International Monetary Fund. Statistics

Dept., 2018-03-01 This paper discusses that for

countries that have introduced new currencies, the

rates shown in International Financial Statistics

(IFS) for the period before the introduction of

the most recent currency may be used as conversion

factors—they may be used to convert national

currency in IFS to US dollar or SDR. In such

cases, the factors are constructed by chain

linking the exchange rates of the old and the new

currencies. The basis used is the value of the new

currency relative to the old currency, as

established by the issuing agency at the time the

new currency was introduced. Notes on the

introduction of new currencies can be found in the

Country Notes or in IFS print publication (if

recent). Data on members' IMF accounts are presented in the Fund Position section in the country tables and in four world tables. Terms and concepts of IMF accounts and the time series in the country and world tables are explained below.
