Advanced Technologies for Intelligent Systems of National Border Security Aleksander Nawrat,Krzysztof Simek,Andrzej Świerniak,2012-08-14 One of the world's leading problems in the field of national security is protection of borders and borderlands. This book addresses multiple issues on advanced innovative methods of multi-level control of both ground (UGVs) and aerial drones (UAVs). Those objects combined with innovative algorithms become autonomous objects capable of patrolling chosen borderland areas by themselves and automatically inform the operator of the system about potential place of detection of a specific incident. This is achieved by using sophisticated methods of generation of non-collision trajectory for those types of objects and enabling automatic integration of both ground and aerial unmanned vehicles. The topics included in this book also cover presentation of complete information and communication technology (ICT) systems capable of control, observation and detection of various types of incidents and threats. This book is a valuable source of information for constructors and developers of such solutions for uniformed services. Scientists and researchers involved in computer vision, image processing, data fusion, control algorithms or IC can find many valuable suggestions and solutions. Multiple challenges for such systems are also presented.

Ambient Intelligence Panos Markopoulos,Berry Eggen,Emile Aarts,James L. Crowley,2004-10-20 This volume of the LNCS is the formal proceedings of the 2nd European Symposium on Ambient Intelligence, EUSAI 2004. This event was held on November 8-10, 2004 at the Eindhoven University of Technology, in Eindhoven, the Netherlands. EUSAI 2004 followed a successful first event in 2003, organized by Philips Research. This turned out to be a timely initiative that created a forum for bringing together European researchers, working on different disciplines all contributing towards the human-centric technological vision of ambient intelligence. Compared to conferences working on similar and overlapping fields, the first EUSAI was characterized by a strong industrial focus reflected in the program committee and the content of the program. As program chairs of EUSAI 2004 we tried to preserve the character for this event and its combined focus on the four major thematic areas: ubiquitous computing, context awareness, intelligence, and natural interaction. Further, we tried to make EUSAI 2004 grow into a full-fledged double-track conference, with surrounding events like tutorials and specialized workshops, a poster and demonstration exhibition and a student design competition. The conference program included three invited keynotes, Ted Selker from MIT, Tom Rodden from the University of Nottingham and Tom Erickson from IBM.

Magical Interpretations, Material Realities Henrietta L. Moore,Todd Sanders,2003-09-02 'Magical Interpretations, Material Realities brings together many of today's best scholars of contemporary Africa. The theme of witchcraft has long been associated with exoticizing portraits of a traditional Africa, but this volume takes the question of occult as a point of entry into the moral politics of some very modern African realities.' - James Ferguson, University of California, USA 'These essays bear eloquent testimony to the ongoing presence and power of the occult imaginary, and of the intimate connection between global capitalism and local cosmology, in postcolonial Africa. A major contribution to scholarship that aims to rework the divide between modernity and tradition.' - Charles Piot, Duke University, USA This volume sets out recent thinking on witchcraft in Africa, paying particular attention to variations in meanings and practices. It examines the way different people in different contexts are making sense of what 'witchcraft' is and what it might mean. Using recent ethnographic materials from across the continent, the volume explores how witchcraft articulates with particular modern settings for example: the State in Cameroon; Pentecostalism in Malawi; the university system in Nigeria and the IMF in Ghana, Sierra Leone and Tanzania. The editors provide a timely overview and reconsideration of long-standing anthropological debates about 'African witchcraft', while simultaneously raising broader concerns about the theories of the western social sciences.

Remote Control Nnedi Okorafor,2021-01-19 An alien artifact turns a young girl into Death's adopted daughter in Remote Control, a thrilling sci-fi tale of community and female empowerment from Nebula and Hugo Award-winner Nnedi Okorafor "She's the adopted daughter of the Angel of Death. Beware of her. Mind her. Death guards her like one of its own." The day Fatima forgot her name, Death paid a visit. From hereon in she would be known as Sankofa—a name that meant nothing to anyone but her, the only tie to her family and her past. Her touch is death, and with a glance a town can fall. And she walks—alone, except for her fox companion—searching for the object that came from the sky and gave itself to her when the meteors fell and when she was yet unchanged; searching for answers. But is there a greater purpose for Sankofa, now that Death is her constant companion? Winner of the AudioFile Earphones Award (audiobook version). Friction Is Fiction: the Future of Content, Media and Business (Black and White Edition) Gerd Leonhard,2010-05-06 Futurist and Thought-Leader Gerd Leonhard (www.mediafuturist.com) shares his thoughts on the Future of Content, Media and Business. 'Friction is Fiction' presents a constantly updated compilation of Gerd's best essays, writings and most popular blog posts. The central meme is that the Internet has completely disrupted the traditional notion of generating higher income by simply taking advantage of possible friction points and hurdles within transactions or business processes, i.e. by controlling the 'people formerly known as consumers'. The Future is all about winning the trust, and turning attention into revenues.This is the low-cost, black & white version of the book - if you want the full-color version please go to <http://gerd.fm/cmrfB1>

Dark Dreams 2.0 Charles Derry,2009-12-21 Greatly expanded and updated from the 1977 original, this new edition explores the

evolution of the modern horror film, particularly as it reflects anxieties associated with the atomic bomb, the Cold War, 1960s violence, sexual liberation, the Reagan revolution, 9/11 and the Iraq War. It divides modern horror into three varieties (psychological, demonic and apocalyptic) and demonstrates how horror cinema represents the popular expression of everyday fears while revealing the forces that influence American ideological and political values. Directors given a close reading include Alfred Hitchcock, Brian De Palma, David Cronenberg, Guillermo Del Toro, Michael Haneke, Robert Aldrich, Mel Gibson and George A. Romero. Additional material discusses postmodern remakes, horror franchises and Asian millennial horror. This book also contains more than 950 frame grabs and a very extensive filmography.

Mechatronic Systems Annalisa Milella,Grazia Cicirelli,2010-03-01 Mechatronics, the synergistic blend of mechanics, electronics, and computer science, has evolved over the past twenty five years, leading to a novel stage of engineering design. By integrating the best design practices with the most advanced technologies, mechatronics aims at realizing high-quality products, guaranteeing at the same time a substantial reduction of time and costs of manufacturing. Mechatronic systems are manifold and range from machine components, motion generators, and power producing machines to more complex devices, such as robotic systems and transportation vehicles. With its twenty chapters, which collect contributions from many researchers worldwide, this book provides an excellent survey of recent work in the field of mechatronics with applications in various fields, like robotics, medical and assistive technology, human-machine interaction, unmanned vehicles, manufacturing, and education. We would like to thank all the authors who have invested a great deal of time to write such interesting chapters, which we are sure will be valuable to the readers. Chapters 1 to 6 deal with applications of mechatronics for the development of robotic systems. Medical and assistive technologies and human-machine interaction systems are the topic of chapters 7 to 13.Chapters 14 and 15 concern mechatronic systems for autonomous vehicles. Chapters 16-19 deal with mechatronics in manufacturing contexts. Chapter 20 concludes the book, describing a method for the installation of mechatronics education in schools.

Technological Visions Marita Sturken,Douglas Thomas,Sandra Ball-Rokeach,2004 For as long as people have developed new technologies, there has been debate over the purposes, shape, and potential for their use. In this exciting collection, a range of contributors, including Sherry Turkle, Lynn Spigel, John Perry Barlow, Langdon Winner, David Nye, and Lord Asa Briggs, discuss the visions that have shaped new technologies and the cultural implications of technological adaptation. Focusing on issues such as the nature of prediction, community, citizenship, consumption, and the nation, as well as the metaphors that have shaped public debates about technology, the authors examine innovations past and present, from the telegraph and the portable television to the Internet, to better understand how our visions and imagination have shaped the meaning and use of technology. Author note: Marita Sturken is Associate Professor in the Annenberg School for Communication at the University of Southern California and the author of Tangled Memories: The Vietnam War, the AIDS Epidemic, and the Politics of Remembering and Practices of Looking: An Introduction to Visual Culture (with Lisa Cartwright). Douglas Thomas is Associate Professor in the Annenberg School for Communication at the University of Southern California. He is author of three books, most recently Hacker Culture. Sandra Ball-Rokeach is a Professor and Director of the Communication Technology and Community Program in the Annenberg School for Communication at the University of Southern California. She is author of several books, including Theories of Mass Communication (with M. L. De Fleur).

Welcome to the Dreamhouse Lynn Spigel,2001-06-01 In Welcome to the Dreamhouse feminist media studies pioneer Lynn Spigel takes on Barbie collectors, African American media coverage of the early NASA space launches, and television’s changing role in the family home and its links to the broader visual culture of modern art. Exploring postwar U.S. media in the context of the period’s reigning ideals about home and family life, Spigel looks at a range of commercial objects and phenomena, from television and toys to comic books and magazines. The volume considers not only how the media portrayed suburban family life, but also how both middle-class ideals and a perceived division between private and public worlds helped to shape the visual forms, storytelling practices, and reception of postwar media and consumer culture. Spigel also explores those aspects of suburban culture that media typically render invisible. She looks at the often unspoken assumptions about class, nation, ethnicity, race, and sexual orientation that underscored both media images (like those of 1960s space missions) and social policies of the mass-produced suburb. Issues of memory and nostalgia are central in the final section as Spigel considers how contemporary girls use television reruns as a source for women’s history and then analyzes the current nostalgia for baby boom era family ideals that runs through contemporary images of new household media technologies. Containing some of Spigel’s well-known essays on television’s cultural history as well as new essays on a range of topics dealing with popular visual culture, Welcome to the Dreamhouse is important reading for students and scholars of media and communications studies, popular culture, American studies, women’s studies, and sociology.
