📖 *The Rebel* Gerald Brandt,2017 Kris Merrill is a member of a small insurgent group operating within a multi-level metropolis that stretches from San Francisco to the Mexican border. Her attempt at rescuing Ian Miller failed, leaving her alone and her unborn son without a father. The insurgents don’t trust her, Kai has disappeared completely, and Pat is trying to control how Kris should mourn the loss of Ian. Without the trust of the insurgents, Kris is relegated to low level assignments for them, and trying desperately to keep her pregnancy a secret. She is alone. War has started between the corporations. The people living in the lower levels of San Angeles have become the victims, starving and being rounded up to be soldiers in the war. Torn between working with the insurgents as they become more like the corporations they are fighting, and helping the people of the lower levels, Kris doesn’t know what to do. Facing the return of an enemy who will stop at nothing to have revenge, Kris struggles with loss and discovering who she really is.

📖 *Maximum City* Suketu Mehta,2009-10-21 A native of Bombay, Suketu Mehta gives us an insider’s view of this stunning metropolis. He approaches the city from unexpected angles, taking us into the criminal underworld of rival Muslim and Hindu gangs, following the life of a bar dancer raised amid poverty and abuse, opening the door into the inner sanctums of Bollywood, and delving into the stories of the countless villagers who come in search of a better life and end up living on the sidewalks. As each individual story unfolds, Mehta also recounts his own efforts to make a home in Bombay after more than twenty years abroad. Candid, impassioned, funny, and heartrending, Maximum City is a revelation of an ancient and ever-changing world.

📖 *Metabolism in Architecture* Kish📖 Kurokawa, 1977 Even in a country where outstanding achievements have become almost a commonplace, the Japanese architect, Kisho Kurokawa, appears as both a remarkable and a remarkably successful man. With buildings in the United States and Eastern and Western Europe as well as in Japan, he has established an international reputation as a leading figure amongst the younger generation of architects. At the age of forty he already had thirty-five major buildings and seventeen books to his credit; four new towns are being built to his designs; he heads a company of over a hundred employees, he runs a think-tank and an urban design bureau and for variety he has his own television programme with a regular audience of some 30 million. Behind these statistics lies a prodigious vitality expressed in original and stimulating buildings. -- from book jacket.

📖 *Liquid City* John R Short,2010-09-30 Megalopolis was the name given to a Peloponnesian city that was founded around 371- 368 BCE. Though planned on a grand scale, the city failed to realize the dreams of the founders, and it declined by the late Roman period. In 1957, the renowned geographer Jean Gottman applied the term in his description of the densely populated area of the northeastern United States that includes the cities of Boston, New York, Philadelphia, Baltimore, and Washington. Liquid City is the first book to examine the social, economic, and demographic changes that have taken place in Megalopolis over the past fifty years. Nearly one in six Americans live in the modern Megalopolis, making it one of the largest city regions in the world. John Rennie Short juxtaposes Gottman’s work with his own examination, providing a comprehensive assessment of the region’s evolution. Particularly important are his use of 2000 census data and his discussions of sources of identity, unity, and fragmentation in Megalopolis. Emphasizing the fluid, variable character of Megalopolis, this clear and accessible book focuses on five aspects of change: population redistribution from cities to suburbs; economic restructuring; immigration; patterns of racial/ethnic segregation; and the processes of globalization that have made one of the world’s most influential economies.

📖 *Fandom as Methodology* Catherine Grant,Kate Random Love,2019-12-03 An illustrated exploration of fandom that combines academic essays with artist pages and experimental texts. Fandom as Methodology examines fandom as a set of practices for approaching and writing about art. The collection includes experimental texts, autobiography, fiction, and new academic perspectives on fandom in and as art. Key to the idea of “fandom as methodology” is a focus on the potential for fandom in art to create oppositional spaces, communities, and practices, particularly from queer perspectives, but also through transnational, feminist and artist-of-color fandoms. The book provides a range of examples of artists and writers working in this vein, as well as academic essays that explore the ways in which fandom can be theorized as a methodology for art practice and art history. Fandom as Methodology proposes that many artists and art writers already draw on affective strategies found in fandom. With the current focus in many areas of art history, art writing, and performance studies around affective engagement with artworks and imaginative potentials, fandom is a key methodology that has yet to be explored. Interwoven into the academic essays are lavishly designed artist pages in which artists offer an introduction to their use of fandom as methodology. Contributors Taylor J. Acosta, Catherine Grant, Dominic Johnson, Kate Random Love, Maud Lavin, Owen G. Parry, Alice Butler, Soojin Lee, Jenny Lin, Judy Batalion, Ika Willis. Artists featured in the artist pages Jeremy Deller, Ego Ahaiwe Sowinski, Anna Bunting-Branch, Maria Fusco, Cathy Lomax, Kamau Amu Patton, Holly Pester, Dawn Mellor, Michelle Williams Gamaker, The Women of Colour Index Reading Group, Liv Wynter, Zhiyuan Yang

📖 *Concrete Jungle* Niles Eldredge,Sidney Horenstein,2014-10-23 If they are to survive, cities need healthy chunks of the world’s ecosystems to persist; yet cities, like parasites, grow and prosper by local destruction of these very ecosystems. In this absorbing and wide-ranging book, Eldredge and Horenstein use New York City as a microcosm to explore both the positive and the negative sides of the relationship between cities, the environment, and the future of global biodiversity. They illuminate the mass of contradictions that cities present in embodying the best and the worst of human existence. The authors demonstrate that, though cities have voracious appetites for resources such as food and water, they also represent the last hope for conserving healthy remnants of the world’s ecosystems and species. With their concentration of human beings, cities bring together centers of learning, research, government, finance, and media—institutions that increasingly play active roles in solving environmental problems. Some of the topics covered in Concrete Jungle: --The geological history of the New York region, including remnant glacial features visible today --The early days of urbanization on Manhattan Island, focusing on the history of Central Park, Collect Pond, and Manhattan Square --The history of early railway lines and the development of New York’s iconic subway system --The problem of producing enough safe drinking water for an ever-expanding population --Prominent civic institutions, including universities, museums, and zoos

THIS BOOK ALSO SHOWS HOW THESE THEORISTS OFTEN CHALLENGE EACH OTHERS’ CONCLUSIONS ABOUT CULTURAL POWER AND DON’T, AS SOME BELIEVE, COLLECTIVELY CELEBRATE THE POSTNATIONAL. CENTRAL TO THESE DEBATES ARE THE CONCEPTS OF COMMUNITY, GLOBALIZATION, COSMOPOLITANISM, EUROPE AND EUROPEAN COLONIALISM, MODERNITY, AND POSTCOLONIALITY.
