Policing Democracy Mark Ungar, 2020-03-03 2011 Winner of the Charles H. Levine Memorial Book Prize of the International Political Science Association Latin America's crime rates are astonishing by any standard—the region's homicide rate is the world's highest. This crisis continually traps governments between the need for comprehensive reform and the public demand for immediate action, usually meaning iron-fisted police tactics harking back to the repressive pre-1980s dictatorships. In *Policing Democracy*, Mark Ungar situates Latin America at a crossroads between its longstanding form of reactive policing and a problem-oriented approach based on prevention and citizen participation. Drawing on extensive case studies from Argentina, Bolivia, and Honduras, he reviews the full spectrum of areas needing reform: criminal law, policing, investigation, trial practices, and incarceration. Finally, *Policing Democracy* probes democratic politics, power relations, and regional disparities of security and reform to establish a framework for understanding the crisis and moving beyond it.

**Primary Immunodeficiency Diseases** Nima Rezaei, Asghar Aghamohammadi, Luigi D. Notarangelo, 2016-11-30 The number of diagnosed cases of primary immunodeficiency diseases (PIDs) – a group of inborn disorders of the immune system – is growing rapidly, but misdiagnosis or late diagnosis still occurs in a significant number of patients, with serious consequences. This is the second edition of a practical reference textbook on PIDs that has been widely welcomed by scientists and clinicians from around the world. The new edition has been extensively revised to reflect advances in knowledge and includes various PIDs not previously covered. For each disease, information is provided on definition, etiology, clinical manifestations, diagnosis, and management. This book will represent an ideal resource for specialists when engaging in diagnosis, clinical decision-making, and treatment planning. It will also prove invaluable for doctors in training and other physicians and nurses who wish to learn more about PIDs.

**Empire of Magic** Geraldine Heng, 2003 *Empire of Magic* offers a genesis and genealogy for medieval romance and the King Arthur legend through the history of Europe's encounters with the East in crusades, travel, missionizing, and empire formation. It also produces definitions of race and nation for the medieval period and posits that the Middle Ages and medieval fantasies of race and religion have recently returned. Drawing on feminist and gender theory, as well as cultural analyses of race, class, and colonialism, this provocative book revises our understanding of the beginnings of the nine hundred-year-old cultural genre we call romance, as well as the King Arthur legend. Geraldine Heng argues that romance arose in the twelfth century as a cultural response to the trauma and horror of taboo acts—in particular the cannibalism committed by crusaders on the bodies of Muslim enemies in Syria during the First Crusade. From such encounters with the East, Heng suggests, sprang the fantastical episodes featuring King Arthur in Geoffrey of Monmouth's chronicle *The History of the Kings of England*, a work where history and fantasy collide and merge, each into the other, inventing crucial new examples and models for romances to come. After locating the rise of romance and Arthurian legend in the contact zones of East and West, Heng demonstrates the adaptability of romance and its key role in the genesis of an English national identity. Discussing Jews, women, children, and sexuality in works like the romance of Richard Lionheart, stories of the saintly Constance, Arthurian chivalric literature, the legend of Prester John, and travel narratives, Heng shows how fantasy enabled audiences to work through issues of communal identity, race, color, class and alternative sexualities in socially sanctioned and safe modes of cultural discussion in which pleasure, not anxiety, was paramount. Romance also engaged with the threat of modernity in the late medieval period, as economic, social, and technological transformations occurred and awareness grew of a vastly enlarged world beyond Europe, one encompassing India, China, and Africa. Finally, Heng posits, romance locates England and Europe within an empire of magic and knowledge that surveys the world and makes it intelligible—usable—for the future. *Empire of Magic* is expansive in scope, spanning the eleventh to the fifteenth centuries, and detailed in coverage, examining various types of romance—historical, national, popular, chivalric, family, and travel romances, among others—to see how cultural fantasy responds to changing crises, pressures, and demands in a number of different ways. Boldly controversial, theoretically sophisticated, and historically rooted, *Empire of Magic* is a dramatic restaging of the role romance played in the culture of a period and world in ways that suggest how cultural fantasy still functions for us today.

**Pro Full-Text Search in SQL Server 2008** Hilary Cotter, Michael Coles, 2009-01-29 Businesses today want actionable insights into their data—they want their data to reveal itself to them in a natural and user-friendly form. What could be more natural than human language? Natural-language search is at the center of a storm of ever-increasing web-driven demand for human-computer communication and information access. SQL Server 2008 provides the tools to take advantage of the features of its built-in enterprise-level natural-language search engine in the form of integrated full-text search (iFTS). iFTS uses text-aware relational queries to provide your users with fast access to content. Whether you want to set up an enterprise-wide Internet or intranet search engine or create less ambitious natural-language search applications, this book will teach you how to get the most out of SQL Server 2008 iFTS: Introducing powerful iFTS features in SQL Server, such as the FREETEXT and CONTAINS predicates, custom thesauruses, and stop lists Showing you how to optimize full-text query performance through features like full-text indexes and iFilters Providing examples that help you understand and apply the power of iFTS in your daily projects

NanoBioMedicine Shailendra K. Saxena, S. M. Paul Khurana, 2020-02-03 This book provides a comprehensive overview of the recent trends in various Nanotechnology-based therapeutics and challenges associated with its development. Nanobiotechnology is an interdisciplinary research that has wide applications in the various fields of biomedical research. The book discusses the various facets of the application of Nanotechnology in drug delivery, clinical diagnostics, Nanomedicine and treatment of infectious and chronic diseases. The book also highlights the recent advancements on important devices and applications that are based on Nanotechnology in medicine and brief the regulatory and ethical issues related to nanomedical devices. It also reviews the toxicological profile of various nanomaterials and emphasizes the need for safe nanomaterials for clinical use. Finally, the book discusses the recent developments of potential commercial applications of Nanotechnology.

**A History of Knowledge** Charles Van Doren, 1992-03-17 A one-volume reference to the history of ideas that is a compendium of everything that humankind has thought, invented, created, considered, and perfected from the beginning of civilization into the twenty-first century. Massive in its scope, and yet totally accessible, *A HISTORY OF KNOWLEDGE* covers not only all the great theories and discoveries of the human race, but also explores the social conditions, political climates, and individual men and women of genius that brought ideas to fruition throughout history. Crystal clear and concise...Explains how humankind got to know what it knows. Clifton Fadiman Selected by the Book-of-the-Month Club and the History Book Club

Transforming Agriculture in Southern Africa Richard A. Sikora, Eugene R. Terry, Paul L.G. Vlek, Joyce Chitja, 2019-11-27 This book provides a synthesis of the key issues and challenges facing agriculture and food production in Southern Africa. Southern Africa is facing numerous challenges from diverse issues such as agricultural transformations, growing populations, urbanization and climate change. These challenges place great pressure on food security, agriculture, water availability and other natural resources, as well as impacting biodiversity. Drawing on case studies from Lesotho, Malawi, Mozambique, Namibia, South Africa, Swaziland, Tanzania, Zambia and Zimbabwe, the chapters in this book consider these challenges from an interdisciplinary perspective, covering

key areas in constraints to production, the most important building blocks of good farming practices, and established and emerging technologies. This book will be a valuable support for informing new policies and processes aimed at improving food production and security and developing sustainable agriculture in Southern Africa. This informative volume will be key reading for those interested in agricultural science, African studies, rural studies, development studies and sustainability. It will also be a valuable resource for policymakers, governmental and nongovernmental organizations, and agricultural practitioners. In 2014 he received an AC for services ‘as a leading intellectual in Australian public life’. *What Is to Be Done* was published by Scribe in 2020.

**Handbook of Postcolonial Archaeology** Jane Lydon, Uzma Z Rizvi, 2016-07 This essential handbook explores the relationship between the postcolonial critique and the field of archaeology, a discipline that developed historically in conjunction with European colonialism and imperialism. In aiding the movement to decolonize the profession, the contributors to this volume—themselves from six continents and many representing indigenous and minority communities and disadvantaged countries—suggest strategies to strip archaeological theory and practice of its colonial heritage and create a discipline sensitive to its inherent inequalities. Summary articles review the emergence of the discipline of archaeology in conjunction with colonialism, critique the colonial legacy evident in continuing archaeological practice around the world, identify current trends, and chart future directions in postcolonial archaeological research. Contributors provide a synthesis of research, thought, and practice on their topic. The articles embrace multiple voices and case study approaches, and have consciously aimed to recognize the utility of comparative work and interdisciplinary approaches to understanding the past. This is a benchmark volume for the study of the contemporary politics, practice, and ethics of archaeology. Sponsored by the World Archaeological Congress

*Art That Changed the World* DK, 2013-10-01 Experience the uplifting power of art on this breathtaking visual tour of 2,500 paintings and sculptures created by more than 700 artists from Michelangelo to Damien Hirst. This beautiful book brings you the very best of world art from cave paintings to Neoexpressionism. Enjoy iconic must-see works, such as Leonardo da Vinci's Last Supper and Monet's Waterlilies and discover less familiar artists and genres from all parts of the globe. *Art That Changed the World* covers the full sweep of world art, including the Ming era in China, and Japanese, Hindu, and Indigenous Australian art. It analyses recurring themes such as love and religion, explaining key genres from Romanesque to Conceptual art. *Art That Changed the World* explores each artist's key works and vision, showing details of their technique, such as Leonardo's use of light and shade. It tells the story of avant-garde works like Manet's *Le Dejeuner sur l'herbe* (Lunch on the Grass), which scandalized society, and traces how one genre informed another - showing how the Impressionists were inspired by Gustave Courbet, for example, and how Van Gogh was influenced by Japanese prints. Lavishly illustrated throughout, look no further for your essential guide to the pantheon of world art.

**The Ethics of Cybersecurity** Markus Christen, Bert Gordijn, Michele Loi, 2020-02-10 This open access book provides the first comprehensive collection of papers that provide an integrative view on cybersecurity. It discusses theories, problems and solutions on the relevant ethical issues involved. This work is sorely needed in a world where cybersecurity has become indispensable to protect trust and confidence in the digital infrastructure whilst respecting fundamental values like equality, fairness, freedom, or privacy. The book has a strong practical focus as it includes case studies outlining ethical issues in cybersecurity and presenting guidelines and other measures to tackle those issues. It is thus not only relevant for academics but also for practitioners in cybersecurity such as providers of security software, governmental CERTs or Chief Security Officers in companies.

**The Future of Computing Performance** National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee on Sustaining Growth in Computing Performance, 2011-04-21 The end of dramatic exponential growth in single-processor performance marks the end of the dominance of the single microprocessor in computing. The era of sequential computing must give way to a new era in which parallelism is at the forefront. Although important scientific and engineering challenges lie ahead, this is an opportune time for innovation in programming systems and computing architectures. We have already begun to see diversity in computer designs to optimize for such considerations as power and throughput. The next generation of discoveries is likely to require advances at both the hardware and software levels of computing systems. There is no guarantee that we can make parallel computing as common and easy to use as yesterday's sequential single-processor computer systems, but unless we aggressively pursue efforts suggested by the recommendations in this book, it will be game over for growth in computing performance. If parallel programming and related software efforts fail to become widespread, the development of exciting new applications that drive the computer industry will stall; if such innovation stalls, many other parts of the economy will follow suit. *The Future of Computing Performance* describes the factors that have led to the future limitations on growth for single processors that are based on complementary metal oxide semiconductor (CMOS) technology. It explores challenges inherent in parallel computing and architecture, including ever-increasing power consumption and the escalated requirements for heat dissipation. The book delineates a research, practice, and education agenda to help overcome these challenges. *The Future of Computing*

Performance will guide researchers, manufacturers, and information technology professionals in the right direction for sustainable growth in computer performance, so that we may all enjoy the next level of benefits to society.
