Macroanalysis Matthew L. Jockers,2013-04-15 In this volume, Matthew L. Jockers introduces readers to large-scale literary computing and the revolutionary potential of macroanalysis--a new approach to the study of the literary record designed for probing the digital-textual world as it exists today, in digital form and in large quantities. Using computational analysis to retrieve key words, phrases, and linguistic patterns across thousands of texts in digital libraries, researchers can draw conclusions based on quantifiable evidence regarding how literary trends are employed over time, across periods, within regions, or within demographic groups, as well as how cultural, historical, and societal linkages may bind individual authors, texts, and genres into an aggregate literary culture. Moving beyond the limitations of literary interpretation based on the close-reading of individual works, Jockers describes how this new method of studying large collections of digital material can help us to better understand and contextualize the individual works within those collections.

Metadata for Semantic and Social Applications Jane Greenberg,Wolfgang Klas,2008 Metadata is a key aspect of our evolving infrastructure for information management, social computing, and scientific collaboration. DC-2008 will focus on metadata challenges, solutions, and innovation in initiatives and activities underlying semantic and social applications. Metadata is part of the fabric of social computing, which includes the use of wikis, blogs, and tagging for collaboration and participation. Metadata also underlies the development of semantic applications, and the Semantic Web -- the representation and integration of multimedia knowledge structures on the basis of semantic models. These two trends flow together in applications such as Wikipedia, where authors collectively create structured information that can be extracted and used to enhance access to and use of information sources. Recent discussion has focused on how existing bibliographic standards can be expressed as Semantic Web vocabularies to facilitate the ingration of library and cultural heritage data with other types of data. Harnessing the efforts of content providers and end-users to link, tag, edit, and describe their information in interoperable ways (participatory metadata) is a key step towards providing knowledge environments that are scalable, self-correcting, and evolvable. DC-2008 will explore conceptual and practical issues in the development and deployment of semantic and social applications to meet the needs of specific communities of practice.

Pentaho Kettle Solutions Matt Casters,Roland Bouman,Jos van Dongen,2010-09-02 A complete guide to Pentaho Kettle, the Pentaho Data Integration toolset for ETL This practical book is a complete guide to installing, configuring, and managing Pentaho Kettle. If you're a database administrator or developer, you'll first get up to speed on Kettle basics and how to apply Kettle to create ETL solutions--before progressing to specialized concepts such as clustering, extensibility, and data vault models. Learn how to design and build every phase of an ETL solution. Shows developers and database administrators how to use the open-source Pentaho Kettle for enterprise-level ETL processes (Extracting, Transforming, and Loading data) Assumes no prior knowledge of Kettle or ETL, and brings beginners thoroughly up to speed at their own pace Explains how to get Kettle solutions up and running, then follows the 34 ETL subsystems model, as created by the Kimball Group, to explore the entire ETL lifecycle, including all aspects of data warehousing with Kettle Goes beyond routine tasks to explore how to extend Kettle and scale Kettle solutions using a distributed "cloud" Get the most out of Pentaho Kettle and your data warehousing with this detailed guide--from simple single table data migration to complex multisystem clustered data integration tasks.

Proceedings of the 22nd Engineering Applications of Neural Networks Conference Lazaros Iliadis,John Macintyre,Chrisina Jayne,Elias Pimenidis,2021-06-23 This book contains the proceedings of the 22nd EANN "Engineering Applications of Neural Networks" 2021 that comprise of research papers on both theoretical foundations and cutting-edge applications of artificial intelligence. Based on the discussed research areas, emphasis is given in advances of machine learning (ML) focusing on the following algorithms-approaches: Augmented ML, autoencoders, adversarial neural networks, blockchain-adaptive methods, convolutional neural networks, deep learning, ensemble methods, learning-federated learning, neural networks, recurrent -- long short-term memory. The application domains are related to: Anomaly detection, bio-medical AI, cyber-security, data fusion, e-learning, emotion recognition, environment, hyperspectral imaging, fraud detection, image analysis, inverse kinematics, machine vision, natural language, recommendation systems, robotics, sentiment analysis, simulation, stock market prediction.

Assessment of Cataloging and Metadata Services Rebecca Mugridge,2020-04-28 Written by experienced practitioners and researchers, Assessment of Cataloging and Metadata Services provides the reader with many examples of how assessment practices can be applied to the work of cataloging and metadata services departments. Containing both research and case studies, it explores a variety of assessment methods as they are applied to the evaluation of cataloging productivity, workflows, metadata quality, vendor services, training needs, documentation, and more. Assessment methods addressed in these chapters include surveys, focus groups, interviews, observational analyses, workflow analyses, and methodologies borrowed from the field of business. Assessment of Cataloging and Metadata Services will help managers and administrators as they attempt to evaluate and communicate the value of what they do to their broader communities, whether they are higher education institutions, another organization, or the public. This book will help professionals with decision making and give them the tools they need to identify and implement improvements. The chapters in this book were originally published in a special issue in Cataloging & Classification Quarterly.

Multimedia Semantics Raphael Troncy,Benoit Huet,Simon Schenk,2011-07-18 In this book, the authors present the latest research results in the multimedia and semantic web communities, bridging the Semantic Gap This book explains, collects and reports on the latest research results that aim at narrowing the so-called multimedia Semantic Gap: the large disparity between descriptions of multimedia content that can be computed automatically, and the richness and subjectivity of semantics in user queries and human interpretations of audiovisual media. Addressing the grand challenge posed by the Semantic Gap requires a multi-disciplinary approach (computer science, computer vision and signal processing, cognitive science, web science, etc.) and this is reflected in recent research in this area. In addition, the book targets an interdisciplinary community, and in particular the Multimedia and the Semantic Webcommunities. Finally, the authors provide both the fundamental knowledge

and the latest state-of-the-art results from both communities with the goal of making the knowledge of one community available to the other. Key Features: Presents state-of-the art research results in multimedia semantics: multimedia analysis, metadata standards and multimedia knowledge representation, semantic interaction with multimedia Contains real industrial problems exemplified by user case scenarios Offers an insight into various standardisation bodies including W3C, IPTC and ISO MPEG Contains contributions from academic and industrial communities from Europe, USA and Asia Includes an accompanying website containing user cases, datasets, and software mentioned in the book, as well as links to the K-Space NoE and the SMaRT society web sites (<http://www.multimediasemantics.com/>) This book will be a valuable reference for academic and industry researchers /practitioners in multimedia, computational intelligence and computer science fields. Graduate students, project leaders, and consultants will also find this book of interest.

Metadata Fundamentals For All Librarians Priscilla Caplan,2008 Metadata, or data about data , is used to organize and access information in an effective way. From cataloguing to organizing archives, metadata helps front-line librarians provide customers with a direct path to information. In this text, Priscilla Caplan presents a comprehensive description of the various forms of metadata, its applications, and how librarians can put it to work. Both descriptive and nondescriptive forms of metadata are defined (including the TEI Header, the Dublin Core, EAD, GILS, ONIX and the Data Documentation Initiative) and applied to actual library functions. Illustrations show how different forms of metadata look, the advantages and disadvantages, and where they're best applied in the library. Caplan seeks to provide an unbiased analysis of metadata forms, emerging forms, and current and future applications. She answers questions such as: how does using metadata enhance access?; how can metadata be used to organize and describe a variety of information formats, especially digital resources?; what are the different ways you can use metadata in your library?; and which form of metadata will be most appropriate for your collection?

Social and Economic Benefits of Protected Areas Marianne Kettunen,Patrick ten Brink,2013-09-05 Protected areas (PAs) contain biodiversity and ecosystems of high conservation value. In addition, these areas provide a range of benefits, both direct and indirect, to our societies and economies, i.e. so called ecosystem services. These services include, for example, an ecosystem's ability to regulate floods and climate, purify water, secure the pollination of crops, and create opportunities for recreation, culture and tourism. This book offers a comprehensive introduction to the socio-economic benefits of PAs and PA networks and provides step-by-step practical guidance on identifying, assessing and valuing the various ecosystem services and related benefits provided by PAs. It also aims to improve the communication of PA benefits to different stakeholders and the general public. It is shown that identifying and valuing the socio-economic benefits of PAs can be beneficial for several reasons. Demonstrating socio-economic importance of a protected site can significantly increase political and stakeholder support for the site and resolve conflicts between different interest groups. This can lead to positive changes in policies and decision-making. Insights on PA benefits are also needed to identify a combination of actions and land use practices that best support the sustainable and equitable utilisation of these benefits, while retaining a site's conservation goals. Finally, demonstrating different benefits can help to discover alternative and sustainable sources for financing the management of PAs.

Hydrocephalus Ahmed Ammar,2017-12-21 This book provides the reader with a well-structured, comprehensive approach to hydrocephalus and related syndromes. It also addresses the ethical dilemmas of managing hydrocephalus, of which many neurosurgeons are unaware, and presents cutting-edge research genetic and pathophysiology research on hydrocephalus. The book presents a new classification for the Dandy Walker syndrome, based on a new understanding of different hydrocephalic problems. Further, it puts forward a wholly new theory on the pathophysiology and development of multiloculated hydrocephalus. This book helps the reader to devise a long-term strategic plan to treat patients, based on research of favorable long-term outcomes of hydrocephalus. It uniquely provides evidence-based approaches to managing hydrocephalus, presenting the experience and thoughts of renowned and highly experienced neurosurgeons from the USA, Canada, Japan, Europe and the Middle East.

The Practitioner's Guide to Data Quality Improvement David Loshin,2010-11-22 The Practitioner's Guide to Data Quality Improvement offers a comprehensive look at data quality for business and IT, encompassing people, process, and technology. It shares the fundamentals for understanding the impacts of poor data quality, and guides practitioners and managers alike in socializing, gaining sponsorship for, planning, and establishing a data quality program.
