Atmospheric Aerosols Olivier Boucher, 2015-05-18 This textbook aims to be a one stop shop for those interested in aerosols and their impact on the climate system. It starts with some fundamentals on atmospheric aerosols, atmospheric radiation and cloud physics, then goes into techniques used for in-situ and remote sensing measurements of aerosols, data assimilation, and discusses aerosol-radiation interactions, aerosol-cloud interactions and the multiple impacts of aerosols on the climate system. The book aims to engage those interested in aerosols and their impacts on the climate system: graduate and PhD students, but also post-doctorate fellows who are new to the

field or would like to broaden their knowledge. The book includes exercises at the end of most chapters. Atmospheric aerosols are small (microscopic) particles in suspension in the atmosphere, which play multiple roles in the climate system. They interact with the energy budget through scattering and absorption of solar and terrestrial radiation. They also serve as cloud condensation and ice nuclei with impacts on the formation, evolution and properties of clouds. Finally aerosols also interact with some biogeochemical cycles. Anthropogenic emissions of aerosols are responsible for a cooling effect that has masked part of the warming due to the increased greenhouse effect since pre-industrial time. Natural aerosols also respond to climate changes as shown by observations of past climates and modelling of the future climate.

Selected case studies complement their views and lead to a summary of BPM expertise that is unique in its coverage of the most critical success factors of BPM. The second edition of this handbook has been significantly revised and extended. Each chapter has been updated to reflect the most current developments. This includes in particular new technologies such as in-memory data and process management, social media and networks. A further focus of this revised and extended edition is on the actual deployment of the proposed theoretical concepts. This volume includes a number of entire new chapters from some of the world's leading experts in the domain of BPM.

Market-Driven Management Jean-Jacques Lambin, Isabelle Schuiling, 2012-07-19
Market-Driven Management adopts a broad approach to marketing, integrating the strategic and operational elements of the discipline. Lambin's unique approach reflects how marketing operates empirically, as both a business philosophy and an action-oriented process. Motivated by the increased complexity of markets, globalisation, deregulation, and the development of e-commerce, the author challenges the traditional concept of the 4Ps and the functional roles of marketing departments, focusing instead on the concept of market orientation. The book considers all of the key market stakeholders, arguing that developing market relations and enhancing customer value is the responsibility of every member of the organization, and that the development

of this customer value is the only way for a firm to achieve profit and growth. New to this edition: - Greater coverage of ethical issues and corporate social responsibility; cultural diversity; value and branding and the economic downturn - Broad international perspective - Thoroughly revised to reflect the latest academic thinking and research With its unique approach, international cases and complementary online resources, this book is ideal for postgraduate and upper level undergraduate students of marketing, and for MBAs and Executive MBAs.

Coaching and Mentoring in the Asia Pacific Anna Blackman, Derrick Kon, David Clutterbuck, 2017-11-20 Coaching and mentoring as management approaches have spread rapidly across the Asia Pacific region. Basic concepts of supporting people in their learning, in their career journeys, and in the acquisition of wisdom are deeply rooted in all cultures, yet today, there is little agreement about what constitutes good practice. *Coaching and Mentoring in the Asia Pacific* is the first book to put coaching and mentoring into an Asia Pacific context – exploring the challenges, benefits and differences in application, both in concept and practice. Opening with a foreword from Anthony Grant, this book provides commentaries and practical case studies from a wide variety of countries, sectors and perspectives. The authors show how organizations in the Asia Pacific Region can make effective use of this powerful developmental tool, in cost-effective, culturally relevant ways. This book will be invaluable reading for students and practitioners based in,

planning to work in, or curious about coaching and mentoring in the Asia Pacific.
