The Fourth Industrial Revolution Klaus Schwab,2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business,

civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

The FBI Story ,

The 2030 Spike Colin Mason,2013-06-17 The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

Spam Kings Brian S McWilliams,2014-09-09 More than sixty percent of today's email traffic is spam. In 2004 alone, five trillion spam messages clogged Internet users' in-boxes, costing society an estimated \$10 billion in filtering software and lost productivity. This expose explores the shadowy world of the people responsible for today's junk-email epidemic.

Investigative journalist Brian McWilliams delivers a fascinating account of the cat-and-mouse game played by spam entrepreneurs in search of easy fortunes and anti-spam activists. McWilliams chronicles the activities of several spam kings, including Davis Wolfgang Hawke, a notorious Jewish-born neo-Nazi leader. The book traces this 20-year-old neophyte's rise in the trade, where he became a major player in the lucrative penis pill market - a business that would eventually make him a millionaire and the target of lawsuits from AOL and others. Spam Kings also tells the story of anti-spam cyber-vigilantes like Susan Gunn, a computer novice in California, whose outrage led her to join a group of anti-spam activists. Her volunteer sleuthing put her on a collision course with Hawke and other spammers, who sought revenge on their pursuers. The book sheds light on the technical sleight-of-hand and sleazy business practices that spammers use - forged headers, open relays, harvesting tools, and bulletproof hosting - and warns of the ever-inventive spammers' development of new types of spam.--Jacket.
