Antistatic Sprays National Aeronautics and Space Administration, 2018-10-25 Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Typographic Systems of Design Kimberly Elam, 2007-05-03 Typographic organization has always been a complex system in that there are so many elements at play, such as hierarchy, order of reading, legibility, and contrast. In *Typographic Systems*, Kim Elam, author of our bestselling books, *Geometry of Design* and *Grid Systems*, explores eight major structural frameworks beyond the grid including random, radial, modular, and bilateral systems. By taking the reader through exercises, student work, and professional examples, Elam offers a broad range of design solutions. Once essential visual organization systems are understood the designer can fluidly organize words or images within a structure, combination of structures, or a variation of a structure. With clarity and substance, each system from the structured axis to the nonhierarchical radial array is explained and explored so that the reader comes away with a better understanding of these intricate complex arrangements. *Typographic Systems* is the seventh title in our bestselling *Design Briefs* series, which has sold more than 100,000 copies worldwide.

Metal Curtain Walls National Research Council (U S) Bui, 2023-07-18 *Metal Curtain Walls* is a comprehensive guide to the design and construction of modern curtain wall systems. It covers everything from the basics of construction to detailed information on materials, finishes, and installation methods. With contributions from leading experts in the field, this book is an essential resource for architects, engineers, and builders involved in the design and construction of commercial and industrial buildings. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. Hokkaido Highway Blues Will Ferguson, 2003 It had never been done before. Not in 4000 years of Japanese recorded history had anyone followed the Cherry Blossom Front from one end of the country to the other. Nor had anyone hitchhiked the length of Japan. But, heady on sakura and sake, Will Ferguson bet he could do both. The resulting travelogue is one of the funniest and most illuminating books ever written about Japan. And, as Ferguson learns, it illustrates that to travel is better than to arrive.

Untangling My Chopsticks Victoria Abbott Riccardi, 2008-12-18 Two years out of college and with a degree from Le Cordon Bleu in Paris, Victoria Riccardi left a boyfriend, a rent-controlled New York City apartment, and a plum job in advertising to move to Kyoto to study kaiseki, the exquisitely refined form of cooking that accompanies the formal Japanese tea ceremony. She arrived in Kyoto, a city she had dreamed about but never seen, with two bags, an open-ended plane ticket, and the ability to speak only sushi-bar Japanese. She left a year later, having learned the language, the art of kaiseki, and what was truly important to her. Through special introductions and personal favors, Victoria was able to attend one of Kyoto's most prestigious tea schools, where this age-old Japanese art has been preserved for generations and where she was taken under the wing of an American expatriate who became her mentor in the highly choreographed rituals of this extraordinary culinary discipline. During her year in Kyoto, Victoria explored the mysterious and rarefied world of tea kaiseki, living a life inaccessible to most foreigners. She also discovered the beguiling realm of modern-day Japanese food—the restaurants, specialty shops, and supermarkets. She participated in many fast-disappearing culinary customs, including making mochi (chewy rice cakes) by hand, a beloved family ritual barely surviving in a mechanized age. She celebrated the annual cleansing rites of New Year's, donning an elaborate kimono and obi for a thirty-four-course extravaganza. She includes twenty-five recipes for favorite dishes she encountered, such as Chicken and Egg Rice Bowl, Japanese Beef and Vegetable Hotpot, and Green-Tea Cooked Salmon Over Rice. *Untangling My Chopsticks* is a sumptuous journey into the tastes, traditions, and exotic undercurrents of Japan. It is also a coming-of-age tale steeped in history and ancient customs, a thoughtful meditation on life, love, and learning in another land.

Learning with Information Systems Simon Bell, 2013-02-01 In *Learning with Information Systems* the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Fractured Realms Horrified Press, 2014-06-15 Extraordinary people marked 'not normal' come from all different walks of life. For far too long, a shroud of darkness was thrown over those who've had boundless potential to transcend greatness; shunned and cast out

through the misjudgment forced upon them. People enduring isolation from being trapped inside their own minds. People labeled with an ASD-Autism Spectrum Disorder. Seeds of greatness cannot be cultivated through judgment and condemnation. Imagine a world never having heard the music of Wolfgang Amadeus Mozart? Never seeing the extraordinary art of Michelangelo? What if Sir Isaac Newton hadn't discovered gravity, and laws of motion that would be relevant 300 years later? And for all the writers out there...were you aware that Lewis Carroll-author of 'Alice in Wonderland'-fell under the umbrella of Autism? So to all of you, who are reading this, ask yourself... Is Autism a disorder, or is it a gift? Through their short stories and poetry, a collection of talented authors have tackled that question.

International Conference on Magnetic Materials (ICMM-2010) Amitabha Ghoshray, Bilwadal Bandyopadhyay, Chandan Mazumdar, 2011-07-28 For researchers in Condensed Matter Physics, this conference provided a forum for presentation and discussion of the new concepts and developments in magnetic materials encompassing areas like: (1) magnetic thin film and multilayer, (2) nanostructured materials, (3) disordered and frustrated systems (4) alloy and intermetallics (5) transition metal oxides (6) spintronics and magnetic transport (7) application in magnetic recording. New results obtained using experimental techniques such as: (a) magnetization and magneto-transport and magneto-calorie, (b) scattering techniques (light and neutron), and © resonance techniques (EPR, NMR and Mossbauer) as well as many important theoretical developments were discussed. Detail experimental and theoretical aspects of Fe-pnictide superconductor were also discussed.

A Life Less Ordinary John Hodge, 1997 He's a down-on-his-luck janitor with aspirations of writing the great American trash novel. She's the spoiled, sharp-tongued boss's daughter, always looking for a creative way to spice up her boring life. Normally, these two would never meet, but a higher power has different plans for both of them. The major motion picture from 20th Century Fox starring Ewan McGregor, Cameron Diaz and Holly Hunter hits the box office in October.

International Conference on Advanced Nanomaterials and Nanotechnology (ICANN-2009) P.K. Giri, D.K. Goswami, A. Perumal, A. Chattopadhyay, 2010-10-29 Nanoscale science and technology have occupied centre stage globally in modern scientific research and discourses in early twenty first century. The enabling nature of the technology makes it important in modern electronics, computing, materials, healthcare, energy and the environment. This volume contains some of the papers presented at the ICANN-2009, the first ever international conference on the subject held in the North-eastern part of India, with aims to promote sharing of new knowledge and exchange of the latest ideas in the field, through deliberations in the conference. The papers presented had been designed to represent the length and breadth of the field, with specific emphasis on the multidisciplinary nature of the subject. The peer reviewed articles contained herein are classified into several important subareas, e.g., nanostructured and nanoscale functional materials, nanobiotechnology, nanocomposites, nanoelectronics and nanosensors, nanomagnetism, computational nanotechnology etc. We hope that the readers would find the articles selected for publication scientifically exciting and useful.
