New Information Technology in the Education of Disabled Children and Adults David Hawkrige, Tom Vincent, Gerald Hales, 2018-09-03 First published in 1985. Information technology can offer huge benefits to the disabled. It can help many disabled people to overcome barriers of time and space and to a much greater extent it can help them to overcome barriers of communication. In that way new information technology offers opportunities to neutralise the worst effects of many kinds of disablement. This book reviews the possibilities of using information technology in the education of the disabled. Commencing with an assessment of the learning problems faced by disabled people, it goes on to look at the scope of information technology and how it has been used for the education of students of all ages, particularly in the United Kingdom and the United States. A penultimate section considers most of the contentious issues that faced users of technology, whilst the conclusion devotes itself to the immediate and longer-term future, suggesting possible future trends and the consequent problems that may arise.

Bembo's Zoo Roberto de Vicq de Cumptich, 2000-04-01 A stylish animal alphabet book with illustrations created from the letters in each animal's name. Bold color and simple yet striking graphics make a unique alphabet book that will appeal to readers of all ages. The Bembo typeface is one of the most elegant of the classic typefaces, and its clean, graceful

lines inspired the artist to use the letters in a wholly new way. From antelope to zebra-with such exotic beasts as iguanas and narwhals in between-this menagerie of animals has been created with only the shapes of the letters in each animal's name. Children will have fun playing I spy with the letters in each picture, and adults will admire the sophisticated art and sleek design of this sumptuous book.

Learning and Teaching Early Math Douglas H. Clements,Julie Sarama,2009-04-01 In this important new book for pre- and in-service teachers, early math experts Douglas Clements and Julie Sarama show how learning trajectories help teachers become more effective professionals. By opening up new windows to seeing young children and the inherent delight and curiosity behind their mathematical reasoning, learning trajectories ultimately make teaching more joyous. They help teachers understand the varying level of knowledge and thinking of their classes and the individuals within them as key in serving the needs of all children. In straightforward, no-nonsense language, this book summarizes what is known about how children learn mathematics, and how to build on what they know to realize more effective teaching practice. It will help teachers understand the learning trajectories of early mathematics and become quintessential professionals.

PACT, Partners in Augmentative Communication Training Delva M. Culp,Margaret Carlisle,1988 Partners in Augmentative Communication Training (PACT) is a communication interaction facilitation program for child augmentative technique users and their

communication partners. The program offers guidelines for use in developing individualized plans for improving conversational interaction. This resource guide addresses priority communication behaviors, communication assessment, communication intervention, and psychological considerations. Priority Communication Behaviors presents a functional outline to view the interaction behaviors of the child and the partner, focusing on communication functions, mode selections, and discourse behaviors. Communication Assessment Guidelines introduces procedures for observing the communication attitudes and interaction skills of an augmentative technique user and partner, and includes a Partner Rating Scale, Child Rating Scale, and Interaction Profile. Communication Intervention Guidelines offers an intervention plan, child goals, partner goals, language activities, communication experience activities, role plays, etc. The guidelines highlight behaviors of concern and provide strategies to effectively use those behaviors in achieving more functional communication. Concluding chapters focus on psychological assessment and intervention procedures and outline the results of a PACT pilot study involving 11 children with cerebral palsy. (JDD)

Research on Classroom Ecologies Deborah L. Speece,Barbara K. Keogh,2013-04-03 Written during a period of reexamination and change in the field of special education, this book was developed in order to provide a better understanding of the contexts in which children receive their formal education. The movement toward the least restrictive

environment for the education of children with disabilities is weathering a wave of reinterpretations including mainstreaming, the regular education initiative, and inclusion. While each interpretation has its proponents and critics, limited theory and few data are available to guide these important policy decisions. Focusing specifically on classrooms -- the settings where educators can have the most immediate impact and where research is most needed -- this volume's goals are: * to establish what is known about classroom ecologies from both general and special education perspectives, * to integrate the perspectives of researchers and practitioners, and * to chart directions for further research specifically related to children with learning disabilities. The construct of classroom ecology is defined as three interrelated domains: instruction, teacher and peer interaction, and organization and management. This scheme provides the structure for the book. Taken as a whole, the content of the volume underscores the limits of current knowledge and at the same time provides directions for needed changes in both research and practice.

Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth Through Age 8, Fourth Edition (Fully Revised and Updated) Naeyc, 2021-08 The long-awaited new edition of NAEYC's book Developmentally Appropriate Practice in Early Childhood Programs is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and

general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.
