Proving Your Library's Value Alan Fishel,Jillian Wentworth,United for Libraries,2020-10-27 You know the value of your library, but elected officials, donors, community leaders, funders, and other important stakeholders may not. How can you make the library a priority for these groups, who may have preconceived notions about what the library does, as you compete with other important community organizations for funding? In this book from United for Libraries, you'll learn how to use The E's of Libraries® (Education, Employment, Entrepreneurship, Engagement, and Empowerment) to quickly demonstrate why your library is essential and worthy of funding, using messaging that is organized, persuasive, and memorable. With the help of worksheets, charts, and prompts, you will learn how to use language designed to win over stakeholders, funders, and partners; craft custom messaging in several formats that is easily accessible and memorable, including elevator speeches, budget presentations, and annual appeals; and create presentations and other materials tailored to any audience based on the sample documents included. This book's innovative framework can be used by any size or type of library, and by any library advocate, including Friends groups, library staff, trustees, and foundations.

The Pragmatics of Text Messaging Michelle A. McSweeney,2018-05-30 This book provides a comprehensive linguistic exploration of textism use by bilingual young adults, illustrating the function of alternative and creative linguistic features and their role in conveying tone through text. Drawing on a corpus of nearly 45,000 text messages donated by bilingual young adults in New York City, this volume explores the ways in which the use of texting features such as 'lol,' emojis, abbreviations, and acronyms is systematic and essential. In part, toward the aim of exposing the tensions bilinguals face navigating a platform that preferences monolingual language practices, the book highlights creativity as a means of both constructing meaning and performing identity for bilingual youths. These findings are extended to explore the role texting plays in communication and identity construction in contemporary society more generally. This volume extends the boundaries of emerging research on language and digital communication, and will be of particular interest to graduate students and scholars in computer-mediated communication, pragmatics, and new media.
