Shaping Literate Minds Linda Dorn, Carla Soffos, 2023-10-10 How can teachers create a literacy curriculum that builds processing links between reading, writing, and spelling knowledge? In *Shaping Literate Minds: Developing Self Regulated Learners*, Linda J. Dorn and Carla Soffos illustrate how processing theory can be applied to the everyday practices of classroom teaching. If instruction emphasizes the interrelationships of these three language areas, students learn how to transfer knowledge, skills, and strategies across literacy events. This is complex theory, but the authors provide clear and practical examples to support teachers as they incorporate these ideas into their classroom practices. Grounded in authentic experiences from primary classrooms, this book provides: Explanations of processing behaviors among reading, writing, and spelling knowledge; Observational tools that support teachers in noticing changes over time in specific literacy behaviors; Guidance on creating conditions for developing self-regulated learners; Authentic reading and writing samples and teacher/student interactions; Figures and pictures that clearly describe how teachers can use assessment to inform and guide instruction, with links to national standards; Details for establishing a school-based literacy model that includes team meetings, assessment walls, high standards, and a curriculum for literacy; Appendixes with reproducible assessment checklists, report cards, task cards for literacy corners, and guided reading observation forms for team meetings. With a national emphasis on accountability, high standards, and literacy achievement, *Shaping Literate Minds* will help teachers and administrators implement a high-quality literacy curriculum that links to national and state goals.

Guided Inquiry Design® in Action Leslie K. Maniotes, LaDawna Harrington, Patrice Lambusta, 2015-12-07 Supplying classroom-tested lessons and unit plans that can serve as templates, this book demonstrates exactly how to integrate and implement Guided Inquiry Design® (GID) theory into practice. Guided Inquiry is an approach that many educators—thought leaders and practitioners alike—are finding to be well-suited to information-age learning and a way to meet Common Core Standards. For many teachers,

librarians, middle school leaders, and curriculum specialists, the biggest challenge is finding examples of guided inquiry in practice applicable to their own context. This guide offers an easy solution, offering ready-to-use templates and models for implementing Guided Inquiry Design® (GID) in the middle school learning environment. With each supplied lesson laid out according to the session plan templates from GID and a thorough description of the ideal inquiry process from beginning to end, integration and implementation of GID is attainable. Besides showing how to put GID to best use to achieve five kinds of learning through inquiry, the book provides an explicit structure for developing instructional partnerships and collaborative teams within the school and with the larger community. It enables teachers, school librarians, and other educational partners to consider and plan for achieving outcomes that bring about deep understanding while also addressing curricular goals. Readers will be better equipped to provide an authentic learning environment using collaboration, discussion, and reflection embedded in the sessions, thereby helping their students to be able to think creatively to solve problems.

International Collaborations in Literacy Research and Practice Cynthia B. Leung,Janet C. Richards,Cynthia A. Lassonde,2014-01-01 Literacy researchers and educators are currently involved in exciting international literacy projects. However, many in the field are not aware of these initiatives. In compiling this edited volume, our intent is to provide a resource book for university instructors and research faculty with examples of international literacy projects and what was learned from the projects. Chapter contributors offer stories of real people who collaborate across nations to exchange ideas, promote literacy development, and increase global understandings. The literacy initiatives presented in this book show how literacy colleagues have provided opportunities for students and educators of different countries to communicate in meaningful ways. Through international literacy projects and research, participants work to forge relationships based on mutual respect, despite their differing cultures and languages. They see their work as based on the mutual connectedness to the human community.
