Computerized Maintenance Management Systems Made Easy Kishan Bagadia,2010-07-19

Computerized Maintenance Management Systems Software programs are increasingly being used to manage and control plant and equipment maintenance in modern manufacturing and service industries. However, 60% to 80% of all programs fail because of poor planning, costing millions of dollars. Written by an expert with over 30 years of experience, this book employs a step by step approach for evaluating the company's needs then selecting the proper CMMS.

Computerized Maintenance Management Systems Terry Wireman,1994 The extensively revised second edition of Terry Wireman's landmark introduction to CMMS has been written to assist anyone investigating the possibility of using a computer in the maintenance function. It provides the information needed to successfully evaluate, select, and implement a system. Readers unfamiliar with the earlier book will discover how progressive companies are using computer programs to achieve cost reduction and control the maintenance of any facility.

Computer-Managed Maintenance Systems William W. Cato,R. Keith Mobley,2001-12-10 Effective resource management and reliable equipment are essential for optimum plant performance. Computer-Managed Maintenance Systems goes beyond the simple selection and implementation of a CMMS. It also defines the changes in infrastructure, management philosophy and employee skills that must be implemented to gain maximum benefits from the CMMS. The book is designed to address the information needs of all levels of plant management. In this new edition, the authors have added a chapter specifically on the latest technology, Application Solution Providers (ASP) that has revolutionized the way CMMS are used and the benefits they can offer to a business. This solution provides integrated software, hardware and networking technology along with Information Technology (IT) consulting services into an outsourced package. A new appendix on Key Performance Indicators has also been added. Comprehensive, practical guide that covers selection, justification, and implementation of an effective CMMS in any facility All levels of plant management will find useful information in this step-by-step guideIncludes a new chapter on ASP technologies

Maintenance Excellence John D. Campbell, Andrew K.S. Jardine, 2001-02-13 Considering maintenance from a proactive, rather than reactive, perspective, *Maintenance Excellence* details the strategies, tools, and solutions for maximizing the productivity of physical assets—focusing on profitability potential. The editors address contemporary concerns, key terms, data requirements, critical methodologies, and essential mathematical needs. They present maintenance in a business context, review planning, measurement, feedback, and techniques related to cost, efficiency, and results, and summarize applications of tools and software from statistics and neural networks to cost-optimized models.

Computerized Maintenance Management Systems for Clinical Engineering MS. Ted Cohen, 2003

Maintenance, Replacement, and Reliability Andrew K. S. Jardine, Albert H. C. Tsang, 2021-09-15

Since the publication of the second edition in 2013, there has been an increasing interest in asset management globally, as evidenced by a series of international standards on asset management systems, to achieve excellence in asset management. This cannot be achieved without high-quality

data and the tools for data interpretation. The importance of such requirements is widely recognized by industry. The third edition of this textbook focuses on tools for physical asset management decisions that are data driven. It also uses a theoretical foundation to the tools (mathematical models) that can be used to optimize a variety of key maintenance/replacement/reliability decisions. Problem sets with answers are provided at the end of each chapter. Also available is an extensive set of PowerPoint slides and a solutions manual upon request with qualified textbook adoptions. This new edition can be used in undergraduate or post-graduate courses on physical asset management.

Service Oriented, Holonic and Multi-agent Manufacturing Systems for Industry of the Future

Theodor Borangiu, Damien Trentesaux, Paulo Leitão, Adriana Giret Boggino, Vicente Botti, 2019-08-02

This proceedings book presents selected peer-reviewed papers from the 9th International Workshop

on ‘Service Oriented, Holonic and Multi-agent Manufacturing Systems for the Industry of the Future’ organized by Universitat Politècnica de València, Spain, and held on October 3–4, 2019. The SOHOMA 2019 Workshop aimed to foster innovation in the digital transformation of manufacturing and logistics by promoting new concepts and methods and solutions through service orientation in holonic and agent-based control with distributed intelligence. The book provides insights into the theme of the SOHOMA’19 Workshop – ‘Smart anything everywhere – the vertical and horizontal manufacturing integration, ’ addressing ‘Industry of the Future’ (IoF), a term used to describe the 4th industrial revolution initiated by a new generation of adaptive, fully connected, analytical and highly efficient robotized manufacturing systems. This global IoF model describes a new stage of manufacturing, that is fully automatized and uses advanced information, communication and control technologies such as industrial IoT, cyber-physical production systems, cloud manufacturing, resource virtualization, product intelligence, and digital twin, edge and fog computing. It presents the IoF interconnection of distributed manufacturing entities using a ‘system-of-systems’ approach, discussing new types of highly

interconnected and self-organizing production resources in the entire value chain; and new types of intelligent decision-making support based on from real-time production data collected from resources, products and machine learning processing. This book is intended for researchers and engineers working in the manufacturing value chain, and specialists developing computer-based control and robotics solutions for the ‘Industry of the Future’. It is also a valuable resource for master’s and Ph.D. students in engineering sciences programs.
