Computers Helping People with Special Needs

Klaus Miesenberger, Joachim Klaus, Wolfgang Zagler, Arthur Karshmer, 2008-07-04 Welcome to the proceedings of ICCHP 2008. We were proud to welcome participants from more than 40 countries from all continents to ICCHP. The International Programme Committee, encompassing 102 experts from all over the world, selected 150 full and 40 short papers out of 360 abstracts submitted to ICCHP. Our acceptance rate of about half of the submissions, demonstrates the scientific quality of the programme and in particular the proceedings you have in your hands. An impressive group of experts agreed to organize "Special Thematic Sessions" (STS) for ICCHP 2008. The existence of these STS sessions helped to bring the meeting into sharper focus in several key areas of assistive technology. In turn, this deeper level of focus helped to bring together the state-of-the-art and mainstream technical, social, cultural and political developments. Our keynote speaker, Jim Fruchterman from BeneTech, USA highlighted the importance of giving access to ICT and AT at a global level. In another keynote by Harold Thimbleby, Swansea University, UK, the role of user-centred design and usability engineering in assistive technology and accessibility was

addressed. And finally, a combination keynote and panel discussion was reserved for WAI/WCAG2.0, which we expect to be the new reference point for Web accessibility from the summer of 2008 and beyond.

American Icons [3 volumes] Dennis R. Hall, Susan Grove Hall, 2006-06-30 What do Madonna, Ray Charles, Mount Rushmore, suburbia, the banjo, and the Ford Mustang have in common? Whether we adore, ignore, or deplore them, they all influence our culture, and color the way America is perceived by the world. In this A-to-Z collection of essays scholars explore more than one hundred people, places, and phenomena as they seek to discover what it means to be labeled icon. From the Alamo to Muhammad Ali, from John Wayne to the zipper, the American icons covered in this unique three-volume set include subjects from culture, law, art, food, religion, and science. By providing numerous ways for the reader to engage in the process of interpreting these images and artifacts, the work serves as a unique resource for students of American history and culture. Features 100 illustrations. What do Madonna, Ray Charles, Mount Rushmore, suburbia, the banjo, and the Ford Mustang have in common? Whether we adore, ignore, or deplore them, they all influence our culture, and color the way America is perceived by the world. This A-to-Z collection of essays explores more than one hundred people, places, and phenomena that have taken on iconic status in American culture. The scholars and writers whose thoughts are gathered in this unique three-volume set examine these icons through a diverse array of perspectives and fields of expertise. Ranging from the Alamo to Muhammad Ali, from John Wayne to the zipper, this selection of American icons represents essential elements of our culture, including law, art, food, religion, and science. Featuring more than 100 illustrations, this

work will serve as a unique resource for students of American history and culture. The interdisciplinary scholars in this work examine what it means when something is labeled as an icon. What common features do the people, places, and things we deem to be iconic share? To begin with, an icon generates strong responses in people, it often stands for a group of values (John Wayne), it reflects forces of its time, it can be reshaped or extended by imitation, and it often breaks down barriers between various segments of American culture, such as those that exist between white and black America, or between high and low art. The essays contained in this set examine all these aspects of American icons from a variety of perspectives and through a lively range of rhetoric styles.
