Effective Interprofessional Education Hugh Barr,Ivan Koppel,Scott Reeves,Marilyn Hammick,Della S. Freeth,2008-04-15 This volume presents a systematic review of interprofessional education in health and social care. This is accompanied by a wider-ranging critique of interprofessional education, grounded by experience, and informed by sources beyond the evaluations that qualified for inclusion in the review. Synthesising the evidence base for interprofessional education nevertheless remains central, with 353 studies surveyed in the first instance, from which 107 studies form the basis for the final analysis. The book does much more than amass evidence. It revisits conventional wisdom; setting an agenda to help interested parties perform better by applying lessons learned, remedying weaknesses and renewing efforts to address unanswered questions. The first three chapters set the scene for the systematic review and its findings. The middle section of the book articulates the findings of the review. Finally, the closing chapters consider values and attitudes, theoretical perspectives and offer conclusions. Arguments, assumptions and evidence in this publication are presented to inform policy making, programme planning, teaching and research.

Collaborating for Our Future Barbara Gray,Jill Purdy,2018 Organizations turn to multistakeholder partnerships (MSPs) to meet challenges that they cannot handle alone. By tapping the resources of diverse stakeholders, MSPs develop the capability to address complex issues and problems, such as health care delivery, poverty, human rights, watershed management, education, sustainability, and innovation. This book provides a comprehensive understanding of MSPs, why they are needed, the challenges partners face in working together and how to design them effectively. Through the process of collaboration partners combine their differing strengths, vantage points and expertise to craft innovative responses to pressing societal concerns. The book offers valuable advice for leaders about how to design and scale up effective partnerships and how to address potential obstacles that partners may face. Drawing on three comprehensive cases and countless shorter examples from around the world, the book offers both practical advice for organization embarking on an MSP as well as a theoretical understanding of how partnerships function. Using an institutional theory lens, it explains how partnerships can effect change in institutional fields by reducing turbulence and negotiating a common set of norms and routines to govern partners' future interactions within the field of concern.

Collaborative Knowledge Creation Anne Moen,Anders I. Mørch,Sami Paavola,2012-10-26 This book presents perspectives on the knowledge creation metaphor of learning, and elaborates the trialogical approach to learning. The knowledge creation metaphor differs from both the acquisition and the participation metaphors. In a nutshell trialogical approaches seek to engage learners in joint work with shared objects and artefacts mediated by collaboration technology. The theoretical underpinnings stem from different origins, including Bereiter and Scardamalia's theory on knowledge building and Engeström's activity theory. The authors in this collection introduce key concepts and techniques, explain tools designed and developed to support knowledge creation, and report results from case studies in specific contexts. The book chapters integrate theoretical, methodological, empirical and technological research, to elaborate the empirical findings and to explain the design of the knowledge creation tools. The target audiences for this book are researchers, teachers and Human Resource developers interested in new perspectives on collaborative learning, technology-mediated knowledge creation, and applications of this in their own settings, for higher education, teacher training and workplace learning. The book is the result of joint efforts from many contributors who took part in the Knowledge-practices Laboratory (KP-Lab) project (2006-2011) supported by EU FP6.

Teaching and Learning Practices That Promote Sustainable Development and Active Citizenship Saúde, Sandra,Raposo, Maria Albertina,Pereira, Nuno,Rodrigues, Ana Isabel,2020-10-30 The profound changes that we are experiencing at the political, environmental, economic, social, and cultural levels of our "postmodern" society pose immense challenges to education. Crossing the Quality Chasm Institute of Medicine,Committee on Quality of Health Care in America,2001-08-19 Second in a series of publications from the Institute of Medicine's Quality of Health Care in America project Today's health care providers have more research findings and more technology available to them than ever before. Yet recent reports have raised serious doubts about the quality of health care in America. Crossing the Quality Chasm makes an urgent call for fundamental change to close the quality gap. This book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and strengthen clinical information systems. Analyzing health care organizations as complex systems, Crossing the Quality Chasm also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change.

Industry 4.0 for SMEs Dominik T. Matt,Vladimír Modrák,Helmut Zsifkovits,2020-01-03 This open access book explores the concept of Industry 4.0, which presents a considerable challenge for the production and service sectors. While digitization initiatives are usually integrated into the central corporate strategy of larger companies, smaller firms often have problems putting Industry 4.0 paradigms into practice. Small and medium-sized enterprises (SMEs) possess neither the human nor financial resources to systematically investigate the potential and risks of introducing Industry 4.0. Addressing this obstacle, the international team of authors focuses on the development of smart manufacturing concepts, logistics solutions and managerial models specifically for SMEs. Aiming to provide methodological frameworks and pilot solutions for SMEs during their digital transformation, this innovative and timely book will be of great use to scholars researching technology management, digitization and small business, as well as practitioners within manufacturing companies.

The School in the Cloud Sugata Mitra,2019-08-14 The Science and the Story of the Future of Learning Educators have been trying to harness the promise of technology in education for decades, to no avail, but we have learned that children in groups—when given access to the Internet—can learn anything by themselves. In this groundbreaking book, you'll glimpse the emerging future of learning with technology. It turns out the promise isn't in the technology itself; it's in the self-directed learning of the children who use it. In 1999, Sugata Mitra conducted the famous Hole in the Wall experiment that inspired three TED Talks and earned him the first million-dollar TED prize for research in 2013. Since then, he has conducted new research around self-organized learning environments (SOLE), building Schools in the Cloud all over the world. This new book shares the results of this research and offers • Examples of thriving Schools in the Cloud in unlikely places • Mitra's predictions on the future of learning • How to design assessments for self-organizing learning • How to build your own School in the Cloud • Clips from the documentary, The School in the Cloud Discover the future of learning by digging deep into Mitra's thought-provoking experiences, examples, and vision.

Collaborative Environmental Management Tomas M. Koontz,Toddi A. Steelman,JoAnn Carmin,Katrina Smith Korfmacher,Cassandra Moseley,Craig W. Thomas,2010-09-30 Collaboration has become a popular approach to environmental policy, planning, and management. At the urging of citizens, nongovernmental organizations, and industry, government officials at all levels have experimented with collaboration. Yet questions remain about the roles that governments play in collaboration--whether they are constructive and support collaboration, or introduce barriers. This thoughtful book analyzes a series of cases to understand how collaborative processes work and

whether government can be an equal partner even as government agencies often formally control decision making and are held accountable for the outcomes. Looking at examples where government has led, encouraged, or followed in collaboration, the authors assess how governmental actors and institutions affected the way issues were defined, the resources available for collaboration, and the organizational processes and structures that were established. Cases include collaborative efforts to manage watersheds, rivers, estuaries, farmland, endangered species habitats, and forests. The authors develop a new theoretical framework and demonstrate that government left a heavy imprint in each of the efforts. The work concludes by discussing the choices and challenges faced by governmental institutions and actors as they try to realize the potential of collaborative environmental management.

Energizing America Varun Sivaram,Colin Cunliff,David Hart,Julio Friedmann,David Sandalow,2020-09-14 Clean energy innovation is central to the fight against climate change. To rise to this challenge, the United States should launch a National Energy Innovation Mission. Led by the president and authorized by Congress, this mission should harness the nation's unmatched innovative capabilities-at research universities, federal laboratories, and private firms (both large and small), in all regions of the country-to speed the progress of clean energy technologies. To jumpstart this mission and unlock a virtuous cycle of public and private investment, the US federal government should triple its funding for energy research, development, and demonstration (RD&D) over the next five years to $25 billion by 2025. Energizing America offers policymakers a strategic framework to build a growing RD&D portfolio over the next five years, detailed fundingproposals across the full spectrum of critical energy technologies, and recommendations for immediate action.

Translational Research in Traumatic Brain Injury Daniel Laskowitz,Gerald Grant,2015-12-01 Traumatic brain injury (TBI) remains a significant source of death and permanent disability, contributing to nearly one-third of all injury related deaths in the United States and exacting a profound personal and economic toll. Despite the increased resources that have recently been brought to bear to improve our understanding of TBI, the development of new diagnostic and therapeutic approaches has been disappointingly slow. Translational Research in Traumatic Brain Injury attempts to integrate expertise from across specialties to address knowledge gaps in the field of TBI. Its chapters cover a wide scope of TBI research in five broad areas: Epidemiology Pathophysiology Diagnosis Current treatment strategies and sequelae Future therapies Specific topics discussed include the societal impact of TBI in both the civilian and military populations, neurobiology and molecular mechanisms of axonal and neuronal injury, biomarkers of traumatic brain injury and their relationship to pathology, neuroplasticity after TBI, neuroprotective and neurorestorative therapy, advanced neuroimaging of mild TBI, neurocognitive and psychiatric symptoms following mild TBI, sports-related TBI, epilepsy and PTSD following TBI, and more. The book integrates the perspectives of experts across disciplines to assist in the translation of new ideas to clinical practice and ultimately to improve the care of the brain injured patient.
