Why do we colour, organize, and form the world around us - and why do we call that a profession? In this book, Thonik, an Amsterdam-based studio led by lauded designers Nikki Gonnissen and Thomas Widdershoven, researches eleven personal reasons why they design - from the need to create impact to a constant search for independence; from the benefits of systems to the urgency of play. Why We Design looks back on twenty-five years of design practice and speculates on the future of graphic design. ArtCurious Jennifer Dasal,2020-09-15 A wildly entertaining and surprisingly educational dive into art history as you've never seen it before, from the host of the beloved ArtCurious podcast We're all familiar with the works of Claude Monet, thanks in no small part to the ubiquitous reproductions of his water lilies on umbrellas, handbags, scarves, and dorm-room posters. But did you also know that Monet and his cohort were trailblazing rebels whose works were originally deemed unbelievably ugly and vulgar? And while you probably know the tale of Vincent van Gogh's suicide, you may not be aware that there's pretty compelling evidence that the artist didn't die by his own hand but was accidentally killed--or even murdered. Or how about the fact that one of Andy Warhol's most enduring legacies involves Caroline Kennedy's moldy birthday cake and a collection of toenail clippings? ArtCurious is a colorful look at the world of art history, revealing some of the strangest, funniest, and most fascinating stories behind the world's great artists and masterpieces. Through these and other incredible, weird, and wonderful tales, ArtCurious presents an engaging look at why art history is, and continues to be, a riveting and relevant world to explore.

Afrikan Alphabets Saki Mafundikwa,2007 Due to popular demand for the first edition, Mark Batty Publisher proudly announces a reissue of this title in paperback. Because the book sets the record straight about how colonial powers suppressed the rich cultural and artistic histories of Afrikan alphabets, this title should appeal to individual readers as well as schools and universities. Both entertaining and anecdotal, Afrikan Alphabets presents a wealth of highly graphical, attractive and inspiring illustrations. Writing systems across the Afrikan continent and the Diaspora are analyzed and illustrated; syllabaries, paintings, pictographs, ideographs and symbols are compared and contrasted. This colourful, extensively illustrated and informative visual journey will be of interest to everyone seeking inspiration from, or more information about, Afrikan culture and art.

The Solotype Catalog of 4,147 Display Typefaces Dan X. Solo,2014-05-05 The author of many books on typography, Dan X. Solo was also the proprietor of his own typography shop in Oakland, California — an establishment dedicated to unusual typography and special effects. This comprehensive catalog offers graphic designers a dazzling selection of over 4,000 typefaces and optical effects available from Solotype Typographers. Here, in Solo's words, is a great cast of characters — the alphabet — abetted by a cornucopia of typographical ideas and an endless resource of letters, words, phrases, slogans, logos, humorous comments, headlines, and graphic symbols. Individual sections of the book display a rich variety of typefaces in categories such as Condensed, Victorian, Art Nouveau, Art Deco, Rustic, Thick-and-tin, Calligraphic, Uncials, Latins, and Blackletter. Samples are imaginatively presented. Stagecoach, for example, is printed in Fargo typeface, evoking dusty trails, rawhide, and ten-gallon hats, while Sizzling summer savings appears appropriately in the flamboyant Firebug typeface. All typefaces are indexed for quick and easy reference. As entertaining as it is practical and useful, this impressive treasury of versatile typefaces and optical effects will be indispensable to busy commercial artists as an inexhaustible source of typographic ideas and a swipe file of words, phrases, and letters for use in graphic art projects.

A Handbook for Training Strategy Martyn Sloman,2017-07-05 When the first edition of Martyn Sloman’s Handbook appeared, it made an immediate impact on the HRD community. Its starting point was the idea that traditional approaches to training in the organization were no longer effective. The Handbook introduced a new model and set out the practical implications. The world of HRD has moved on, and Martyn Sloman has now drastically revised the text to reflect the increased complexity of organizational life and the many recent developments in the field. His aim remains the same: to help readers to develop a framework in which training can be effectively managed and delivered. In Part I of the text the author draws attention to the opportunities created for training by the current emphasis on competition through people. In Part II he poses the question: ‘What should training managers be doing to ensure that training in their organization is as good as it can be?’ Here he stresses the need to keep training aligned with business objectives, and to encourage line managers to work alongside the human resource professionals. The third and final Part considers the trainer as a strategic facilitator and examines the skills required. Martyn Sloman writes as an experienced training manager and his book is concerned, above all, with implementation. Thus the text is supported by questionnaires, survey instruments and specimen documents. With its combination of thought-provoking argument and practical guidance, the Handbook will continue to serve all those with an interest in organizational training.
