Polish Migration to the UK in the 'New' European Union Kathy Burrell,2016-04-22 Since the 2004 enlargement of the European Union over half a million Polish migrants have registered to work in the United Kingdom, constituting one of the largest migration movements in contemporary Europe. Drawing on research undertaken across a wide range of disciplines - history, economics, sociology, anthropology, film studies and discourse analysis - and focusing on both the Polish and British aspects of this phenomenon - both emigration and immigration - this edited collection investigates what is

actually new about this migration flow, what its causes and consequences are, and how these migrants' lives have changed by moving to the United Kingdom. As the first book to deal with Polish migration to the United Kingdom, Polish Migration to the UK in the 'New' European Union will appeal to scholars across a range of social sciences, whose work concerns migration and the migration process.

The Electronics of Radio David Rutledge, 1999-08-13
This fascinating book provides a stimulating introduction to analog electronics by analysing the design and construction of a radio transceiver. Essential theoretical background is given along with carefully designed laboratory and homework exercises. The author begins with a thorough description of basic electronic components and simple circuits and goes on to describe the key elements of radio electronics, including filters, amplifiers, oscillators, mixers, and antennas. Laboratory exercises lead the reader through the design, construction, and testing of a popular radio transceiver (the NorCal 40A). A diskette containing the widely known circuit simulation software, Puff, is included in the book. This was the first book to deal with elementary electronics in the context of radio. It can be used as a textbook for introductory analog electronics courses, for more advanced undergraduate classes on radio-frequency electronics, and will also be of

great interest to electronics hobbyists and radio enthusiasts.
