Lehmann,Ervin Y. Rodin,1992 Hardbound. Semantic Networks are graphic structures used to represent concepts and knowledge in computers. This major collection addresses every level of reader interested in the field of knowledge representation. Easy to read surveys of the main research families, most written by the founders, are followed by 25 widely varied articles on semantic networks and the conceptual structure of the world. Some extend ideas of philosopher Charles S Peirce 100 years ahead of his time. Others show connections to databases, lattice theory, semiotics, real-world ontology, graph-grammers, lexicography, relational algebras, property inheritance and semantic primitives. Hundreds of pictures show semantic networks as a visual language of thought.

Brewing a Boycott Allyson P. Brantley,2021-04-06 In the late

twentieth century, nothing united union members, progressive students, Black and Chicano activists, Native Americans, feminists, and members of the LGBTQ+ community quite as well as Coors beer. They came together not in praise of the ice cold beverage but rather to fight a common enemy: the Colorado-based Coors Brewing Company. Wielding the consumer boycott as their weapon of choice, activists targeted Coors for allegations of antiunionism, discrimination, and conservative political ties. Over decades of organizing and coalition-building from the 1950s to the 1990s, anti-Coors activists molded the boycott into a powerful means of political protest. In this first narrative history of one of the longest boycott campaigns in U.S. history, Allyson P. Brantley draws from a broad archive as well as oral history interviews with long-time boycotters to offer a compelling, grassroots view of anti-corporate organizing and the unlikely coalitions that formed in opposition to the iconic Rocky Mountain brew. The story highlights the vibrancy of activism in the final decades of the twentieth century and the enduring legacy of that organizing for communities, consumer activists, and corporations today.

**The Mayor of Castro Street** Randy Shilts, 2008-10-14 A biography of Harvey Milk, the first openly gay city official in the nation, recounts his public and personal life, and examines the emergence of the San Francisco gay community as a social and political force.

Knowledge Representation Han Reichgelt, 1991 Most researchers to date in artificial intelligence have been based on the knowledge representation hypothesis, that is, the assumption that in any artificial intelligence (AI) programme there is a separate module which represents the information that the programme has about the world. As a result, a number of so-called knowledge representation formalisms have been developed for representing this kind of information in a

computer.

*Farm Animal Behaviour and Welfare* Andrew F. Fraser, 1990

*Food Authentication* Philip R. Ashurst, M.J. Dennis, 2013-11-11

The issue of food authenticity is not new. For centuries unscrupulous farmers and traders have attempted to 'extend', or otherwise alter, their products to maximise revenues. In recent years the subject has reached new prominence and there even have been situations where food authenticity has featured as a newspaper headline in various countries. Food legislation covering the definition, and in some cases composition, of various commodities has been in place in developed countries for many years and paradoxically it is the legislative trend away from emphasis on composition and more on accurate and truthful labelling that has been one driving force for the authenticity issue. Another, and many would speculate as the more potent, driving force is the move towards fewer and larger supermarket chains in many countries. Such trading companies with their images of quality products, buying power and commercial standing, exercise

considerable commercial power which has been claimed as a significant source of financial pressure on food prices and food commodity product quality. For whatever reason, recent food authenticity issues have become news and consumers, the media and enforcement authorities are showing more interest than ever before in the subject.
