In the Time of the Butterflies Julia Alvarez, 2010-01-12 Celebrating its 30th anniversary in 2024, internationally bestselling author and literary icon Julia Alvarez's *In the Time of the Butterflies* is beautiful, heartbreaking and alive ... a lyrical work of historical fiction based on the story of the Mirabal sisters, revolutionary heroes who had opposed and fought against Trujillo. (Concepción de León, New York Times) Alvarez's new novel, *The Cemetery of Untold Stories*, is coming April 2, 2024. Pre-order now! It is November 25, 1960, and three beautiful sisters have been found near their wrecked Jeep at the bottom of a 150-foot cliff on the north coast of the Dominican Republic. The official state newspaper reports their deaths as accidental. It does not mention that a fourth sister lives. Nor does it explain that the sisters were among the leading opponents of Gen. Rafael Leónidas Trujillo's dictatorship. It doesn't have to. Everybody knows of *Las Mariposas*—the Butterflies. In this extraordinary novel, the voices of all four sisters—Minerva, Patria, María Teresa, and the survivor, Dedé—speak across the decades to tell their own stories, from secret crushes to gunrunning, and to describe the everyday horrors of life under Trujillo's rule. Through the art and magic of Julia Alvarez's imagination, the martyred Butterflies live again in this novel of courage and love, and the human costs of political oppression. Alvarez helped blaze the trail for Latina authors to break into the literary mainstream, with novels like *In the Time of the Butterflies* and *How the García Girls Lost Their Accents* winning praise from critics and gracing best-seller lists across the Americas.—Francisco Cantú, *The New York Times Book Review* This Julia Alvarez classic is a must-read for anyone of Latinx descent. —Popsugar.com A gorgeous and sensitive novel . . . A compelling story of courage, patriotism and familial devotion. —People Shimmering . . . Valuable and necessary. —Los Angeles Times A magnificent treasure for all cultures and all time." —St. Petersburg Times Alvarez does a remarkable job illustrating the ruinous effect the 30-year dictatorship had on the Dominican Republic and the very real human cost it entailed.—Cosmopolitan.com

The Dark Side of Democracy Michael Mann, 2005 Publisher Description

Factories in the Field Carey McWilliams, 2000-04-15 This book was the first broad exposé of the social and environmental damage inflicted by the growth of corporate agriculture in California. *Factories in the Field*—together with the work of Dorothea Lange, Paul Taylor, and John Steinbeck—dramatizes the misery of the dust bowl migrants hoping to find work in California agriculture. McWilliams starts with the scandals of the Spanish land grant purchases, and continues on to examine the experience of the various ethnic groups that have provided labor for California's agricultural industry—Chinese, Japanese, Mexicans, Filipinos, Armenians—the strikes, and the efforts to organize labor unions

American Exodus James Noble Gregory, 1991 Gregory reaches into the migrants' lives to reveal both their economic trials and their impact on California's culture and society. He traces the development of an 'Okie subculture' which is now an essential element of California's cultural landscape.

Why Nuclear Power Has Been a Flop Jack Devanney, 2022-08-18 This book focuses on the Gordian knot of our time, the closely coupled problems of electricity poverty for billions of humans, and global warming for all humans. The central thesis of the book is that nuclear power is not only the only solution, it is a highly desirable solution, cheaper, safer, less intrusive on nature than all the alternatives. Just about everybody, including most pro-nuclear folks, accept the fact that nuclear electricity is inherently expensive. Nuclear power is not inherently expensive. It is inherently cheap. This book argues that conventional nuclear power should cost less than three cents per kilowatt hour. But nuclear power is expensive, prohibitively so in most parts of the planet. The reason why nuclear power is so expensive is a regulatory regime in which the regulator is mandated to increase costs to the point where nuclear power is at best barely economic. The operative buzzword is ALARA, As Low As Reasonably Achievable. In such a system, any technological improvement which should lower cost simply provides regulators with more room to drive costs up. This same regime does an excellent job of stifling competition and technological progress by erecting layers of barriers to entry. The goal is not just to make nuclear electricity as cheap as coal or gas fired electricity. The goal must be to keep pushing the cost of nuclear power down and down, allowing us to replace fossil fuels almost everywhere. Imagine what we could do with 2 cents per kWh power in electrifying transportation and producing carbon neutral synfuels. This can only be done in a harshly competitive environment. We must force the providers of nuclear power to compete with everybody. If nuclear power is to be allowed to cleave the Gordian knot of electricity poverty and global warming, then we must completely change the way we regulate nuclear electricity. This book makes the case for this change and outlines what the replacement system needs to look like. ~

The Escape Artist Mark Sullivan, 2012-11-08 *Eastern Democratic Republic of Congo*, 2007: Robin Monarch is on a mission to gain possession of a politically sensitive object. Securing the target is child's play for Monarch, but exiting the jungle alive will pose a far greater challenge . . . *Buenos Aires*, 1987: An eighteen-year-old Robin Monarch has begun to question the dark direction the Brotherhood of Thieves is taking. As such, there is only one

path he can now take: voice his objection, and - by doing so - risk his life. ROGUE GENESIS is a collection of two short stories (INCURSION and RENDITION) and one novella (THE ESCAPE ARTIST) introducing Robin Monarch - CIA agent, expert thief, and star of the explosive international thriller ROGUE.

Iran and the CIA D. Bayandor,2010-03-03 In the early 1950s, frail septuagenarian prime minister of Iran, Doctor Mohammad Mosaddeq, shook the world - challenging Britain by nationalizing Iran's British-run oil industries. In August 1953 he was overthrown. Revisiting these events with astonishing new evidence, this book challenges the conventionally-held theory of foul play by the CIA.

Carl Wilhelm Scheele and Torbern Bergman Anders Lennartson,2020-08-31 This book tells the story of two of the most important figures in the history of chemistry. Carl Wilhelm Scheele (1742–1786) was the first to prepare oxygen and realise that air is a mixture of nitrogen and oxygen; he also discovered many important organic and inorganic substances. His fellow chemist and good friend, Torbern Bergman (1735–1784), was one of the pioneers in analytical and physical chemistry. In this carefully researched biography, the author, Anders Lennartson, explains the chemistry of Scheele and Bergman while putting their discoveries in the context of other 18th-century chemistry. Much of the information contained in this work is available in English for the first time.

The Hacker's Dictionary Eric S. Raymond,2017-06-19 This document is a collection of slang terms used by various subcultures of computer hackers. Though some technical material is included for background and flavor, it is not a technical dictionary; what we describe here is the language hackers use among themselves for fun, social communication, and technical debate.

Crucibles Bernard Jaffe,1976-01-01 Brief biographies of great chemists, from Trevisan and Paracelsus to Bohr and Lawrence, provide a survey of the discoveries and advances that shaped modern chemistry

Report of the Bloody Sunday Inquiry (Hc) Lord Saville of Newdigate,William Hoyt,John L. Toohey,2016-10-30 On 29th January 1998 the House of Commons resolved that it was expedient that a tribunal be established for inquiring into a definite matter of urgent public importance, namely the events on Sunday, 30 January 1972 which led to loss of life in connection with the procession in Londonderry on that day, taking account of any new information relevant to events on that day. On 2nd February 1998 the House of Lords also passed this resolution. With the exception of the last 12 words, these terms of reference are virtually identical to those for a previous Inquiry held by Lord Widgery (then the Lord Chief Justice) in 1972. Both inquiries were conducted under the provisions of the Tribunals of Inquiry (Evidence) Act 1921. In his statement to the House of Commons on 29th January 1998 the Prime Minister (The Rt Hon Tony Blair MP) said that the timescale within which Lord Widgery produced his report meant that he was not able to consider all the evidence that might have been available. He added that since that report much new material had come to light about the events of the day. In those circumstances, he announced: We believe that the weight of material now available is such that the events require re-examination. We believe that the only course that will lead to public confidence in the results of any further investigation is to set up a full-scale judicial inquiry into Bloody Sunday. The Prime Minister made clear that the Inquiry should be allowed the time necessary to cover thoroughly and completely all the evidence now available. The collection, analysis, hearing and consideration of this evidence (which is voluminous) have necessarily required a substantial period of time. The Tribunal originally consisted of The Rt Hon the Lord Saville of Newdigate, a Lord of Appeal in Ordinary, The Hon William Hoyt OC, formerly the Chief Justice of New Brunswick, Canada, and The Rt Hon Sir Edward Somers, formerly a member of the New Zealand Court of Appeal. Before the Tribunal began hearing oral evidence, Sir Edward Somers retired through ill health. The Hon John Toohey AC, formerly a Justice of the High Court of Australia, took his place. Lord Saville acted throughout as the Chairman of the Inquiry.

Dietary Starches and Sugars in Man: A Comparison John Dobbing,2012-12-06 ILSI Human Nutrition Reviews provide an account of current thought in the field under review and point to problems and questions yet to be elucidated. They are intended to fill the gap between the textbook on the one hand and the specialist publication on the other. They are written by leading international authorities and are reviews for workers in the medical, nutritional and allied sciences rather than the expert. Dietary Starches and Sugar in Man presents the latest thinking of leading research scientists in a unique, multi-authored book. Leading European experts have collaborated to prepare a multi-disciplinary update on the subject. Each chapter was submitted to peer review by every other author, after which the commentaries were either incorporated into a revision of the original text or added at the end of the chapter. In many cases the group discussion raised new points, so that the final product truly represents a complete picture of international expertise. This book thus gives nutrition experts in the medical sciences and the food industry all current information on the latest research, and the critiques of this research, concerning these two groups of carbohydrates.
