Solve each puzzle by rearranging the letters to form the matching song and artist. For example, consider the following puzzle: DBA CARMENO (song), DALY AGGA (artist). Rearranging the letters DBA CARMENO, we can form the song BAD ROMANCE, and rearranging the letters DALY AGGA, we can form the corresponding singer, LADY GAGA. A hints section at the back of the book provides the first letter of each answer, which is handy if you just need a little help; a separate section provides the answers so that you can check your solutions.

Letters to a Young Athlete Chris Bosh,2021-06-01 A legendary NBA player shares his remarkable story, infused with hard-earned wisdom about the journey to self-mastery from a life at the highest level of professional sports Chris Bosh, NBA Hall of Famer, eleven-time All-Star, two-time NBA champion, Olympic gold medalist, and the league’s Global Ambassador, had his playing days cut short at their prime by a freak medical condition. His extraordinary career ended “in a doctor’s office in the middle of the afternoon.” Forced to reckon with moving forward, he found himself looking back over the course he'd taken, to the pinnacle of the NBA and beyond. Reflecting on all he had learned from a long list of basketball legends, from LeBron and Kobe to Pat Riley and Coach K, he saw that his important lessons weren’t about basketball so much as the inner game of success—right attitude, right commitment, right flow within a team. Now he shares that journey, giving us a view from the inside of what greatness feels like and what it takes. Letters to a Young Athlete offers a proven path for taming your inner voice and making it your ally, through the challenges of failure and success alike.

Memories That Matter Christopher R. Madan,2024-03-28 What makes some experiences more memorable than others? How can you better remember specific information later? Memories That Matter addresses these questions and more. The book is divided into three main parts, with each part focusing on a different aspect of memory. After the introductory first part, Part II discusses everyday uses of memory and why we remember, establishing a foundation for how memory is structured and stored in the brain. Part III dives into what makes us remember. Emotional and rewarding experiences are both more memorable than mundane experiences but are often studied using different approaches. Self-relevance and objects we can interact with are remembered better than less relevant information. The author explores these motivation-related influences on memory and considers whether a common mechanism underlies them all. Part IV changes the focus, discussing how we sometimes want to remember specific information that does not automatically capture our attention. The book considers evidence-based learning strategies and memory strategies, whilst also exploring real-world applications, with discussion of professions that accomplish amazing memory feats daily. The book concludes with a reflection on how the role of memory is changing as our world makes information increasingly accessible, particularly with the ever-expanding influence of the internet. Drawing from a variety of literatures and perspectives, this important book will be relevant for all students of memory from psychology, cognitive neuroscience, and related health backgrounds.
