Encyclopedia of KISS Brett Weiss,2017-08-11 The self-proclaimed Hottest Band in the World, KISS is one of the most popular groups in the history of rock, having sold more than 100 million albums during their more than 40-year reign. With more gold albums than any other American band, they were inducted into the Rock and Roll Hall of Fame in 2014. KISS influenced a generation of musicians, from Garth Brooks and Motley Crue to Nirvana and the Red Hot Chili Peppers. The original leather-clad, makeup-wearing line-up--Ace Spaceman Frehley, Gene Demon Simmons, Paul Starchild Stanley and Peter Catman Criss--and their classic hits Beth and Rock and Roll All Nite are forever etched in pop culture consciousness. This encyclopedia of all things KISS provides detailed information on their songs, albums, tours, television and movie appearances, merchandise, solo work and much more, including replacement members Eric Carr, Vinnie Vincent, Bruce Kulick, Mark St. John, Eric Singer and Tommy Thayer.

Textile Technology and Design Deborah Schneiderman,Alexa Griffith Winton,2016-01-28 Textile Technology and Design addresses the critical role of the interior at the intersection of design and technology, with a range of interdisciplinary arguments by a wide range of contributors: from design practitioners to researchers and scholars to aerospace engineers. Chapters examine the way in which textiles and technology – while seemingly distinct – continually inform each other through their persistent overlapping of interests, and eventually coalesce in the practice of interior design. Covering all kinds of interiors from domestic (prefabricated kitchens and 3D wallpaper) to extreme (underwater habitats and space stations), it features a variety of critical aspects including pattern and ornament, domestic technologies, craft and the imperfect, gender issues, sound and smart textiles. This book is essential reading for students of textile technology, textile design and interior design.

The Geometry Code Bruce Rawles,2012-04 Integrate practical insights from modern physics, ancient Hermetic Laws, non-dual meta-physics, transpersonal psychology, and humor, as tools for undoing conflicting beliefs we've dreamed ourselves into. The seven Hermetic laws are explored in depth and demonstrate how a mindfulness that embraces 'other' as 'self' can reverse the typical misapplication of these inescapable laws of Mentalism, Correspondence, Vibration, Polarity, Rhythm, Cause & Effect and Generation. Ubiquitous geometric symbols, paired to each of these laws - the circle, vesica piscis, sine wave, line, spiral, fractal and yin-yang - and their countless commonplace variations, seen from the vantage point of shared interests, reflect these ideas. The inspired use of natural law restores attributes of life, love, strength, purity, beauty, perfection and gratitude to our awareness.

Wallpapers in Historic Preservation Catherine Lynn,1977 The papered and bordered wall was an important feature of American interiors during the 18th, 19th, and early 20th centuries. Paper hangings, both imported and of domestic manufacture, were more widely used than many of our restored buildings might lead us to believe. This book attempts to catalog and describe the variety, as well as accounting for restoration and preservation of pieces as part of the historical record. --Amazon.

The Complete Idiot's Guide to the Sun Jay M. Pasachoff, 2003 No Marketing Blurb

Revolutionary Wealth Alvin Toffler, Heidi Toffler, 2007-06-12 Since the mid-1960s, Alvin and Heidi Toffler have predicted the far-reaching impact of emerging technological, economic, and social developments on our businesses, governments, families, and daily lives. In *REVOLUTIONARY WEALTH*, they once again demonstrate their unparalleled ability to illuminate current trends and anticipate what they mean for the future. *REVOLUTIONARY WEALTH* focuses on how wealth will be created—and who will get it—in the twenty-first century. As the knowledge-based economy (a reality the Tofflers predicted forty years ago) continues to replace the industrial-based economy, they argue, money is no longer the sole determinate of wealth. The Tofflers explain that we are becoming a nation of “prosumers,” consuming what we ourselves produce, and argue that we have all taken on “third jobs”—work we unwittingly do without pay for some of the biggest corporations in the country. Using fascinating examples from our daily lives, they illustrate how our everyday activities—from parenting and volunteering to blogging, painting our houses, and improving our diets—contribute to a non-monetary economy that is largely hidden from economists. Writing with the same insight and clarity that made their earlier books bestsellers, the Tofflers present fresh, groundbreaking new ways of thinking about wealth.

Sacred Geometry Design Sourcebook Bruce Rawles, 2011-07-28 This 256 page resource has 221 full page black and white line art graphic images. The ready-to-use templates teach by whole brain play and creative exploration, with over 1300 smaller images surrounding the central full page image on each page, providing examples of countless variations for the creative explorer of this art form and science. In addition to a large collection of 2-dimensional patterns, a coloring book for kids of all ages, there are 27 3-dimensional fold-up patterns which make it easier than ever before to create exquisite shapes revered by pioneers such as Plato, Pythagoras, and Leonardo daVinci. There is a brief introductory section on the philosophical perspective of universal proportions and symbols. The book also has extensive tables, World Wide Web links and bibliographic references for those whose interest and curiosity has been sparked by the hands-on, experiential majority of the book. It is a reference for serious students of geometry and its omnipresent purpose. This is a newer, perfect bound version of the book which has also been available in a spiral-bound version since 1997.

The Screen Strong Solution Melanie Hempe, 2019-05-16 Yesterday, our kids were dressing up in princess costumes and tracking mud in the house. Today, they are lost in a virtual world, obsessed with video games, social media, and smartphones. As a result, kids are getting hurt. They have become more stressed, anxious, and depressed. And families are being pulled apart. But it's not too late to win back your kids. In *The Screen Strong Solution*, you will learn how to free your child from screen addiction and obsession. Based on scientific research and authentic experiences, Melanie Hempe, RN by trade and mother of four, lays out the step-by-step game plan you'll need to reclaim your kids and reconnect your family. You'll learn why your child craves screen time, what building blocks are necessary for healthy development, how to nurture the most important relationships in your child's life, and how to replace the digital world with the real one. Today is the day to rethink the screens in your home, reclaim your kids, and reconnect your family.

Current Perspectives in Contaminant Hydrology and Water Resources Sustainability Paul Bradley, 2013-02-27 Human society depends on liquid freshwater resources to meet drinking, sanitation and hygiene, agriculture, and industry needs. Improved resource monitoring and better understanding of the anthropogenic threats to freshwater environments are critical to efficient management of freshwater resources and ultimately to the survival and quality of life of the global human population. This book helps address the need for improved freshwater resource monitoring and threat assessment by presenting current reviews and case studies focused on the fate and transport of contaminants in the environment and on the sustainability of groundwater and surface-water resources around the world. It is intended for students and professionals working in hydrology and water resources management.

Screen Genealogies Craig Buckley, Rudiger Campe, Francesco Casetti, 2019-11-15 Against the grain of the growing literature on screens, **Screen Genealogies** argues that the present excess of screens cannot be understood as an expansion and multiplication of the movie screen nor of the video display. Rather, screens continually exceed the optical histories in which they are most commonly inscribed. As contemporary screens become increasingly decomposed into a distributed field of technologically interconnected surfaces and interfaces, we more readily recognize the deeper spatial and environmental interventions that have long been a property of screens. For most of its history, a screen was a filter, a divide, a shelter, or a camouflage. A genealogy stressing transformation and descent rather than origins and roots emphasizes a deeper set of intersecting and competing definitions of the screen, enabling new thinking about what the screen might yet become.

Highlights of Spanish Astrophysics V Jose M. Diego, Luis J. Goicoechea, J. Ignacio González-Serrano, Javier Gorgas, 2010-03-18 Astronomy is a scienti?c

discipline that has developed a rapid and impressive growth in Spain. Thirty years ago, Spain occupied a purely anecdotal presence in the international context, but today it occupies the eighth position in the world in publication of astronomical articles, and, among other successes, owns and operates ninety per cent of the world's largest optical telescope GTC (Gran Telescopio Canarias). The Eighth Scientific Meeting of the Spanish Astronomical Society (Sociedad Española de Astronomía, SEA), held in Santander in July 7–11 2008, whose proceedings are in your hands, clearly shows the enthusiasm, motivation and quality of the present Spanish astronomical community. The event brought together 322 participants, who represent almost 50% of Spanish professional astronomers. This percentage, together with the continuously increasing, with respect to previous SEA meetings, number of oral presentations and poster contributions (179 and 127 respectively), confirms that the SEA conferences have become a point of reference to assess the interests and achievements of astrophysical research in Spain. The most important and current topics of modern Astrophysics were taken into account at the preliminary meeting, as well as the number and quality of participants and their contributions, to select the invited speakers and oral contributors. We took a week to enjoy the high quality contributions submitted by Spanish astronomers to the Scientific Organizing Committee. The selection was difficult. We wish to acknowledge the gentle advice and commitment of the SOC members.

Hold Your Own Kae Tempest, 2015-03-10 From playwright, novelist, spoken-word star, and the youngest-ever winner of the Ted Hughes Award, an electrifying poem-sequence based on the myth of the gender-switching prophet Tiresias. My heart throws its head against my ribs, / it's denting every bone it's venting something it has known since I arrived and felt it beat. Walking in the forest one morning, a young man disturbs two copulating snakes--and is punished by the goddess Hera, who turns him into a woman. So begins *Hold Your Own*, a riveting tale of youth and experience, wealth and poverty, sex and love, that draws ancient figures into a fiercely contemporary vision. Weaving elements of classical myth, autobiography and social commentary, Tempest uses the story of the blind, clairvoyant Tiresias to create four sequences of poems, addressing childhood, manhood, womanhood, and late life. The result is a rhythmically hypnotic tour de force--and a hugely ambitious leap forward for one of the most broadly talented and compelling young writers today.
