Transitions to Alternative Vehicles and Fuels National Research Council,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee on Transitions to Alternative Vehicles and Fuels,2013-04-14 For a century, almost all light-duty vehicles (LDVs)

have been powered by internal combustion engines operating on petroleum fuels. Energy security concerns about petroleum imports and the effect of greenhouse gas (GHG) emissions on global climate are driving interest in alternatives. Transitions to Alternative Vehicles and Fuels assesses the potential for reducing petroleum consumption and GHG emissions by 80 percent across the U.S. LDV fleet by 2050, relative to 2005. This report examines the current capability and estimated future performance and costs for each vehicle type and non-petroleum-based fuel technology as options that could significantly contribute to these goals. By analyzing scenarios that combine various fuel and vehicle pathways, the report also identifies barriers to implementation of these technologies and suggests policies to achieve the desired reductions. Several scenarios are promising, but strong, and effective policies such as research and development, subsidies, energy taxes, or regulations will be necessary to overcome barriers, such as cost and consumer choice.

Archives and Archiving K. J. Rawson, Aaron Devor, 2015-11-05 The humanization of the archival craft is particularly compelling for transgender-related archives and archiving. As attention to transgender phenomena continues to increase, the need for thoughtfully conceived and ethically executed trans archival practices becomes all the more pressing. Yet the very basis of this undertaking relies on a daunting definitional and epistemological challenge: in the context of archives, what counts as transgender? This issue of TSQ will investigate practical and theoretical dimensions of archiving transgender phenomena and will ask what constitutes trans* archives or trans* archival practices.

Gurps Bio-Tech David Morgan-Mar, David L. Pulver, 2017-02-16 The Future is Alive Who needs chrome, pal? Meat is where it's at now. Mother Nature always did it best -- she just needed a little help. Get down to the black clinic, old-

timer, and you can be 15 again. That is, if you still want to be human at all. It's the technology of the posthuman age: biotech! Upgrade your old body with steroids and smart drugs, transplants, and viral nano . . . or just get a new one. Maybe you don't think being human is so great? Then improve on nature with eugenics and gene-fixing. Or just go parahuman: if you love cats, become one! The technology's changing fast, but you'll have lots of time to get used to it -- death is only a temporary inconvenience with cryonics and immortality drugs. And who needs silicon and steel? Vatbrain biocomputers are where it's really at! But it's not just about the future. GURPS Bio-Tech includes a full range of 19th, 20th, and 21st-century medical equipment, from early vaccines to surgical robots, along with game stats for the world's most deadly diseases. GURPS Bio-Tech also includes a complete set of character templates for biotech professions, rules for biotech magic, and two original campaign settings: an alternate Earth ruled by a clone of Alexander the Great, and a living starship on its way to colonize an alien world! Say goodbye to your old body. Have you upgraded your genetics this year? This is the second edition of GURPS Bio-Tech. It has been revised to the GURPS Fourth Edition rules and expanded to cover medicine, drugs, magic, and new technologies. Some entries were introduced in GURPS Space, GURPS Robots, and the Transhuman Space series.
