Carbon Risk and Green Finance Aaron Ezroj,2020-12-28 As the world plans for economic recovery following the global COVID-19 pandemic, major economies are looking to comprehensive strategies for addressing carbon risks and identifying green finance opportunities. Since Bank of England Governor Mark Carney and Michael Bloomberg began tackling climate change as a financial concern, the international financial community has been developing sophisticated analytical tools that will enable the success of comprehensive efforts to address carbon risks and identify green finance opportunities. This timely publication offers a cutting-edge analysis of the financial aspects of climate change. It discusses the most important analytical tools, their origin, how they work, where they can go, and how they fit into a larger strategy. First, reporting frameworks can allow companies to see how well they are addressing carbon risks, in particular with respect to the recommendations of the Task Force on Climate-related Financial Disclosures. Second, by quantifying how much greenhouse gas companies emit into the atmosphere as a direct or indirect result of their operations, carbon footprint calculations can help identify carbon risks with particular companies, especially within supply chains. Third, brown taxonomies can help investors identify current carbon risks by classifying fossil fuel assets in a systematic manner. Fourth, green taxonomies can help investors identify current green finance opportunities by classifying sustainable activities in a systematic manner. Fifth, scenario analysis for assets can help investors identify future carbon risks and green finance opportunities. Finally, stress testing for liabilities can help insurers and banks address future carbon risks and better inform policymakers. Scholars, policymakers, and business professionals will find this book informative. They will gain a comprehensive understanding of the analytical tools supporting efforts to address carbon risks and identify green finance opportunities. This will hopefully make these individuals more successful in their personal endeavors to build a more sustainable and resilient economy for future generations.

Prehistoric and Protohistoric Cyprus A. Bernard Knapp,2008-02-21 A new island archaeology and island history of Bronze Age and early Iron Age Cyprus, set in its Mediterranean context. In this extensively illustrated study, A. Bernard Knapp addresses an under-studied but dynamic new field of archaeological enquiry - the social identity of prehistoric and protohistoric Mediterranean islanders.

Migration Processes in the Soil and Groundwater Zone (1991) Ludwig Luckner,2017-11-22 This comprehensive work integrates knowledge from physics, chemistry, biology, mathematics, geology, engineering, and several other fields. Its purpose is to provide solution methods, techniques of parameter estimation, and tools for solving the complex problems of mathematical modeling. The main topics presented include fundamentals of mathematical modeling of migration processes; analytical, numerical, and inverse solutions to migration problems; and techniques of parameter estimation and monitoring of migration processes. The book is perfect for anyone involved in the areas of hydrogeology, soil science, environmental engineering, subsurface cleanup, water sciences, agronomy, land development, and civil engineering. It provides professionals with a survey of the methodology of migration model building, the mathematical tools for solving these models, and the technique of parameter estimation in laboratories and in the field. Consultants will appreciate the book's multidisciplinary theoretical background and first approximations for a broad variety of migration data. Professors and students gain an integrated survey of subsurface solute and heat transport, storage, transformation, and exchange processes in both theoretical and practical applications, complete with example problems and solutions.

Distortions to Agricultural Incentives in Europe's Transition Economies Kym Anderson,Johan Swinnen,2008-06-05 The vast majority of the world's poorest households depend on farming for their livelihood. During the 1960s and 1970s, most developing countries imposed pro-urban and anti-agricultural policies, while many high-income countries restricted agricultural imports and subsidized their farmers. Both sets of policies inhibited economic growth and poverty alleviation in developing countries. Although progress has been made over the past two decades to reduce those policy biases, many trade- and welfare-reducing price distortions remain between agriculture and other sectors as well as within the agricultural sector of both rich and poor countries. Comprehensive empirical studies of the disarray in world agricultural markets first appeared approximately 20 years ago. Since then the OECD has provided estimates each year of market distortions in high-income countries, but there has been no comparable estimates for the world's developing countries. This volume is the first in a series (other volumes cover Africa, Asia, and Latin America) that not only fill that void for recent years but extend the estimates in a consistent and comparable way back in time--and provide analytical narratives for scores of countries that shed light on the evolving nature and extent of policy interventions over the past half-century. 'Distortions to Agricultural Incentives in Europe's Transition Economies' provides an overview of the evolution of distortions to agricultural incentives caused by price and trade policies in the economies of Eastern Europe and Central Asia that are transitioning away from central planning. The book includes country and subregional studies of the ten transition economies of Central and Eastern Europe that joined the European Union in 2004 or 2007, of seven other large member countries of the Commonwealth of Independent States, and of Turkey. Together these countries comprise over 90 percent of the Europe and Central Asia region's population and GDP. Sectoral, trade, and exchange rate policies in the region have changed greatly since the dissolution of the Soviet Union in 1991, but price distortions remain. The new empirical indicators in these country studies provide a strong evidence-based foundation for evaluating policy options in the years ahead.

African Economies in Transition J. Paulson,2016-07-27 An authoritative assessment of the reform efforts in African economies during the 1980s and early 1990s. The focus is on the reform process in the socialist countries which began from a position of pervasive state intervention. The impact of the subsequent economic liberalization and the changing role of the state during the period of transition is the focus of this theoretical overview, with particular coverage of macroeconomic management and the privatization of state enterprises. A companion volume (0-333-71237-4) contains in-depth country studies. These books are the first in an important new series in association with the Centre for the Study of African Economies, University of Oxford.

Globalization and Policy Challenges for Economies in Transition Rob Vos,Malinka Koparanova,2011-01-01 The countries in Central and Eastern Europe and the Commonwealth of Independent States have opened up their economies to the world economy as a step towards a profound transformation from plan to market. Some have fully integrated into the European market while others

have not. This book focuses on the challenges economies face when in transition.

Migration in Africa Michiel de Haas, Ewout Frankema, 2022-03-30 This book introduces readers to the age of intra-African migration, a period from the mid-19th century onward in which the center of gravity of African migration moved decisively inward. Most books tend to zoom in on Africa's external migration during the earlier intercontinental slave trades and the more recent outmigration to the Global North, but this book argues that migration within the continent has been far more central to the lives of Africans over the course of the last two centuries. The book demonstrates that only by taking a broad historical and continent-wide perspective can we understand the distinctions between the more immediate drivers of migration and deeper patterns of change over time. During the 19th century Africa's external slave trades gradually declined, whilst Africa's expanding commodity export sectors drew in domestic labor. This led to an era of heightened mobility within the region, marked by rapidly rising and vanishing migratory flows, increasingly diversified landscapes of migration systems, and profound long-term shifts in the wider patterns of migration. This era of inward-focused mobility reduced with a resurgence of outmigration after 1960, when Africans became more deliberate in search of extra-continental destinations, with new diaspora communities emerging specifically in the Global North. Broad ranging in its temporal, spatial, and thematic coverage, this book provides students and researchers with the perfect introduction to age of intra-African migration.

Linking Language, Trade and Migration Ruriko Otomo, 2023-06-21 This book examines the effect of trade policy on language which represents an underrecognized area in the field of language policy and planning. It argues that trade policies like Japan's Economic Partnership Agreements (EPAs) have important consequences for national language (education) policies and for discourses about language and nation. Since 2008, Japan has signed the EPAs with Indonesia, the Philippines and Vietnam to recruit migrant nurses and eldercare workers and manage their mobility by means of pre-employment language training and the Japanese-medium licensure examinations. Through the analysis of these language management devices, this book demonstrates that the EPAs are a manifestation and representation of contemporary language issues intertwined particularly with pressing issues of Japan's social aging and demographic change. As the EPAs are intertwined with welfare, economy, social cohesion, and international political and economic relations and competitiveness, the book presents a far more complex picture of and a richer potential of language policy.

Trade and Migration in the Modern World Carl Mosk, 2007-05-07 Revolutionized by the growing use of fossil fuels and electricity and the reduced costs of transportation and communications, international trade and migration has received an unprecedented boost in recent years. Using a theory of economic and political gravitation, backed up with both quantitative analysis and qualitative description, Mosk argues that the tendency for trade and migration to flow together is tempered by market forces and political resistance to diversity in migration. This results in a glaring paradox: the political arenas of nation states are divided between embracing and opposing diversity in immigration, the same immigration flows their own policies helped create. A remarkable volume, this book will be invaluable to students of economics demographic historians, policy makers and political scientists.

The Effects and Consequences of Migration and Immigration on the Lebanese Economy and Tourism Sector Mohammad Makki, Nadine Sinno, 2018-07-27 This book tackles several important and timely topics with regards to Lebanon, especially after the Syrian conflict. The contributions here analyse the situation of the internal and external Lebanese economy and tourism, and shed light on the causes and effects of migration and immigration. The articles provide detailed insight into private and public policies, and offer a holistic analysis that enables the reader to benefit from their suggested recommendations. The book can be used as a reference book for scholars and practitioners in the public and private sectors interested in Middle Eastern politics, economics forecasting, marketing and tourism studies. The articles were originally presented and discussed at the Second Local Economics and Tourism Conference held in May 2017 at the Lebanese International University.

Coming Home to a Foreign Country Soon Keong Ong, 2021-08-15 Ong Soon Keong explores the unique position of the treaty port Xiamen (Amoy) within the China-Southeast Asia migrant circuit and examines its role in the creation of Chinese diasporas. Coming Home to a Foreign Country addresses how migration affected those who moved out of China and later returned to participate in the city's economic revitalization, educational advancement, and urban reconstruction. Ong shows how the mobility of overseas Chinese allowed them to shape their personal and community identities for pragmatic and political gains. This resulted in migrants who returned with new money, knowledge, and visions acquired abroad, which changed the landscape of their homeland and the lives of those who stayed. Placing late Qing and Republican China in a transnational context, Coming Home to a Foreign Country explores the multilayered social and cultural interactions between China and

Southeast Asia. Ong investigates the role of Xiamen in the creation of a China-Southeast Asia migrant circuit; the activities of aspiring and returned migrants in Xiamen; the accumulation and manipulation of multiple identities by Southeast Asian Chinese as political conditions changed; and the motivations behind the return of Southeast Asian Chinese and their continual involvement in mainland Chinese affairs. For Chinese migrants, Ong argues, the idea of home was something consciously constructed. Ong complicates familiar narratives of Chinese history to show how the emigration and return of overseas Chinese helped transform Xiamen from a marginal trading outpost at the edge of the Chinese empire to a modern, prosperous city and one of the most important migration hubs by the 1930s.

Migration and Poverty Edmundo Murrugarra,Jennica Larrison,Marcin Sasin,2010-11-24 This volume uses recent research from the World Bank to document and analyze the bidirectional relationship between poverty and migration in developing countries. The case studies chapters compiled in this book (from Tanzania, Nepal, Albania and Nicaragua), as well as the last, policy-oriented chapter illustrate the diversity of migration experience and tackle the complicated nexus between migration and poverty reduction. Two main messages emerge: Although evidence indicates that migration reduces poverty, it also shows that migration opportunities of the poor differ from that of the rest. In general, the evidence suggests that the poor either migrate less or migrate to low return destinations. As a consequence, many developing countries are not maximizing the poverty-reducing potential of migration. The main reason behind this outcome is difficulties in access to remunerative migration opportunities and the high costs associated with migrating. It is shown, for example, that reducing migration costs makes migration more pro-poor. The volume shows that developing countries governments are not without means to improve this situation. Several of the country examples offer a few policy recommendations towards this end.

Handbook of Chinese Migration Robyn R. Iredale,Fei Guo,2015-12-18 The recent unprecedented scale of Chinese migration has had far-reaching consequences. Within China, many villages have been drained of their young and most able workers, cities have been swamped by the ‘floating population’, and many rural migrants have been unable to integrate into urban society. Internationally, the Chinese have become increasingly more mobile. This Handbook provides a unique collection of new and original research on internal and international Chinese migration and its effects on the sense of belonging of migrants.
