PostgreSQL Query Optimization Henrietta Dombrovskaya,Boris Novikov,Anna Bailliekova,2021-05-27 Write optimized queries. This book helps you write queries that perform fast and deliver results on time. You will learn that query optimization is not a dark art practiced by a small, secretive cabal of sorcerers. Any motivated professional can learn to write efficient queries from the get-go and capably optimize existing queries. You will learn to look at the process of writing a query from the database engine's point of view, and know how to think like the database optimizer. The book begins with a discussion of what a performant system is and progresses to measuring performance and setting performance goals. It introduces different classes of queries and optimization techniques suitable to each, such as the use of indexes and specific join algorithms. You will learn to read and understand query execution plans along with techniques for influencing those plans for better performance. The book also covers advanced topics such as the use of functions and procedures, dynamic SQL, and generated queries. All of these techniques are then used together to produce performant applications, avoiding the pitfalls of object-relational mappers. What You Will Learn Identify optimization goals in OLTP and OLAP systems Read and understand PostgreSQL execution plans Distinguish between short queries and long queries Choose the right optimization technique for each query type Identify indexes that will improve query performance Optimize full table scans Avoid the pitfalls of object-relational mapping systems Optimize the entire application rather than just database queries Who This Book Is For IT professionals working in PostgreSQL who want to develop performant and scalable applications, anyone whose job title contains the words "database developer" or "database administrator or who is a backend developer charged with programming database calls, and system architects involved in the overall design of application systems running against a PostgreSQL database

The Fourth Industrial Revolution Klaus Schwab,2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive

Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Microsoft Exchange Server V5.0 Tony Redmond, 1997 Microsoft Exchange Server V5.0: Planning, Design and Implementation incorporates the author's general expertise gained from 15 years working with corporate messaging systems as well as several years specific experience working with large deployments of Exchange Server. The new functionality of Exchange V5.0 is covered, but the real value lies in the pragmatic and practical attitude taken to solving the problems posed by large-scale implementations of any messaging system. Exchange is not magic and little different to other e-mail systems; it is software that needs to be understood to be implemented well. This book helps system designers, implementation teams, and e-mail administrators understand what Exchange V5.0 is good at and where it needs human assistance to succeed. Foreword by Elaine Sharp, Worldwide Messaging Server Product Manager, Microsoft Corporation, March 1992 to October 1996 Fully covers all features of Microsoft Exchange Version 5.0 Practical guide to setting up an Exchange server.

Migrant Families and Religious Belonging G.G. Valtolina, L. Zanfrini, 2023-06 Over the past three decades, migration has become the main driver of population growth (or of preventing its decrease) in many EU countries. The presence of so many families

with a migrant background is, however, to some extent, an unexpected phenomenon arising from the permanent settlement of migrant guest workers expected to be temporary residents and from other unplanned processes such as decolonization and the influx of asylum seekers. Moreover, family reunification is today one of the main legal channels by which migrants come to Europe, so it is no coincidence that the main issues animating European public debate on inter-ethnic coexistence involve family, religion, and the relationships between genders and generations. Finally, the migrant family has to some extent, become a lens through which to analyze many key topics connected with the present and future of European societies. This work, *Migrant Families and Religious Belonging*, is a collection of nine essays exploring the relationship between family, religion, and immigration. These essays mainly focus on the integration process, with particular attention to the experience of migrants' offspring. The book consists of an introductory chapter and four thematic sections, and topics covered include gender equality, forced marriages, child fostering care, and religious radicalization. The relationship between family, religion and immigration provides a fascinating perspective to explore and shed light on European society today. The book will be of interest to a wide range of academics, researchers, and practitioners.

Law, Religion and Love Paul Babie, Vanja-Ivan Savić, 2017-09-01 Increasingly, the modern neo-liberal world marginalises any notion of religion or spirituality, leaving little or no room for the sacred in the public sphere. While this process advances, the conservative and harmful behaviours associated with some religions and their adherents exacerbate this marginalisation by driving out those who remain religious or spiritual. And all of this is seen through the lens of social science, which seems to agree that religion remains important, if not in spiritual sense, at least as a source of folklore and a means of identification: religions remain rooted in the societies from which they emerged, and the legal systems of many of those societies emerged from religious sources, even if those societies remain unwilling to admit that fact. In the modern materialistic world of conformity, religion is less a source of guidance than a label of identification. The world therefore faces two issues. First, the decreasing level of spirituality in the 'West' widens the gap between worshippers and those who have left their faith (eg agnostics and atheists, or those who look at religion as a matter of 'picking and choosing' from a range of options). And, second, the strong connections to religion which remain in many nations, but which are often misused in the secular public sphere (both in the West and internationally). In such divided worlds, both religious and secular forces tend to lock themselves into closed groupings of 'pure truth' and in so doing increase the level of disagreement, in turn producing radicalism. In short, the modern world is divided in two ways: between religious and non-religious (although some have argued that the non-religious secular is itself a form of civil religion), and between those subscribing to divergent understandings of the same religious tradition. While hyperbolic and histrionic, the term 'culture wars' nonetheless best captures what we see happening in the public sphere today. The question emerges, then: how best to accommodate the democratic principle which posits that the majority should feel that it lives in a society of its own with the human rights principle, holding that is necessary to ensure the full protection of the minority's rights? How to balance these seemingly opposed principles? We are very familiar with the differences that appear between secular and sacred in the modern world; yet, what of the similarities amongst scriptures and laws which seek to encourage mutual understanding, cooperation and even cohabitation? Because religion itself is a source of law, a set of exhortations or commands as much as a set of rights, every major religion offers an approach to encountering 'the Other' in a positive, constructive, affirming way; and it is here that religions reveal much that they have in common. This book draws together the work of

scholars engaged in exploring the possibilities for a 'utopian' world in the sense fostered by St Thomas More. The essays explore those dimensions of religious and civil law where 'love' – however that is defined by relevant texts – fosters and encourages acceptance of 'the Other' and will offer perspectives on the ways in which religious or civil/state law command one to act in the spirit of 'love'.

Western Pennsylvania All-Outdoors Atlas & Field Guide Sportsman's Connection,2016-08-15 Sportsman's Connection's Western Pennsylvania All-Outdoors Atlas & Field Guide contains maps created at twice the scale of other road atlases, which means double the detail. And while the maps are sure to be the finest quality you have ever used, the thing that makes this book unique is all the additional information. Enterprise Integration Patterns Gregor Hohpe,Bobby Woolf,2012-03-09 Enterprise Integration Patterns provides an invaluable catalog of sixty-five patterns, with real-world solutions that demonstrate the formidable of messaging and help you to design effective messaging solutions for your enterprise. The authors also include examples covering a variety of different integration technologies, such as JMS, MSMQ, TIBCO ActiveEnterprise, Microsoft BizTalk, SOAP, and XSL. A case study describing a bond trading system illustrates the patterns in practice, and the book offers a look at emerging standards, as well as insights into what the future of enterprise integration might hold. This book provides a consistent vocabulary and visual notation framework to describe large-scale integration solutions across many technologies. It also explores in detail the advantages and limitations of asynchronous messaging architectures. The authors present practical advice on designing code that connects an application to a messaging system, and provide extensive information to help you determine when to send a message, how to route it to the proper destination, and how to monitor the health of a messaging system. If you want to know how to manage, monitor, and maintain a messaging system once it is in use, get this book.

Services Liberalization in ASEAN Tham Siew Yean,2018-05-24 The services sector plays an important role in ASEAN economies as it accounts for about half of the region's GDP and more than 45 per cent of its total employment. ASEAN aspires to deepen integration in the services sector in order to enhance the sector's contribution to economic development and growth in each country. Despite this, services liberalization has progressed slowly compared to goods liberalization both at the multilateral and the regional levels. Different regulatory mechanisms across countries have contributed to the slow pace of liberalization. Logistics is an important industry in the services sector. The integration of logistics is important for deepening economic integration in ASEAN as it facilitates the movement of goods, services and people within and across countries, among producers and from producers to consumers. In view of its importance, ASEAN has identified logistics as one of its priority integration sectors. It has also developed a Connectivity Master Plan and a Strategic Transport Plan, where logistics plays an important role. This book examines the current state of services liberalization in the ten ASEAN economies. It also assesses the FDI enabling environment and the extent of FDI liberalization in the logistics sector as well as the liberalization challenges encountered in each of the ASEAN economies. The book, thus, provides a comparative picture of services liberalization as well as the state of logistics liberalization and development in each of the ten ASEAN member countries. All these have important bearings on deepening ASEAN economic integration for 2025 and beyond.
