If I Die in a Combat Zone Tim O'Brien, 1979

Diary of an Airborne Ranger Frank Johnson, 2010-11-24 Perhaps the most accurate story of LRRPs at war ever to appear in print! When Frank Johnson arrived in Vietnam in 1969, he was nineteen, a young soldier untested in combat like thousands of others--but with two important differences: Johnson volunteered for the elite L Company Rangers of the 101st Airborne Division, a long range reconnaissance patrol (LRRP) unit, and he kept a secret diary, a practice forbidden by the military to protect the security of LRRP operations. Now, more than three decades later, those hastily written pages offer a rare look at the daily operations of one of the most courageous units that waged war in Vietnam. Johnson served in I Corps, in northern Vietnam, where combat was furious and the events he recounts emerge, stark and compelling: walking point in the A Shau Valley, braving enemy fire to rescue a downed comrade, surviving days and nights of relentless tension that suddenly exploded in the blinding fury of an NVA attack. Undimmed and unmuddled by the passing of years, Johnson's account is unique in the annals of Vietnam literature. Moreover, it is a timeless testimony to the sacrifice and heroism of the LRRPs who dared to risk it all.

In the Combat Zone Robin Neillands, 1998-03-01 The Green Berets. The Navy SEALs. The secret Delta Force. The British SAS. The Israeli Mossad.

Almost every country has a special force unit in their military. But what do they do, whom do they recruit, and how do they train? Robin Neillands, renowned military historian and himself a former Royal Marine Commando, tells the story of special forces since the end of the World War II, where possible in the words of the soldiers themselves. He describes the operational successes and failures, advances in military technology crucial to special force effectiveness, and the achievements, challenges, and exploits of a wide range of special force units. From the intense cold of the Korean winter, the mountains of Cyprus, and the Libyan night, to the jungle heat of Vietnam and the green hills of Northern Ireland, *In the Combat Zone* provides a compelling and revealing portrait of these highly trained troops, without the by-now banal glorification so characteristic of such discussions. As Neillands writes, A great many special forces soldiers have helped me with this book, on the understanding that I told it straight and did not use their accounts to produce yet another 'gung-ho heroes' epic. In a world plagued by terrorism and small wars, interest in special forces has never been higher and *In the Combat Zone* couldn't be more timely.

In the Combat Zone Robin Neillands, 1999-03-11 A history of the special forces worldwide since 1945 from the SAS to the US Navy Seals, and other International Special Forces from Europe and beyond. A thorough investigation of the rise of the armed forces elite groups from their inception during World War II to the present day. - including an examination of their operational role during wartime and at peace; their use as anti-terrorist specialists and their future as instant response units. The book also looks at the basics - how members of the Special Forces are recruited and how the recruits are trained. Using numerous 1st hand accounts, this is a book not glorifying the heroics of the gung ho squaddie, but a rational look at the most professional of the professional soldiers and their role in a world which is becoming ever more high tech and sophisticated.

Death, Dominance, and State-Building Roger D. Petersen, 2024 In *Death, Dominance, and State-Building*, Roger D. Petersen offers a definitive work on the course, conduct, and aftermath of the Iraq war. He uniquely combines an accessible analytical framework with detailed case studies that unpack the dynamics between the US military and various Shia and Sunni insurgents. The book covers the entire 2003-2023 period in Iraq, incorporating the insights and voices of US military personnel, Iraqi citizens, and even Iraqi insurgents. While it comprehensively covers the past in Iraq, it also draws lessons for the future of American military intervention.

Bombs, Cities, and Civilians Conrad C. Crane, 1993 As the might and capabilities of American airpower have grown during the last 60 years, so has the controversy about its use in the intentional and indiscriminate wartime bombardment of civilians. In *Bombs, Cities and Civilians*, Conrad Crane maintains that, for the most part, American airmen in World War II remained committed to precision bombing doctrine. Instead of attacking densely populated urban areas simply to erode civilian morale, Army Air Forces adhered to a policy that emphasised targeting key industrial and military sites. He demonstrates that while the British, Germans and Japanese routinely conducted indiscriminate aerial bombardment of enemy cities, American airmen consistently stayed with daylight raids against carefully selected targets, especially in Europe. Daytime precision missions were usually far more dangerous than night area attacks, but such Army Air Forces tactics increased bombing efficiency and also reduced the risk of civilian casualties.
