Rootkit Arsenal Bill Blunden,2013 While forensic analysis has proven to be a valuable investigative tool in the field of computer security, utilizing anti-forensic technology makes it possible to maintain a covert operational foothold for extended periods, even in a high-security environment. Adopting an approach that favors full disclosure, the updated Second Edition of The Rootkit Arsenal presents the most accessible, timely, and complete coverage of forensic countermeasures. This book covers more topics, in greater depth, than any other currently available. In doing so the author forges through the murky back alleys of the Internet, shedding light on material that has traditionally been poorly documented, partially documented, or intentionally undocumented. The range of topics presented includes how to: -Evade post-mortem analysis -Frustrate attempts to reverse engineer your command & control modules -Defeat live incident response -Undermine the process of memory analysis - Modify subsystem internals to feed misinformation to the outside -Entrench your code in fortified regions of execution -Design and implement covert channels -Unearth new avenues of attack

Web Search: Public Searching of the Web Amanda Spink,Bernard J. Jansen,2004-07-21 Web Search: Public Searching of the Web, co-authored by Drs. Amanda Spink and Bernard J. Jansen, is one of the first manuscripts that address the human - system interaction of Web searching in a thorough and complete manner. The authors provide an examination of Web searching from multiple levels of analysis, from theoretical overview to detailed study of term usage, and integrate these different levels of analysis into a coherent picture of how people locate information on the Web using search engines. Drawing primarily on their own research and work in the field, the authors present the temporal changes in, the growth of, and the stability of how people interact with Web search engines. Drs. Spink and Jansen present results from an analysis of multiple search engine data sets over a six year period, giving a firsthand account of the emergence of Web searching. They also compare and contrast their findings to the results of other researchers in the field, providing a valuable bibliographic resource. This research is directly relevant to those interested in providing information or services on the Web, along with those who research and study the Web as an information resource. Graduate students, academic and corporate researchers, search engine designers, information architects, and search engine optimizers will find the book of particular benefit.

End-to-End Arguments in the Internet Matthias Bärwolff,Michelangelo Merisi Da Caravaggio,2010-12-08 The end-to-end arguments have been at the heart of an increasingly political debate about the proper place of communications functions in a physically and administratively distributed network such as the Internet. In particular, what is the right balance between application end points on the one hand, and network intermediaries on the other? This thesis goes beyond the cursory arguments found in much of today's discussions on Internet governance and regulation. It unveils the historical background to the end-to-end principle and develops them with a rigour that has thus far been absent from the discourse on Internet design principles. Our thorough and timely elaboration of one of the core technical principles that came to form today's Internet is relevant to most anyone with a stake in the future Internet evolution. If we are to maintain the goodness of the Internet, it is vital that we first understand its principles. Only then can we hope to arrive at useful policy implications.

Abie's Irish Rose Anne Nichols, 1927 During World War I, Abie Levy, a soldier in the A. E. F., is wounded in combat. While recovering in a hospital, he meets Rosemary Murphy, an entertainer. They fall in love, return to the United States, and get married in an Episcopal church in Jersey City. Abie takes Rosemary to his home and introduces her as his sweetheart, Rosie Murpheski; they are then married by a rabbi. Mr. Murphy arrives with a priest and, amid discord and discontent, the young people are married again, this time by the priest. Disowned by both families, Rosemary and Abie are befriended only by the Cohens. On Christmas Eve, the Cohens and their rabbi persuade Solomon to see his son and his new grandchildren; the priest urges Mr. Murphy to do the same. This surprise visit begins in acrimony, but ends peacefully as Rosemary presents her newborn twins: Patrick Joseph, named for her father, and Rebecca, named for Abie's dead mother.

iBrain Dr. Gary Small, Gigi Vorgan, 2009-10-06 Their insights are extraordinary, their behaviors unusual. Their brains—shaped by the era of microprocessors, access to limitless information, and 24-hour news and communication—are remapping, retooling, and evolving. They're not superhuman. They're your twenty-something coworkers, your children, and your competition. Are you keeping up? In iBrain, Dr. Gary Small, one of America's leading neuroscientists and experts on brain function and behavior, explores how technology's unstoppable march forward has altered the way young minds develop, function, and interpret information. iBrain reveals a new evolution catalyzed by technological advancement and its future implications: Where do you fit in on the evolutionary chain? What are the professional, social, and political impacts of this new brain evolution? How must you adapt and at what price? While high-tech immersion can accelerate learning and boost creativity, it also has its glitches, among them the meteoric rise in ADD diagnoses, increased social isolation, and Internet addiction. To compete and thrive in the age of brain evolution, and to avoid these potential drawbacks, we must adapt, and iBrain—with its Technology Toolkit—equips all of us with the tools and strategies needed to close the brain gap.

Dream Quartet June Ballantyne, 2021-09-24 I received four stories over a few months from dreams that came over a period of days and stayed in my mind until I wrote them down, and others via my subconscious. When I was sitting in my car at the beach and events happened that forced me to go home and sit at my computer, the stories

came at great speed into my mind, and I typed them out and read them afterwards. The first is about a young girl who has moved to London for her new job working for the government. She meets a young gypsy who wants to tell her something. They have a connection, and events lead her to join him in the summer at the gypsy encampment, where she learns of her true family. Her life changes from there. The second story, again from a dream over a period of days, is a love story. A girl has a past that gets in the way. The third story I love. I was sitting in my car at the beach and words ran across the book I was trying to read. I drove home, and before I arrived at my door, the words were pushing their way into my head. I sat and typed as fast as my fingers could keep me going, and then it ended. I did not know what I wrote, so I read the story: an amusing plan by six young adults to have a mystery holiday, while at the same time creating fun things for each of them to do while waiting for clues at their hotel, each one filled with mischief. It had an amusing twist for the ending. However, that night I had to get up and go to my computer and continue with a second part to the story. I really enjoyed it. The final story was very emotional for me. There was heartache, the mystery of where your soul goes after death, how life continues on a new path, and who is in charge.
