Invisible Man Ralph Ellison, 2016-08-18 *Invisible Man* is a milestone in American literature, a book that has continued to engage readers since its appearance in 1952. A first novel by an unknown writer, it remained on the bestseller list for sixteen weeks, won the National Book Award for fiction, and established Ralph Ellison as one of the key writers of the century. The nameless narrator of the novel describes growing up in a black community in the South, attending a Negro college from which he is expelled, moving to New York and becoming the chief spokesman of the Harlem branch of the Brotherhood, and retreating amid violence and confusion to the basement lair of the Invisible Man he imagines himself to be. The book is a passionate and witty tour de force of style, strongly influenced by T.S. Eliot's *The Waste Land*, Joyce, and Dostoevsky.

Intuitive Editing Tiffany Yates Martin, 2021-03-05 Editing your own writing can feel like doing your own brain surgery. After you've completed your manuscript and you're standing at the foot of Revision Mountain, climbing to the summit can feel impossible. It's hard to look at your own writing with the objective eye needed to shape it into a tight, polished, publishable story-but just like writing, self-editing is a skill you can learn. Developmental editor Tiffany Yates Martin has spent her career in the publishing industry honing practical, actionable techniques to help authors evaluate how well their story is working, where it might not be, and how to

fix it. With a clear, accessible, user-friendly approach, she leads writers through every step of deepening and elevating their own work, as well as how to approach the edit and develop their editor brain, and how to solicit and process feedback. Intuitive Editing doesn't offer one-size-fits-all advice or rigid writing rules; instead it helps authors discover what works for their story and their style—to find the best version of their vision. Whether you're writing fiction, narrative nonfiction, or memoir; whether this your first story or your fiftieth, Intuitive Editing will give you the tools you need to edit and revise your own writing with inspiration, motivation, and confidence. Tiffany Yates Martin has spent nearly thirty years as an editor in the publishing industry, working with major publishers and bestselling authors as well as newer writers. She's led workshops and seminars for conferences and writers' groups across the country and is a frequent contributor to writers' sites and publications. Visit her at www.foxprinteditorial.com.

Operating Systems Andrew S. Tanenbaum, Albert S. Woodhull, Alfred Woodhull, 1997 This is a practical manual on operating systems, which describes a small UNIX-like operating system, demonstrating how it works and illustrating the principles underlying it. The relevant sections of the MINIX source code are described in detail, and the book has been revised to include updates in MINIX, which initially started as a v7 unix clone for a floppy-disk only 8088. It is now aimed at 386, 486 and pentium machines, and is based on the international posix standard instead of on v7. Versions of MINIX are now also available for the Macintosh and SPARC.

Hacker, Hoaxer, Whistleblower, Spy Gabriella Coleman, 2015-10-06 The ultimate book on the worldwide movement of hackers, pranksters, and activists

collectively known as Anonymous—by the writer the Huffington Post says “knows all of Anonymous’ deepest, darkest secrets” “A work of anthropology that sometimes echoes a John le Carré novel.” —Wired Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside-outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing book. The narrative brims with details unearthed from within a notoriously mysterious subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put him away, Hector Monsegur, Hacker, Hoaxer, Whistleblower, Spy is filled with insights into the meaning of digital activism and little understood facets of culture in the Internet age, including the history of “trolling,” the ethics and metaphysics of hacking, and the origins and manifold meanings of “the lulz.”

A Little Bit of Grace Phoebe Fox, 2020-08-11 A heartfelt story about family, forgiveness, and starting over when the happy ending ends—and handling it all with a little bit of grace. Family is everything—Grace Adams McHale's mom must have said it to her a thousand times before she died. Before Grace's dad ran off with an aspiring actress half his age. Before only-child Grace found out she was unable to have children of her own. Before Brian—her childhood

best friend, business partner, and finally her husband—dropped a bombshell on her in the form of her stunning new replacement. Which means Grace now has...nothing. Until she receives a letter from a woman claiming to be a relative Grace never knew she had, sending her on a journey from the childhood home she had to move back into, to a Florida island to meet a total stranger who embraces her as family. There, Grace starts to uncover answers about the eccentric woman her family never mentioned: a larger-than-life octogenarian who is the keeper of a secret held for more than fifty years, and the ultimate inspiration to always be true to yourself. As Grace gets to know this woman and picks up the pieces of her own shattered life, she is forced to question whether she can find forgiveness for the unforgivable.

Freedom in the World 2016 Freedom House, 2016-12-24 Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 195 countries and fifteen territories are used by policymakers, the media, international corporations, civic activists, and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards

are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

A History of the Photographic Lens Rudolf Kingslake, 1989-11-22 The lens is generally the most expensive and least understood part of any camera. In this book, Rudolf Kingslake traces the historical development of the various types of lenses from Daguerre's invention of photography in 1839 through lenses commonly used today. From an early lens still being manufactured for use in low-cost cameras to designs made possible through such innovations as lens coating, rare-earth glasses, and computer aided lens design and testing, the author details each major advance in design and fabrication. The book explains how and why each new lens type was developed, and why most of them have since been abandoned. This authoritative history of lens technology also includes brief biographies of several outstanding lens designers and manufacturers of the past.

Civilizing War Nasser Mufti, 2017-12-15 Winner of the Gustave O. Arlt Award

in the Humanities, awarded by the Council of Graduate Schools Honorable Mention for the 2019 Sonya Rudikoff Prize, awarded by the Northeast Victorian Studies Association *Civilizing War* traces the historical transformation of civil war from a civil affair into an uncivil crisis. Civil war is today synonymous with the global refugee crisis, often serving as grounds for liberal-humanitarian intervention and nationalist protectionism. In *Civilizing War*, Nasser Mufti situates this contemporary conjuncture in the long history of British imperialism, demonstrating how civil war has been and continues to be integral to the politics of empire. Through comparative readings of literature, criticism, historiography, and social analysis, *Civilizing War* shows how writers and intellectuals of Britain's Anglophone empire articulated a "poetics of national rupture" that defined the metropolitan nation and its colonial others. Mufti's tour de force marshals a wealth of examples as diverse as Thomas Carlyle, Benjamin Disraeli, Friedrich Engels, Arthur Conan Doyle, Rudyard Kipling, Joseph Conrad, V. S. Naipaul, Nadine Gordimer, and Michael Ondaatje to examine the variety of forms this poetics takes—metaphors, figures, tropes, puns, and plot—all of which have played a central role in Britain's civilizing mission and its afterlife. In doing so, *Civilizing War* shifts the terms of Edward Said's influential *Orientalism* to suggest that imperialism was not only organized around the norms of civility but also around narratives of civil war.

Godard On Godard Jean-luc Godard, 1986-03-22 Jean-Luc Godard, like many of his European contemporaries, came to filmmaking through film criticism. This collection of essays and interviews, ranging from his early efforts for *La Gazette du Cinéma* to his later writings for *Cahiers du Cinéma*, reflects his dazzling intelligence, biting wit, maddening judgments, and complete

unpredictability. In writing about Hitchcock, Welles, Bergman, Truffaut, Bresson, and Renoir, Godard is also writing about himself-his own experiments, obsessions, discoveries. This book offers evidence that he may be even more original as a thinker about film than as a director. Covering the period of 1950-1967, the years of *Breathless*, *A Woman Is a Woman*, *My Life to Live*, *Alphaville*, *La Chinoise*, and *Weekend*, this book of writings is an important document and a fascinating study of a vital stage in Godard's career. With commentary by Tom Milne and Richard Roud, and an extensive new foreword by Annette Michelson that reassesses Godard in light of his later films, here is an outrageous self-portrait by a director who, even now, continues to amaze and bedevil, and to chart new directions for cinema and for critical thought about its history.

Electronic Value Exchange David L. Stearns, 2011-01-04 Electronic Value Exchange examines in detail the transformation of the VISA electronic payment system from a collection of non-integrated, localized, paper-based bank credit card programs into the cooperative, global, electronic value exchange network it is today. Topics and features: provides a history of the VISA

system from the mid-1960s to the early 1980s; presents a historical narrative based on research gathered from personal documents and interviews with key actors; investigates, for the first time, both the technological and social infrastructures necessary for the VISA system to operate; supplies a detailed case study, highlighting the mutual shaping of technology and social relations, and the influence that earlier information processing practices have on the way firms adopt computers and telecommunications; examines how “gateways” in transactional networks can reinforce or undermine established social boundaries, and reviews the establishment of trust in new payment devices.

Picturing Quantum Processes Bob Coecke, Aleks Kissinger, 2017-03-16 The unique features of the quantum world are explained in this book through the language of diagrams, setting out an innovative visual method for presenting complex theories. Requiring only basic mathematical literacy, this book employs a unique formalism that builds an intuitive understanding of quantum features while eliminating the need for complex calculations. This entirely diagrammatic presentation of quantum theory represents the culmination of ten years of research, uniting classical techniques in linear algebra and Hilbert spaces with cutting-edge developments in quantum computation and foundations. Written in an entertaining and user-friendly style and including more than one hundred exercises, this book is an ideal first course in quantum theory, foundations, and computation for students from undergraduate to PhD level, as well as an opportunity for researchers from a broad range of fields, from physics to biology, linguistics, and cognitive science, to discover a new set of tools for studying processes and interaction.

Linked Data Tom Heath, Christian Bizer, 2022-05-31 The World Wide Web has

enabled the creation of a global information space comprising linked documents. As the Web becomes ever more enmeshed with our daily lives, there is a growing desire for direct access to raw data not currently available on the Web or bound up in hypertext documents. Linked Data provides a publishing paradigm in which not only documents, but also data, can be a first class citizen of the Web, thereby enabling the extension of the Web with a global data space based on open standards – the Web of Data. In this Synthesis lecture we provide readers with a detailed technical introduction to Linked Data. We begin by outlining the basic principles of Linked Data, including coverage of relevant aspects of Web architecture. The remainder of the text is based around two main themes – the publication and consumption of Linked Data. Drawing on a practical Linked Data scenario, we provide guidance and best practices on: architectural approaches to publishing Linked Data; choosing URIs and vocabularies to identify and describe resources; deciding what data to return in a description of a resource on the Web; methods and frameworks for automated linking of data sets; and testing and debugging approaches for Linked Data deployments. We give an overview of existing Linked Data applications and then examine the architectures that are used to consume Linked Data from the Web, alongside existing tools and frameworks that enable these. Readers can expect to gain a rich technical understanding of Linked Data fundamentals, as the basis for application development, research or further study. Managing Chronicity in Unequal States Laura Montesi, Melania

Calestani,2021-11-22 By portraying the circumstances of people living with chronic conditions in radically different contexts, from Alzheimer's patients in the UK to homeless people with psychiatric disorders in India, *Managing Chronicity in Unequal States* offers glimpses of what dealing with medically complex conditions in stratified societies means. While in some places the state regulates and intrudes on the most intimate aspects of chronic living, in others it is utterly and criminally absent. Either way, it is a present/absent actor that deeply conditions people's opportunities and strategies of care. This book explores how individuals, groups and communities navigate uncertain and unequal healthcare systems, in which inherent moral judgements on human worth have long-lasting effects on people's wellbeing. This is key reading for anyone wishing to deconstruct the issues at stake when analysing how care and chronicity are entangled with multiple institutional, economic, and other circumstantial factors. How people access the available informal and formal resources as well as how they react to official diagnoses and decisions are important facets of the management of chronicity. In the arena of care, people with chronic conditions find themselves negotiating restrictions and handling issues of power and (inter)dependency in relationships of inequality and proximity. This is particularly relevant in current times, when care has given in to the lure of the market, and the possibility of living a long and fulfilling life has been drastically reduced, transformed into a 'reward' for the few who have been deemed worthy of it.

Rodent Malaria R. Killick-Kendrick, 2012-12-02 Rodent Malaria reviews significant findings concerning malaria parasites of rodents, including their taxonomy, zoogeography, and evolution, along with life cycles and morphology; genetics and biochemistry; and concomitant infections. This volume is organized into eight chapters and begins by sketching out the history of the discovery of rodent as well as aspects of parasitology, immunology, and chemotherapy. These concepts are investigated two decades following Ignace Vincke's major discovery and Meir Yoeli's successful establishment of the method of cyclical transmission of the parasite. The following chapters focus on the taxonomy and systematics of the subgenus *Vinckeia*, with reference to the concepts of species and subspecies of animals and the degree to which they apply to malaria parasites, in particular to those of rodents. The discussion then shifts to how the rodent malaria parasites provide a unique insight into the subcellular organization of *Plasmodium* species, the use of rodent malaria as an experimental model to study immunological responses, and infectious agents that interact with malaria parasites. The book concludes with a chapter on malaria chemotherapy, with emphasis on the value of rodent malaria in antimalarial drug screening and the use of antimalarial drugs as

biological probes. This book will be of interest to protozoologists and physicians as well as those from other disciplines including biochemistry, immunology, pharmacology, cell biology, and genetics.

Setting the Table for Julia Child David Strauss, 2011-02-28 The movement may have introduced affluent Americans to the pleasure of French cuisine years before Julia Child, but it was Julia's lessons that expanded the audience for gourmet dining and turned lovers of French cuisine into cooks.
