Epilepsy and Intellectual Disabilities Vee P. Prasher, Mike Kerr, 2016-10-24 This second edition of a successful book provides updated clinical and research knowledge, including information on the licensing of new antiepileptic drugs. All chapters are updated to reflect present accepted practice. New chapters highlighting the importance of the genetic aspects of epilepsy, nonpharmacological treatments, and the impact of epilepsy on families and carers have been added. Ongoing developments in the general population, which will more likely than not become relevant to the intellectually disabled population, are discussed. The impact of epilepsy on the person themselves and their carers is acknowledged, and person-centred treatment programs with a multifaceted team approach are proposed. This book is aimed at physicians and residents in neurology and pediatrics, as well as other practitioners working with this population, such as neuropsychologists. *Epilepsy and Intellectual Disabilities, Second Edition* is recommended reading for all those caring for this important group of individuals.

Well Logging and Formation Evaluation Toby Darling, 2005-05-26 This hand guide in the Gulf Drilling Guides series offers practical techniques that are valuable to petrophysicists and engineers in their day-to-day jobs. Based on the author's many years of experience working in oil companies around the world, this guide is a comprehensive collection of techniques and rules of thumb that work. The Oxford Handbook of Industrial Policy Arkebe Ogubay, Christopher Cramer, Ha-Joon Chang, Richard Kozul-Wright, 2020-10-19 Industrial policy has long been regarded as a strategy to encourage sector-, industry-, or economy-wide development by the state. It has been central to competitiveness, catching up, and structural change in both advanced and developing countries. It has also been one of the most contested perspectives, reflecting ideologically inflected debates and shifts in prevailing ideas. There has lately been a renewed interest in industrial policy in academic circles and international policy dialogues, prompted by the weak outcomes of policies pursued by many developing countries under the direction of the Washington Consensus (and its descendants), the slow economic recovery of many advanced economies after the 2008 global financial crisis, and mounting anxieties about the national consequences of globalization. The Oxford Handbook of Industrial Policy presents a comprehensive review of and a novel approach to

the conceptual and theoretical foundations of industrial policy. The Handbook also presents analytical perspectives on how industrial policy connects to broader issues of development strategy, macro-economic policies, infrastructure development, human capital, and political economy. By combining historical and theoretical perspectives, and integrating conceptual issues with empirical evidence drawn from advanced, emerging, and developing countries, The Handbook offers valuable lessons and policy insights to policymakers, practitioners and researchers on developing productive transformation, technological capabilities, and international competitiveness. It addresses pressing issues including climate change, the gendered dimensions of industrial policy, global governance, and technical change. Written by leading international thinkers on the subject, the volume pulls together different perspectives and schools of thought from neo-classical to structuralist development economists to discuss and highlight the adaptation of industrial policy in an ever-changing socio-economic and political landscape.

Don't Startup Karthik Kumar, 2018-09-06 No one tells you that: • Money is seldom the reason why people don't start businesses - fear of money is. • Failures will far outnumber successes. Make failure a friend. Become familiar with it - know how to look it in the eye and find out more about it. • People do business with people they like and are familiar with. To most people, YOU are the business. • There is no good or bad investor; there are only right or wrong investors. • What makes an entrepreneur special is the bridge of intelligence between the left and the right brain, the bridge between Business and Art. Through this never-before-seen side of entrepreneurship,

Karthik Kumar explores the various emotional challenges an entrepreneur faces and also tells you how to overcome them. Don't Startup is not about giving you the knowledge and the know-hows of starting up. It is about imparting the wisdom that Karthik has gained from his journey and how that wisdom will be the strength in yours.

Kartikeya Anuja Chandramouli, 2017 Unravel the puzzle that is the mysterious and misunderstood son of Mahadeva-KARTIKEYA. Kartikeya was born from the flames of a desperate need, an ardent desire, and an utmost devastation. In him was distilled the terrible powers of Mahadev, at its fiercest and most deadly. Although he fought many wars and slew many tyrants, yet his gifts to humanity have always been those of mercy, compassion and love. What makes this possible? For Kartikeya, there have always been more questions than answers. Did he really walk away from his family over a piece of fruit? What about the women in his life—was he the ravisher he is at times accused of being, or the protector of women? Was he the violent warrior who revelled in bloodlust, or a gentle family man?

What was his relationship with his more popular sibling, Ganesha? Anuja Chandramouli weaves together myth, imagination and folklore while looking to answer these questions, and recreates for modern readers the story of one of the most enigmatic gods-Kartikeya.
