The Theory and Practice of Online Learning Terry Anderson, 2008 Neither an academic tome nor a prescriptive 'how to' guide, The Theory and Practice of Online Learning is an illuminating collection of essays by practitioners and scholars active in the complex field of distance education. Distance education has evolved significantly in its 150 years of existence. For most of this time, it was an individual pursuit defined by infrequent postal communication. But recently, three more developmental generations have emerged, supported by television and radio, teleconferencing, and computer conferencing. The early 21st century has produced a fifth generation, based on autonomous agents and intelligent, database-assisted learning, that has been referred to as Web 2.0. The second edition of The Theory and Practice of Online Learning features updates in each chapter, plus four new chapters on current distance education issues such as connectivism and social software innovations.--BOOK JACKET.

Imagine Design Create Tom Wujec, 2011-05 Imagine, Design, Create offers a wide-ranging look at how the creative process and the tools of design are dramatically changing--and where design is headed in the coming years. Bringing together stories of good design happening around the world, the book shows how people are using fresh design approaches and new capabilities to solve problems, create opportunities, and improve the way we live and work. From the impact of SOM's Cathedral of Christ the Light in Oakland to the spark that inspired Thomas Heatherwick's U.K. Pavilion in Shanghai; from the new processes fueling Zaha Hadid's extraordinary architecture to the digital tools Ford is using to transform car design, each of these stories explores questions that swirl around the idea of design. How does design change our lives for the better? How is our capacity to produce good design evolving? How will the next generation of designers work? What will they make? What new areas of human experience is design opening for us? Now that designers can do almost anything--what should they do? The Publisher has two cover versions for this title. The books will ship with either a black or white cover. The interior contents are the same.

Learning in Virtual Worlds Sue Gregory, Mark J.W. Lee, Barney Dalgarno, Belinda Tynan, 2016-04-01 Three-dimensional (3D) immersive virtual worlds have been touted as being capable of facilitating highly interactive, engaging, multimodal learning experiences. Much of the evidence gathered to support these claims has been anecdotal but the potential that these environments hold to solve traditional problems in online and technology-mediated education—primarily learner isolation and student disengagement—has resulted in considerable investments in virtual world platforms like Second Life, OpenSimulator, and Open Wonderland by both professors and institutions. To justify this ongoing and sustained investment, institutions and proponents of simulated learning environments

must assemble a robust body of evidence that illustrates the most effective use of this powerful learning tool. In this authoritative collection, a team of international experts outline the emerging trends and developments in the use of 3D virtual worlds for teaching and learning. They explore aspects of learner interaction with virtual worlds, such as user wayfinding in Second Life, communication modes and perceived presence, and accessibility issues for elderly or disabled learners. They also examine advanced technologies that hold potential for the enhancement of learner immersion and discuss best practices in the design and implementation of virtual world-based learning interventions and tasks. By evaluating and documenting different methods, approaches, and strategies, the contributors to Learning in Virtual Worlds offer important information and insight to both scholars and practitioners in the field.

For the Win Cory Doctorow, 2011 A provocative and exhilarating tale of teen rebellion against global corporations from the New York Times bestselling author of Little Brother. Not far in the future... In the twenty-first century, it's not just capital that's globalized: labour is too. Workers in special economic zones are trapped in lives of poverty with no trade unions to represent their rights. But a group of teenagers from across the world are set to fight this injustice using the most surprising of tools - their online video games. In Industrial South China Matthew and his friends labour day and night as gold-farmers, amassing virtual wealth that's sold on to rich Western players, while in the slums of Mumbai 'General Robotwallah' Mala marshalls her team of online thugs on behalf of the local gang-boss, who in turn works for the game-owners. They're all being exploited, as their friend Wei-Dong, all the way over in LA, knows, but can do little about. Until they begin to realize that their similarities outweigh their differences, and agree to work together to claim their rights to fair working conditions. Under the noses of the ruling elites in China and the rest of Asia, they fight their bosses, the owners of the games and rich speculators, outsmarting them all with their gaming skills. But soon the battle will spill over from the virtual world to the real one, leaving Mala, Matthew and even Wei-Dong fighting not just for their rights, but for their lives...
