**Shakespeare: Invention of the Human** Harold Bloom, 1999-09-01 The indispensable critic on the indispensable writer. -Geoffrey O'Brien, New York Review of Books A landmark achievement as expansive, erudite, and passionate as its renowned author, this book is the culmination of a lifetime of reading, writing about, and teaching Shakespeare. Preeminent literary critic and ultimate authority on the western literary tradition, Harold Bloom leads us through a comprehensive reading of every one of the dramatist's plays, brilliantly illuminating each work with unrivaled warmth, wit and insight. At the same time, Bloom presents one of the boldest theses of Shakespearean scholarships: that Shakespeare not only invented the English language, but also created human nature as we know it today.

**Cuisine and Culture** Linda Civitello, 2011-03-29 An illuminating account of how history shapes our diets—now in a new revised and updated Third Edition Why did the ancient Romans believe cinnamon grew in swamps guarded by giant killer bats? How did African cultures imported by slavery influence cooking in the American South? What does the 700-seat McDonald's in Beijing serve in the age of globalization? With the answers to these and many more such questions, Cuisine and Culture, Third Edition presents an engaging, entertaining, and informative exploration of the interactions among history, culture, and food. From prehistory and the earliest societies in the Fertile Crescent to today's celebrity chefs, Cuisine and Culture, Third Edition presents a multicultural and multiethnic approach to understanding how and why major historical events have affected and defined the culinary traditions in different societies. Now revised and updated, this Third Edition is more comprehensive and insightful than ever before. Covers prehistory through the present day—from the discovery of fire to the emergence of television cooking shows Explores how history, culture, politics, sociology, and religion have determined how and what people have eaten through the ages Includes a sampling of recipes and menus from different historical periods and cultures Features French and Italian pronunciation guides, a chronology of food books and cookbooks of historical importance, and an extensive bibliography Includes all-new content on technology, food marketing, celebrity chefs and cooking television shows, and Canadian cuisine. Complete with revealing historical photographs and illustrations, Cuisine and Culture is an essential introduction to food history for students, history buffs, and food lovers.

**North Korea: A Country Study** Robert L. Worden, 2011-04-21 NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT--OVERSTOCK SALE -- Significantly reduced list price This edition of North Korea: A Country Study replaces the previous edition, published in 1994. Like its predecessor, this study attempts to review the history and treat in a concise manner the dominant social, political, economic, and military aspects of contemporary North Korea. Sources of information included books, scholarly journals, foreign and domestic newspapers, official reports of governments and international organizations, and numerous periodicals and Web sites on Korean and East Asian affairs. A word of caution is necessary, however. Even though more information is forthcoming from and about North Korea since it became a member of the United Nations in 1991, the government of a closed society such as that of North Korea controls information for internal and external consumption, limiting both the scope of coverage and its dissemination. A chronology of major historical events is provided at the front of the book (see table A). Chapter bibliographies appear at the end of the book, and brief comments on some of the more valuable and enduring sources recommended for further reading appear at the end of each chapter. A glossary also is included. Spellings of place-names in the book are in most cases those approved by the U.S. Board on Geographic Names (BGN); spellings of some of the names, however, cannot be verified, as the BGN itself notes. Readers of this book are alerted that because the BGN recognizes the Sea of Japan as the formal name of the body of water to the east of the Korean Peninsula, this book also uses that term.. Similarly, the Yellow Sea is identified as the West Sea. The McCune-Reischauer system of transliteration has been employed except for the names of some prominent national and historical figures. Thus, Kim Il-song is rendered as Kim Il Sung, and Kim Chong-il is rendered as Kim Jong Il. The names of Korean authors writing in English are spelled as given in the original publication. Measurements are given in the metric system. A conversion table (see table B) is provided to assist readers who are unfamiliar with metric measurements. Other related items: Foreign Countries collection can be found here: <https://bookstore.gpo.gov/catalog/international-foreign-affairs/foreign-country-studies> The body of the text reflects information available as of August 1, 2007. Certain other parts of the text, however, have been updated: the Chronology and Introduction discuss significant events that have occurred since the completion of research, and the Country Profile and portions of some chapters include updated information as available.

**The Last Pictures** Trevor Paglen, 2012-09-19 Human civilizations' longest lasting artifacts are not the great Pyramids of Giza, nor the cave paintings at Lascaux, but the communications satellites that circle our planet. In a stationary orbit above the equator, the satellites that broadcast our TV signals, route our phone calls, and process our credit card transactions experience no atmospheric drag. Their inert hulls will continue to drift around Earth until the Sun expands into a red giant and engulfs them about 4.5 billion years from now. The Last Pictures, co-published by Creative Time Books, is rooted in the premise that these communications satellites will ultimately become the cultural and material ruins of the late 20th and early 21st centuries, far outlasting anything else humans have created. Inspired in part by ancient cave paintings, nuclear waste warning signs, and Carl Sagan's Golden Records of the 1970s, artist/geographer and MacArthur Genius Fellow Trevor Paglen has developed a collection of one hundred images that will be etched onto an ultra-archival, golden silicon disc. The disc, commissioned by Creative Time, will then be sent into orbit onboard the Echostar XVI satellite in September 2012, as both a time capsule and a message to the future. The selection of 100 images, which are the centerpiece of the book, was influenced by four years of interviews with leading scientists, philosophers, anthropologists, and artists about the contradictions that characterize contemporary civilizations. Consequently, The Last Pictures engages some of the most profound questions of the human experience, provoking discourse about communication, deep time, and the economic, environmental, and social uncertainties that define our historical moment. *What Technology Wants* Kevin Kelly, 2011-09-27 From the author of the New York Times bestseller The Inevitable— a sweeping vision of technology as a living force that can expand our individual potential In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution. By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed or what it wants. Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.

*Essay on the Geography of Plants* Alexander von Humboldt, Aimé Bonpland, 2010-07-15 The legacy of Alexander von Humboldt (1769–1859) looms large over the natural sciences. His 1799–1804 research expedition to Central and South America with botanist Aimé Bonpland set the course for the great scientific surveys of the nineteenth century, and inspired such essayists and artists as Emerson, Goethe, Thoreau, Poe, and Church. The chronicles of the expedition were published in Paris after Humboldt's return, and first among them was the 1807 "Essay on the Geography of Plants." Among the most cited writings in natural history, after the works of Darwin and Wallace, this work appears here for the first time in a complete English-language translation. Covering far more than its title implies, it represents the first articulation of an integrative "science of the earth, "

encompassing most of today’s environmental sciences. Ecologist Stephen T. Jackson introduces the treatise and explains its enduring significance two centuries after its publication.

**Red Hot Lies** Christopher C. Horner,2008-11-11  
Liars--Al Gore, the United Nations, the New York Times. The global warming lobby, relentless in its push for bigger government, more spending, and more regulation, will use any means necessary to scare you out of your wits--as well as your tax dollars and your liberties--with threats of rising oceans, deadly droughts, and unspeakable future consequences of climate change. In pursuing their anti-energy, anti-capitalist, and pro-government agenda, the global warming alarmists--and unscrupulous scientists who see this scare as their gravy train to federal grants and foundation money--resort to dirty tricks, smear campaigns, and outright lies, abandoning scientific standards, journalistic integrity, and the old-fashioned notions of free speech and open debate. In Red Hot Lies, bestselling author Christopher Horner--himself the target of Greenpeace dirty tricks and alarmist smears--exposes the dark underbelly of the environmental movement. Power-hungry politicians blacklist scientists who reject global warming alarmism. U.S. senators threaten companies that fund climate change dissenters. Mainstream media outlets openly reject the notion of balance. The occasional unguarded scientist candidly admits the need to twist the facts to paint an uglier picture in order to keep the faucet of government money flowing. In the name of saving the planet, anything goes. But why the nasty tactics? Why the cover ups, lies, and intimidation? Because Al Gore and his ilk want to use big government at the local, state, federal, and global level to run your life, and they can brook no opposition. But the actual facts, as Red Hot Lies makes clear, aren't nearly as scary as their fiction.

*Censorship in Colonial Indonesia, 1901–1942* Nobuto Yamamoto,2019-09-16  
In Censorship in Colonial Indonesia, 1901–1942 Nobuto Yamamoto traces the institutionalization of print censorship in the Netherlands Indies, specifically the interplay between the emergent nationalist movement and the censoring apparatus put in place to contain it.

**Niccolò Di Lorenzo Della Magna and the Social World of Florentine Printing, Ca. 1470Ð1493** Lorenz B  ninger,2021-04-06  
A new history of one of the foremost printers of the Renaissance explores how the Age of Print came to Italy. Lorenz B  ninger offers a fresh history of the birth of print in Italy through the story of one of its most important figures, Niccol   di Lorenzo della Magna. After having worked for several years for a judicial court in Florence, Niccol   established his business there and published a number of influential books. Among these were Marsilio Ficino  s De christiana religione, Leon Battista Alberti  s De re aedificatoria, Cristoforo Landino  s commentaries on Dante  s Commedia, and Francesco Berlinghieri  s Septe giornate della geographia. Many of these books were printed in vernacular Italian. Despite his prominence, Niccol   has remained an enigma. A meticulous historical detective, B  ninger pieces together the thorough portrait that scholars have been missing. In doing so, he illuminates not only Niccol    s life but also the Italian printing revolution generally. Combining Renaissance studies   traditional attention to bibliographic and textual concerns with a broader social and economic history of printing in Renaissance Italy, B  ninger provides an unparalleled view of the business of printing in its earliest years. The story of Niccol   di Lorenzo furnishes a host of new insights into the legal issues that printers confronted, the working conditions in printshops, and the political forces that both encouraged and constrained the publication and dissemination of texts.

**Changing Conceptions of Conspiracy** Carl F. Graumann,Serge Moscovici,2012-12-06  
The contents of the first two volumes were, we gladly admit, at once more familiar and easier to handle. We were concerned with mass and leadership psychology, two factors that we know from social and political life. They have been much studied and we can clearly trace their evolution. However, since actions by masses and leaders also have an intellectual and emotional side, we were obliged, in some way or other, to deal with this topic as well. It was obviously necessary, it seemed to us, to approach this study from a new and significant angle. One cannot escape the realiza tion that conspiracy theory has played, and continues to play, a central role in our epoch, and has had very serious consequences. The obsession with conspiracy has spread to such an extent that it continuously crops up at all levels of society. The fol lowing paradox must be striking to anyone: In the past, society was governed by a small number of men, at times by one individual, who, within traditional limits, imposed his will on the multitude. Plots were effective: By eliminating these individuals and their families, one could change the course of events. Today, this is no longer the case. Power is divided among parties and extends throughout society. Power flows, changes hands, and affects opinion, which no one controls and no one represents entirely.

*The History of Signboards, from the Earliest Times to the Present Day* Jacob Larwood,John Camden Hotten,1870

**Surveillance, Militarism and Drama in the Elizabethan Era** C. Bright,1996-11-07  
Curtis Bright challenges the view that Renaissance English rulers could not dominate their domestic population. He argues, alternatively, that the Elizabethan state was controlled by the Cecilian faction, which maintained power by focusing English energies outwardly. Cecilians launched relentless assaults by land and sea against England's neighbours. By the 1590s their policies had enriched a few yet destroyed countless people, and this book reads the drama of Christopher Marlowe and William Shakespeare in relation to ongoing national and international conflict.

**The University of Mantua, the Gonzaga, and the Jesuits, 1584–1630** Paul F. Grendler,2009-07-27  
Thanks to extensive archival research and a thorough examination of the published works of the university's professors, Grendler's history tells a new story.

*From Revolt to Riches* Theo Hermans,Reinier Salverda,Ulrich Tiedau,2017-03-28  
This collection investigates the culture and history of the Low Countries in the sixteenth and seventeenth centuries from both international and interdisciplinary perspectives. The period was one of extraordinary upheaval and change, as the combined impact of Renaissance, Reformation and Revolt resulted in the radically new conditions – political, economic and intellectual – of the Dutch Republic in its Golden Age. While many aspects of this rich and nuanced era have been studied before, the emphasis of this volume is on a series of interactions and interrelations: between communities and their varying but often cognate languages; between different but overlapping spheres of human activity; between culture and history. The chapters are written by historians, linguists, bibliographers, art historians and literary scholars based in the Netherlands, Belgium, Great Britain and the United States. In continually crossing disciplinary, linguistic and national boundaries, while keeping the culture and history of the Low Countries in the Renaissance and Golden Age in focus, this book opens up new and often surprising perspectives on a region all the more intriguing for the very complexity of its entanglements.
