policymakers focus on new sources of innovation and growth in light of the recent economic downturn and the associated focus on enhancing employment and growth. Four of the five papers in this year's volume highlight the increasing role of the Internet and digitization in our understanding of the changing nature of innovation and entrepreneurship, and the impact of innovation policy. The first offers an overview of the impact of "Big Data" on the ability to conduct novel types of measurement and research in economics and related fields. The second highlights the increasingly sophisticated and creative research designs that have been used to evaluate the interplay between piracy, the availability of legitimate digital channels, and the impact of anti-piracy enforcement efforts. The third paper provides an overview of the rapidly emerging area of crowdfunding. The fourth addresses the underpinnings of much of the digital economy by focusing on the institutional logic of standard-setting organizations and the conditions that allow standard-setting bodies to function and achieve their objectives. The final paper focuses on the interplay between geographic clusters, entrepreneurship, and innovation.

Legal Principles for Combatting Cyberlaundering Daniel Adeoyé Leslie, 2014-07-18 This volume deals with the very novel issue of cyber laundering. The book investigates the problem of cyber laundering legally and sets out why it is of a grave legal concern locally and internationally. The book looks at the current state of laws and how they do not fully come to grips with the problem. As a growing practice in these modern times, and manifesting through technological innovations, cyber laundering is the birth child of money laundering and cybercrime. It concerns how the internet is used for 'washing' illicit proceeds of crime. In addition to exploring the meaning and ambits of the problem with concrete real-life examples, more importantly, a substantial part of the work innovates ways in which the dilemma can be curbed legally. This volume delves into a very grey area of law, daring a yet unthreaded territory and scouring undiscovered paths where money laundering, cybercrime, information technology and international law converge. In addition to unearthing such complexity, the hallmark of this book is in the innovative solutions and dynamic remedies it postulates.

Internet Book Piracy Gini Graham Scott, 2016-03-22 The international battle against Internet pirates has been heating up.

Increasingly law enforcement is paying attention to book piracy as ebook publishing gains an ever-larger market share. With this threat to their health and even survival, publishers and authors must act much like the music, film, and software giants that have waged war against pirates for the past two decades. Now, *The Battle against Internet Piracy* opens a discussion on what happens to the victims of piracy. Drawing from a large number of interviews—from writers, self-publishers, mainstream publishers, researchers, students, admitted pirates, free speech advocates, attorneys, and local and international law enforcement officials—the text speaks to such issues as: •Why pirates have acted and how they feel about it •The conflict over constitutional rights and piracy •The current laws surrounding Internet piracy •Examples of cases taken against some pirates •Alternatives to piracy •Personal experiences of being ripped off •The ways piracy affects different industries and how they've responded Author Gini Graham Scott prepares readers to arm themselves against these modern perils by learning about copyright, infringement, and how to prevent, combat, and end book piracy. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

Black 9/11 Mark Gaffney, 2016-09-01 The weeks following the attacks of September 11, 2001, were traumatic for nearly every American, but for some, the answers they received from the media and the government to explain the horrific events was not satisfactory. Accusations of cover-ups, internal plots, and sabotage from within the ranks of the U.S. government were—and continue to be—not uncommon. But compelling evidence contrary to the accepted narrative has, for some skeptics, been lacking. This investigation into the events of that day reveals dark secrets about United States-sponsored terrorism. Taking highly complex technical and scientific information, and distilling it for the consumption of the lay person, this inquiry attempts to reveal the truth behind that infamous day.

Disorder and the Disinformation Society Jonathan Paul Marshall, James Goodman, Didar Zowghi, Francesca da Rimini, 2015-04-17 This book is the first general social analysis that seriously considers the daily experience of information disruption and software failure within contemporary Western society. Through an investigation of informationalism, defined as a contemporary form of capitalism, it describes the social processes producing informational disorder. While most social theory sees disorder as secondary, pathological or uninteresting, this book takes disordering processes as central to social life. The book engages with theories of information society which privilege information order, offering a strong counterpoint centred on disinformation. *Disorder and the Disinformation Society* offers a practical agenda, arguing that difficulties in producing software are both inherent to the process of developing software and in the social dynamics of informationalism. It outlines the dynamics of software failure as they impinge on information workers and on daily life, explores why computerized finance has become inherently self-disruptive, asks how digital enclosure and intellectual property create conflicts over cultural creativity and disrupt informational accuracy and scholarship, and reveals how social media can extend, but also distort, the development of social movements.

Trust in International Police and Justice Cooperation Saskia Hufnagel, Carole McCartney, 2017-01-26 The use of extra-territorial

intelligence is growing among security, border, and public agencies. Internationally, rapidly evolving efforts to tackle transnational crime entail the exchange of intelligence across jurisdictions and state borders as well as the 'linking' of law enforcement operations. This book provides a number of different perspectives from across Europe, Australasia and Canada to examine recent cooperation experiences and the challenges faced in practice. The book brings together scholars from a range of legal and criminological fields to examine the legal imperatives and social parameters that shape international police and justice cooperation and highlights the importance of both trust and clear legal rules to ensure effective cooperation. It focuses on areas where cooperation is now mandated, but where significant issues are raised, including the international and regional methods of information and intelligence exchange and challenges to human rights protection; the coordination of international and regional exchange of evidence, such as forensic bioinformation; police cooperation in international investigations and the added value of formalising investigative strategies across jurisdictions regionally and internationally and the operation, accountability and legitimacy of organisations and institutions of 'cooperation' in law enforcement and specific international policing 'missions'.

The 18 full and 12 poster papers presented were carefully reviewed and selected from 84 submissions. Film Policy in a Globalised Cultural Economy John Hill, Nobuko Kawashima, 2018-12-07 The past two decades have witnessed major changes in film industries worldwide in response to both economic globalisation and technological developments. The dominant position of Hollywood movies in the global film market has remained largely uncontested, but Hollywood itself has become increasingly international in its operations whilst 'regional' screen industries such as those in East Asia and in the Indian subcontinent have (re-)emerged and developed new forms of collaboration. The advent of digital technologies has also transformed the content of films and the ways in which they are made and consumed. Such changes, in turn, have posed new economic and cultural challenges for policy-makers around the world and led to a degree of rethinking of how film policy objectives are to be conceived, defined and implemented. This collection brings together a range of international scholars from the USA, Europe and Asia to consider how film policy has responded to the various economic, technological and political shifts shaping the global film industry; and to identify the many tensions between global and local, economic and cultural, and public and private policy objectives that have been the result of these changes. This book was originally published as a special issue of the International Journal of Cultural Policy.
